## Part I

### Fundamental and basics of biomolecules

#### 1. Amino acids: Classification, synthesis methods, reactions, and determination

*Yeastdev Dewangan, Elyor Berdimurodov, and Dakeshwar Kumar Verma*

|       |   |    |
|-------|---|----|
| 1.1   | Introduction                                      | 3  |
| 1.2   | Classification                                    | 4  |
| 1.2.1 | Neutral amino acid                                | 4  |
| 1.2.2 | Basic amino acid                                  | 7  |
| 1.2.3 | Acidic amino acid                                 | 8  |
| 1.3   | Synthesis of amino acids                          | 9  |
| 1.3.1 | Chemical synthesis                                | 9  |
| 1.3.2 | Biosynthesis of amino acids                       | 11 |
| 1.3.3 | Fermentation process                              | 11 |
| 1.3.4 | Extraction from protein hydrolysis                | 11 |
| 1.4   | Physical properties                               | 11 |
| 1.4.1 | Zwitter ion                                       | 12 |
| 1.4.2 | Isoelectric point                                 | 12 |
| 1.5   | Reactions of amino acids                          | 14 |
| 1.6   | Sequencing the peptide: Terminal residue analysis | 17 |
| 1.6.1 | N-terminal determination of amino acid            | 18 |
| 1.6.2 | Protein sequence                                  | 19 |
| 1.7   | Stereochemistry of amino acids                    | 21 |
| 1.7.1 | D, L form of amino acids/relative configuration   | 21 |
| 1.7.2 | R/S system (absolute configuration)               | 21 |
| 1.8   | Applications of amino acids                       | 21 |
| 1.9   | Conclusion  | 22 |
| 1.10  | Useful links                                      | 22 |
|       | Conflict of interest                              | 22 |

#### 2. Carbohydrate: Introduction and fundamentals

*Ashish Kumar Asatkar and Ranjan Kumar Basak*

|       |   |    |
|-------|---|----|
| 2.1   | Introduction                                | 25 |
| 2.2   | Classification of carbohydrates             | 25 |
| 2.2.1 | Classification based on physical properties | 25 |
| 2.2.2 | Classification based on chemical properties | 25 |
| 2.2.3 | Classification based on functional groups   | 26 |
| 2.2.4 | Classification based on reducing nature     | 28 |
| 2.2.5 | Chemistry of D-glucose                      | 29 |
| 2.3   | Configuration of D-glucose                  | 38 |
| 2.3.1 | Chemistry of D-fructose                     | 42 |
| 2.3.2 | Interconversions                            | 46 |
| 2.4   | Disaccharides                               | 50 |
| 2.4.1 | Chemistry of sucrose                        | 50 |
| 2.4.2 | Chemistry of lactose                        | 50 |
| 2.4.3 | Chemistry of maltose                        | 51 |
| 2.4.4 | Chemistry of trehalose                      | 52 |
| 2.5   | Polysaccharides                             | 52 |
| 2.5.1 | Chemistry of starch                         | 52 |
| 2.5.2 | Chemistry of cellulose                      | 54 |
| 2.5.3 | Chemistry of glycogen                       | 55 |
| 2.5.4 | Chemistry of chitin                         | 55 |
|       | References                                  | 55 |

#### 3. Nucleic acids: Components, nomenclature, types, and protection method

*Mamta Tripathi, Avijit Sarkar, and Mithlesh Mahilang*

|       |   |    |
|-------|---|----|
| 3.1   | Introduction                                | 57 |
| 3.2   | Types of nucleic acids and their components | 57 |
| 3.2.1 | Components of nucleotides                   | 58 |
| 3.2.2 | Pentose sugar                               | 58 |
| 3.2.3 | Nucleoside and nucleotide                   | 60 |

|            |  |    |            |  |     |
|------------|--|----|------------|--|-----|
| 3.3        | Nomenclature of nucleic acids                                      | 62 | 4.2.5      | Determination of various amino acids in C terminal of peptide bond     | 80  |
| 3.4        | Structure and function of DNA                                      | 62 | 4.2.6      | Determination of various amino acids in the N terminal of peptide bond | 80  |
| 3.4.1      | Watson and Crick model   | 65 | 4.2.7      | Enzymatic hydrolysis of peptide bond                                   | 82  |
| 3.4.2      | The biological function of DNA                                     | 66 | 4.3        | Classification of protein  | 84  |
| 3.4.3      | Functions of RNA in protein synthesis                              | 66 | 4.3.1      | Traditional classification   | 84  |
| 3.4.4      | RNA as hereditary information                                      | 66 | 4.3.2      | Based on their structure   | 84  |
| 3.5        | Difference between DNA and RNA                                     | 67 | 4.3.3      | Based on composition   | 85  |
| 3.6        | Protection method of DNA and RNA                                   | 67 | 4.3.4      | Classification of protein-based on their biological function           | 86  |
| 3.6.1      | Protecting groups for bases  | 67 | 4.4        | Structure of protein   | 87  |
| 3.6.2      | Protecting groups for secondary hydroxyl functions                 | 68 | 4.4.1      | Primary structure  | 87  |
| 3.6.3      | Protecting groups for the primary hydroxyl group                   | 68 | 4.4.2      | Secondary structure of protein   | 88  |
| 3.6.4      | Protecting groups for phosphoesters and the phosphorylation method | 68 | 4.4.3      | Tertiary structure of protein  | 91  |
| 3.7        | Solid phase synthesis  | 69 | 4.4.4      | Quaternary structure of protein  | 94  |
| 3.7.1      | Solid-phase synthesis of DNA and RNA                               | 69 | 4.5        | Property of protein  | 94  |
| 3.7.2      | Phosphodiester synthesis   | 69 | 4.5.1      | Physical properties of protein   | 94  |
| 3.7.3      | Phosphotriester synthesis  | 70 | 4.5.2      | Chemical property of proteins  | 97  |
| 3.7.4      | Phosphite triester synthesis                                       | 70 | 4.6        | Importance of peptide and proteins                                     | 103 |
| 3.8        | Replication  | 71 | 4.6.1      | Protein/peptides conjugated NPs in biomedicine                         | 103 |
| 3.8.1      | Polymerase chain reaction  | 72 | 4.6.2      | Peptide as a drug for disease target                                   | 104 |
| 3.8.2      | Ligase chain reaction  | 73 | 4.6.3      | Protein acts as a sensor   | 105 |
| 3.9        | Applications of DNA and RNA  | 73 | 4.6.4      | Act as a messenger   | 106 |
| 3.9.1      | Genetic engineering  | 73 | 4.6.5      | Acts as a biocatalyst  | 107 |
| 3.9.2      | DNA nanotechnology   | 73 | 4.6.6      | Act as a drug and gene delivery system                                 | 108 |
| 3.9.3      | DNA profiling  | 73 | 4.6.7      | Gene delivery through protein nanoparticle                             | 110 |
| 3.9.4      | DNA profiling  | 74 | 4.7        | Conclusion and future perspective                                      | 111 |
| 3.9.5      | DNA enzymes or catalytic DNA                                       | 74 | References |  | 111 |
| 3.10       | Conclusion   | 74 |            |  |     |
| References |  | 74 |            |  |     |

#### 4. Proteins: Structure, properties, and importance

*Bhavabhuti Prasad, Amit Kumar Shiv, Abinash Chand Bharati, and Sadhucharan Mallick*

|       |  |    |
|-------|--|----|
| 4.1   | Introduction                                     | 77 |
| 4.2   | Peptide  | 78 |
| 4.2.1 | Nomenclature for amino acids and peptides        | 78 |
| 4.2.2 | Features of peptide bond                         | 79 |
| 4.2.3 | Polarization of peptide bond                     | 79 |
| 4.2.4 | Synthesis of peptide bond using protecting group | 79 |

#### 5. Vitamins and metabolites

*Shippi Dewangan and Amarpreet K. Bhatia*

|       |  |     |
|-------|--|-----|
| 5.1   | Introduction                                       | 119 |
| 5.2   | Classification of vitamins                         | 119 |
| 5.3   | Sources of vitamins                                | 119 |
| 5.4   | Nomenclature and structural properties of vitamins | 120 |
| 5.4.1 | Vitamin A  | 122 |
| 5.4.2 | Vitamin D  | 122 |
| 5.4.3 | Vitamin E  | 123 |
| 5.4.4 | Vitamin K  | 123 |
| 5.4.5 | Vitamin C (ascorbic acid)                          | 124 |
| 5.4.6 | Vitamin B <sub>1</sub> (thiamine)                  | 124 |
| 5.4.7 | Vitamin B <sub>2</sub> (Riboflavin)                | 125 |

|   |     |   |     |
|---|-----|---|-----|
| 5.4.8 Vitamin B <sub>3</sub> (niacin)   | 125 | 7.2.2 Endocrine gland and their hormone   | 153 |
| 5.4.9 Vitamin B <sub>5</sub> (pantothenic acid)   | 126 | <b>7.3 Plant hormone</b>  | 162 |
| 5.4.10 Vitamin B <sub>6</sub>   | 126 | 7.3.1 Auxins  | 162 |
| 5.4.11 Vitamin H (Biotin)   | 127 | 7.3.2 Gibberellins  | 164 |
| 5.4.12 Folate (folic acid)  | 127 | 7.3.3 Cytokinins (CK)   | 165 |
| <b>5.5 Metabolism of the vitamins</b>   | 128 | 7.3.4 Absciscic acid (ABA)  | 166 |
| <b>5.6 Metabolic functions of the vitamins</b>  | 129 | 7.3.5 Ethylene  | 166 |
| <b>5.7 Excretion of vitamins as metabolites</b>   | 129 | 7.3.6 Jasmonate (JA)  | 167 |
| <b>5.8 Conclusion</b>   | 131 | 7.3.7 Brassinosteroids (BR)   | 167 |
| <b>References</b>   | 131 | 7.3.8 Salicylic acid  | 168 |
|   |     | 7.3.9 Strigolactones (SL)   | 169 |
|   |     | <b>7.4 Conclusion</b>   | 170 |
|   |     | <b>References</b>   | 171 |
| <b>6. Enzymes, coenzymes, and pigments</b>  |     | <b>8. Alkaloids and terpenoids: Synthesis, classification, isolation and purification, reactions, and applications</b>  |     |
| <i>Santosh Bahadur Singh, Praveen Kumar Tandon, Parmesh Kumar Chaudhari, and Dakeshwar Kumar Verma</i>                              |     | <i>Mayur Mausoom Phukan, Samson Rosly Sangma, Debajit Kalita, Plaban Bora, Pranjal Pratim Das, Kumar Manoj, Pranay Punj Pankaj, Imnawapang Jamir, Dakeshwar Kumar Verma, G Bupesh, and K Meenakshi Sundaram</i> |     |
| <b>6.1 Enzymes: A historical introduction</b>   | 133 | <b>8.1 Introduction</b>   | 177 |
| 6.1.1 Classification  | 135 | <b>8.2 Distribution/occurrence</b>  | 178 |
| 6.1.2 Enzyme chemistry: Properties and reactions  | 136 | <b>8.3 Classification</b>   | 178 |
| 6.1.3 Extraction/synthetic methods  | 139 | 8.3.1 Classification of alkaloids   | 178 |
| 6.1.4 Applications  | 139 | 8.3.2 Classification of terpenoids  | 179 |
| <b>6.2 Coenzymes: A historical introduction</b>   | 139 | <b>8.4 Extraction and purification of alkaloids and terpenoids</b>  | 179 |
| 6.2.1 Classification  | 140 | 8.4.1 Extraction  | 179 |
| 6.2.2 Coenzyme chemistry: Properties and reactions  | 140 | 8.4.2 Purification  | 181 |
| 6.2.3 Extraction/synthetic methods  | 140 | <b>8.5 Biosynthesis of alkaloids</b>  | 182 |
| 6.2.4 Applications  | 142 | 8.5.1 Biosynthesis of alkaloids from amino acid lysine  | 182 |
| <b>6.3 Pigments: A historical introduction</b>  | 142 | 8.5.2 Biosynthesis of alkaloids from amino acids ornithine and arginine   | 184 |
| 6.3.1 Classification  | 144 | 8.5.3 Biosynthesis of alkaloids from amino acid aspartic acid (and "nicotinic acid" vitamin)  | 189 |
| 6.3.2 Pigment chemistry: Properties and reactions   | 144 | 8.5.4 Biosynthesis of alkaloids from amino acid tryptophan  | 189 |
| 6.3.3 Extraction/synthetic methods  | 146 | <b>8.6 Biosynthesis of terpenoids</b>   | 189 |
| 6.3.4 Applications  | 147 | 8.6.1 Biosynthesis of TAXOL   | 189 |
| <b>6.4 Conclusion and future perspectives</b>   | 147 | 8.6.2 Biosynthesis of squalene  | 189 |
| <b>References</b>   | 147 | 8.6.3 Biosynthesis of carotenoids   | 189 |
| <b>Further reading</b>  | 149 | 8.6.4 Biosynthesis of natural rubber  | 192 |
| <b>7. Animal and plant hormone</b>  |     |   |     |
| <i>Abinash Chand Bharati, Bhavabhuti Prasad, Sadhucharan Mallick, Devendra Singh Masram, Ajay Kumar, and Gyanendra Kumar Saxena</i> |     |   |     |
| <b>7.1 Introduction</b>   | 151 |   |     |
| <b>7.2 Animal hormone</b>   | 152 |   |     |
| 7.2.1 Classification of hormones in animals   | 152 |   |     |

|  |     |
|--|-----|
| <b>8.7 Analytical methods for alkaloids and terpenoids</b> | 193 |
| 8.7.1 Analysis of alkaloids                                | 194 |
| 8.7.2 Analysis of terpenoids                               | 197 |
| <b>8.8 Biological role of alkaloids and terpenoids</b>     | 199 |
| 8.8.1 Anticancer   | 199 |
| 8.8.2 Antibacterial, antifungal, and antioxidant           | 200 |
| 8.8.3 Antiviral  | 200 |
| 8.8.4 Antitubercular                                       | 200 |
| 8.8.5 Antimalarial and antiparasitic                       | 200 |
| 8.8.6 Anti-inflammatory                                    | 201 |
| 8.8.7 Neuroprotection                                      | 201 |
| 8.8.8 Immunomodulator and stimulant                        | 201 |
| 8.8.9 Antihypertension                                     | 201 |
| 8.8.10 Antidiabetic and anti-obesity                       | 202 |
| 8.8.11 Bioinsecticide                                      | 202 |

## Part II Isolation, purification and separation

### 9. Chromatography

*Jasdeep Kaur and Akhil Saxena*

|   |     |
|---|-----|
| <b>9.1 Introduction</b>   | 217 |
| 9.1.1 Principles of chromatography  | 217 |
| 9.1.2 Chromatography parts  | 218 |
| 9.1.3 Types of chromatography   | 218 |
| <b>9.2 Applications of chromatography</b>                                 | 224 |
| 9.2.1 Chromatographic applications in antibody purification               | 224 |
| 9.2.2 Chromatography in relation to antifungal agents                     | 224 |
| 9.2.3 Paper chromatography in the determination of soil health            | 224 |
| 9.2.4 Applications of affinity chromatography in the pharmaceutical field | 224 |
| 9.2.5 Determination of free fatty acids by gas chromatography             | 224 |
| <b>9.3 Conclusion</b>   | 225 |
| <b>References</b>   | 225 |
| <b>Web links</b>  | 225 |

### 10. Liquid-liquid extraction

*K.J. Jisha, K.K. Athira, V.P. Priyanka, and Ramesh L. Gardas*

|  |     |
|--|-----|
| <b>10.1 Introduction</b>               | 227 |
| <b>10.2 Organic solvent-based LLE</b>  | 228 |
| <b>10.3 Water-based LLE</b>            | 231 |
| 10.3.1 Polymer-based LLE               | 231 |
| 10.3.2 Surfactant-/detergent-based LLE | 232 |
| 10.3.3 Ionic liquid-based LLE          | 233 |
| 10.3.4 DES-based LLE                   | 234 |
| <b>10.4 Conclusions</b>                | 235 |

### 11. Microfluidic devices

*Sayanagri Varala, T. Satish, Alka Kumari, and Ajaya Kumar Singh*

|  |     |
|--|-----|
| <b>11.1 Introduction</b>   | 241 |
| 11.1.1 Liquid-liquid extraction in microstructures                         | 242 |
| 11.1.2 Working of microfluidic devices                                     | 243 |
| 11.1.3 Types of microfluidic flows   | 243 |
| 11.1.4 Types of microfluidic devices                                       | 244 |
| 11.1.5 Approaches for liquid-liquid extraction using microfluidics devices | 244 |
| 11.1.6 Active and passive separation techniques                            | 245 |
| 11.1.7 Biomolecules separation   | 250 |
| <b>11.2 Challenges and the future</b>                                      | 252 |
| <b>11.3 Conclusions</b>  | 254 |
| <b>Acknowledgment</b>  | 254 |
| <b>References</b>  | 254 |

## Part III Detection methods of biomolecules

### 12. Biosensors: Detection of biomolecules by biosensors

*Amarpreet K. Bhatia and Shippi Dewangan*

|   |     |
|---|-----|
| <b>12.1 Introduction</b>                    | 259 |
| <b>12.2 Main parts related to biosensor</b> | 259 |
| 12.2.1 Recognition                          | 260 |
| 12.2.2 Transducers for biosensor            | 261 |
| 12.2.3 Signal processing                    | 263 |

|   |     |  |     |
|---|-----|--|-----|
| 12.3 Biosensors for biomolecules sensing  | 263 | 14.4 Nanomechanical sensors  | 294 |
| 12.3.1 Biosensors for nucleic acid detection  | 263 | 14.5 Fundamental working principles and operation modes of nanomechanical biosensors | 294 |
| 12.3.2 Biosensors for glucose detection   | 266 | 14.6 Functionalization of nanomechanical sensors                                     | 295 |
| 12.3.3 Biosensors for cholesterol detection   | 267 | 14.6.1 Coating of receptor layers  | 295 |
| 12.4 Conclusion   | 269 | 14.6.2 Double-side coating   | 296 |
| References  | 269 | 14.7 Carbon nanotube-based nanomechanical sensor                                     | 296 |

## Part IV

### Current applications of biomolecules

## 17. Current applications of biomolecules as anticoronavirus drugs

|        |  |     |
|--------|--|-----|
| 17.1   | Introduction   | 355 |
| 17.2   | Prospects on COVID-19 infection and early global expansion | 357 |
| 17.3   | Traditional Chinese medicine                               | 359 |
| 17.4   | Indian Ayurveda  | 360 |
| 17.4.1 | Ashwagandha ( <i>Withania somnifera</i> )                  | 362 |
| 17.4.2 | Guduchi ( <i>Tinospora cordifolia</i> )                    | 363 |
| 17.4.3 | Yashtimadhu ( <i>Glycyrrhiza glabra</i> )                  | 365 |
| 17.4.4 | Pippali ( <i>P. longum</i> )                               | 365 |
| 17.4.5 | AYUSH-64   | 365 |
| 17.5   | Socioeconomic effects of coronavirus                       | 366 |
| 17.6   | Conclusion   | 367 |
|        | References   | 367 |
|        | Further reading  | 368 |

## 18. Current application of biomolecules in biomolecular engineering

|  |            |
|--|------------|
| <b>18.1 Introduction</b>   | <b>371</b> |
| <b>18.2 Biofuels</b>   | <b>374</b> |
| 18.2.1 Bioremediation of persistent<br>organic pollutants (POPs) | 374        |
| <b>18.3 Challenges in the real world</b>                         | <b>380</b> |
| <b>18.4 Conclusion</b>   | <b>380</b> |
| <b>Declaration of interest statement</b>                         | <b>381</b> |
| <b>Conflict of interest statement</b>                            | <b>381</b> |
| <b>Author's contributions</b>                                    | <b>381</b> |
| <b>References</b>  | <b>381</b> |

## 19. Application of biomolecules in biochemistry

*Amarpreet K. Bhatia and Evneet Kaur Bhatia*

|  |     |
|--|-----|
| 19.1 Introduction                                | 385 |
| 19.2 Application of carbohydrate in biochemistry | 385 |
| 19.2.1 Energy production                         | 385 |
| 19.2.2 Building macromolecules                   | 386 |
| 19.2.3 Sparing protein                           | 386 |
| 19.2.4 Lipid metabolism                          | 387 |
| 19.2.5 Drug delivery                             | 387 |
| 19.3 Application of protein in biochemistry      | 387 |
| 19.3.1 As enzyme                                 | 387 |
| 19.3.2 Proteins of the blood serum               | 388 |
| 19.3.3 Antibody                                  | 388 |
| 19.3.4 Receptors                                 | 389 |
| 19.3.5 Structural proteins                       | 389 |
| 19.4 Application of lipid in biochemistry        | 392 |
| 19.4.1 Steroids                                  | 392 |
| 19.4.2 Steroid hormones                          | 393 |
| 19.4.3 Intracellular second messengers           | 394 |
| 19.5 Application of nucleic acid in biochemistry | 394 |
| 19.5.1 Deoxyribonucleic acid                     | 394 |
| 19.5.2 DNA's replication                         | 394 |
| 19.5.3 Ribonucleic acid in protein synthesis     | 395 |
| 19.6 Conclusion                                  | 396 |
| References                                       | 396 |

## 20. Current applications of biomolecules in biotechnology

*Garima Madharia, Shubha Diwan, Ravishankar Chauhan, Nagendra Kumar Chandrawanshi, and Pramod Kumar Mahish*

|   |     |
|---|-----|
| 20.1 Introduction                                 | 397 |
| 20.2 Applications of amino acid and peptides      | 398 |
| 20.3 Biosignificance of microbial polysaccharides | 400 |
| 20.4 Nucleic acid biotechnological applications   | 402 |
| 20.4.1 Synthetic primer                           | 402 |
| 20.4.2 Locked nucleic acid                        | 402 |
| 20.4.3 DNA-based thermometer and pH meter         | 402 |

|  |     |
|--|-----|
| 20.4.4 RNA interference technology                             | 402 |
| 20.4.5 Genetic vaccine   | 403 |
| 20.4.6 Aptamers  | 403 |
| 20.5 Enzymes and biotechnology                                 | 404 |
| 20.6 Vitamins in biotechnology                                 | 404 |
| 20.7 Bioengineered lipids                                      | 407 |
| 20.7.1 Solid lipid nanoparticles                               | 407 |
| 20.7.2 Single-cell oil   | 408 |
| 20.8 Hormones bioactivity                                      | 408 |
| 20.9 Applications of flavonoids and alkaloids in biotechnology | 408 |
| 20.10 Conclusions and future perspectives                      | 409 |
| References   | 409 |

## 21. Current applications of biomolecules in biomedical engineering

*Micaela Ferrante, Vera Alejandra Alvarez, and Jimena Soledad Gonzalez*

|   |     |
|---|-----|
| 21.1 Introduction                                 | 419 |
| 21.2 Biomedical engineering biopolymers           | 420 |
| 21.2.1 Collagen and gelatin                       | 421 |
| 21.2.2 Pectin                                     | 421 |
| 21.2.3 Chitosan                                   | 421 |
| 21.2.4 Chondroitin sulfate                        | 422 |
| 21.2.5 Cellulose                                  | 422 |
| 21.2.6 Sodium alginate                            | 422 |
| 21.2.7 Others biomolecules                        | 422 |
| 21.2.8 Scaffolds                                  | 422 |
| 21.2.9 Hydrogels                                  | 423 |
| 21.3 Wound healing                                | 423 |
| 21.3.1 Origin of wounds                           | 423 |
| 21.3.2 Biomedical engineering in wounds           | 423 |
| 21.3.3 Epithelial wounds                          | 423 |
| 21.3.4 Artificial skin grafts                     | 425 |
| 21.4 Tissue engineering and regenerative medicine | 426 |
| 21.4.1 Odontology                                 | 426 |
| 21.4.2 Bone and cartilage tissue                  | 427 |
| 21.4.3 Ophthalmology                              | 429 |
| 21.4.4 Tympanic membrane                          | 430 |
| 21.4.5 Cardiac tissue                             | 430 |
| 21.4.6 Vascular tissue                            | 431 |
| 21.4.7 Nervous tissue                             | 431 |
| 21.5 Conclusions                                  | 432 |
| References  | 432 |

## 22. Current applications of biomolecules in biopharmaceuticals and drug discovery

*Ali Rastegari, Homa Faghihi, and Zohreh Mohammadi*

|         |  |     |
|---------|--|-----|
| 22.1    | Introduction   | 440 |
