TABLE OF CONTENTS

<i>List of Contributors</i>	<i>xiii</i>
<i>List of Abbreviations</i>	<i>xv</i>
<i>Preface</i>	<i>xvii</i>
Chapter 1 Groundwork	1
1.1 An Ancient Trend	2
1.2 Pre And Post-Vaccination.....	3
1.3 Vaccines: The Processes and Costs	5
1.4 Impact	21
1.5 References.....	22
Chapter 2 Vaccines in Pandemics	23
2.1 Covid-19 and Routine Immunization	24
2.2 The Phases: Regular Vs. Pandemic.....	28
2.3 An Example of Modeling.....	29
2.4 Case Study of Covid-19: Platforms and Ethics	31
2.5 References.....	35
Chapter 3 Vaccine Platforms: Old and New	37
3.1 Platforms	38
3.2 Nucleic Acid Vaccine Research in Pandemics	40
3.3 Augmenting The Efficacy	44
3.4 Vaccine Platforms: A Case Study of Covid-19.....	46
3.5 Adjuvants for Vaccines	48
3.6 Final Points.....	50
3.7 References.....	51

Chapter 4	Vaccines for Neglected Tropical Diseases.....	53
	4.1 Background	54
	4.2 Research Scenario	58
	4.3 References	67
Chapter 5	Vaccination Against Tuberculosis: Revamping BCG by Molecular Genetics Guided by Immunology.....	69
	Abstract	69
	Introduction.....	70
	Immunopathology of Tuberculosis	71
	Current Status of Tuberculosis Epidemiology and the Tuberculosis Vaccine Pipeline	74
	Prevention of Disease By the Subunit Vaccine M72 in a Phase Iib Clinical Trial.....	77
	Promising Prevention of Disease Data in Non-Human Primates (NHP) By a Viral Vectored Tuberculosis Vaccine Candidate.....	78
	Recent Findings With the Canonical Bacille Calmette-Guérin Vaccine.....	79
	How Does the Intracellular Behavior Differ Between VPM1002, Bacille Calmette-Guérin, and <i>Mtb</i> ?	81
	Learning from Individuals Resistant to Stable <i>Mtb</i> Infection and Those Capable of Eradicating <i>Mtb</i> After Stable Infection.....	85
	Outlook and Future	87
	Author Contributions	89
	Acknowledgments	89
	References	90
Chapter 6	From Bench to Field: A Guide to Formulating and Evaluating Anti-Tick Vaccines Delving beyond Efficacy to Effectiveness	105
	Abstract	105
	Introduction.....	106
	The Basic Immunological Principle of Anti-Tick Vaccination	110
	Determination of Anti-Tick Vaccine Efficacy.....	111
	Bottlenecks to Determining Anti-Tick Vaccine Efficacy	112
	Approach of Assessing Vaccine Efficacy	120
	Approach to Assessing Vaccine Effectiveness.....	129
	A Pipeline/Map for Development of Anti-Tick Vaccines	137
	Concluding Remarks.....	140

	Acknowledgments	141
	References	142
Chapter 7	Major Scientific Hurdles in HIV Vaccine Development: Historical Perspective and Future Directions.....	157
	Abstract	157
	Introduction.....	158
	Challenges in HIV Vaccine Development.....	158
	The Development of Early HIV Vaccines.....	160
	HIV Vaccines Based on the Induction of Neutralizing Antibodies.....	161
	Vaccines Designed To Stimulate T Cell Immunity to HIV.....	166
	A Vaccine Against HIV-1 Is Possible	168
	Current Status of The HIV Vaccine Field.....	173
	Current HIV Vaccine Efficacy Trials	176
	New HIV Vaccine Concepts and Technologies.....	179
	Concluding Remarks.....	183
	Author Contributions	183
	Acknowledgments	183
	References	184
Chapter 8	Using Adjuvants to Drive T Cell Responses for Next-Generation Infectious Disease Vaccines.....	203
	Abstract	203
	Introduction.....	204
	Induction of Cytotoxic Cd8+ T Cell Responses by Adjuvants.....	205
	Induction of T Follicular Helper Cell Responses by Adjuvants	212
	Future Directions	223
	Author Contributions	224
	References	225
Chapter 9	From COVID-19 to Cancer mRNA Vaccines: Moving From Bench to Clinic in the Vaccine Landscape.....	241
	Abstract	241
	Introduction.....	242
	<i>In Vitro</i> Synthesis of mRna and Engineering Sequences for mRNA Vaccine Development.....	245
	Different Delivery System for mRNA Vaccine.....	249

	Dendritic Cells: A Potential Target for Delivery of mRNA Vaccines.....	253
	Recent Clinical Trial Landscape MRNA Vaccines	256
	Current Updates on mRNA Vaccine in Light of Covid-19 Vaccine and Vaccination	266
	Antigen Activation After mRNA Vaccination: A View in Covid-19 mRNA Vaccination Scenario	266
	Challenges and Future Prospects.....	268
	Author Contributions	268
	References	269
Chapter 10	Vaccine Design and Vaccination Strategies against Rickettsiae.....	283
	Abstract	283
	Introduction.....	284
	Adaptive Immunity is Essential for Defense Against Rickettsial Infections	290
	Immunopathology In Rickettsial Infections.....	293
	Vaccination Against Rickettsiae with Whole-Cell Antigen (WCA).....	295
	Immunogenic Determinants and Vaccine Candidates.....	298
	Experimental Approaches of Vaccination Against Rickettsiae.....	301
	Conclusions.....	310
	Acknowledgments	310
	References	311
Chapter 11	Can Digital Tools Be Used for Improving Immunization Programs	331
	Abstract	331
	Introduction.....	332
	Comments and Discussion.....	341
	Author Contributions	344
	References	345
	Index	357
