

SEEING SCIENCE

The Art of Making the Invisible Visible

Jack Challoner

The MIT Press | Cambridge, Massachusetts

Contents

Introduction: The Importance of Seeing 6

1: Making the Invisible Visible 10

Microscopes and Telescopes 12
Photography and Electron Microscopes 20
Beyond the Visible Spectrum 48
Fields and Particles 70

2: Data, Information, Knowledge 80

Visualizing Data 82
Communicating Information 116
Passing on Knowledge 132

3: Mathematical Models and Simulations 150

Mathematics as a Model of Reality 152
Computational Fluid Dynamics 190

4: Art in Science 208

Art and Science 210
Paleoart 230
Space Art 246
