

Dead Reckoning

Air Traffic Control, System Effects, and Risk

Diane Vaughan

The University of Chicago Press
Chicago and London

Contents

	<i>List of Figures and Tables</i>	<i>xi</i>
PART I	Beginnings	1
1	Dead Reckoning	3
	Why Air Traffic Control?	
	Introduction to the System: “A Monkey Could Do This Job”	
	System Effects on the Project	
	On Time and Discovery: Historical Ethnography and Socio-technical System History	
	The Architecture of This Book	
2	History as Cause: System Emergence, System Effects	41
	A Formation Story	
	Precedent and Innovation: Boundaries and Boundary Work	
	The Age of Innovators: The Diffusion of Ideas, Networks, and Infrastructure Formation, 1880–1920	
	The Age of Organization: Controllers, Technologies, and Boundaries, Ground and Sky, 1920–1950	
	The Jet Age: Congestion, Technological Lag, and PATCO, 1950–1980	
	The Age of Conflict, Decline, and Repair: The Strike, NATCA, and Technological Glitches, 1980–2000	
	Dead Reckoning at the Turn of the Century: History, Boundaries, and Turf Wars in the Sky, 2000–2001	

PART II	Producing Controllers	<i>117</i>
	3 From Skill Acquisition to Expertise	<i>129</i>
	The Academy: The Screen, the Game, and Survival of the Fittest	
	The Facility: The Apprentice and the Trainer	
	The Subtleties of the Craft: Dead Reckoning	
	4 Embodiment: The Social Shaping of Controllers	<i>162</i>
	Carryover into Everyday Life	
	Fundamental Change: Becoming a Type A Personality	
	A Cultural System of Knowledge: Expertise, Embodiment, and Ethnocognition	
PART III	Boundary Work: Airspace, Place, and Dead Reckoning	<i>183</i>
	System Effects: Culture, Ethnocognition, and Distributed Cognition	
	5 Boston Center and Bedford Tower	<i>193</i>
	Boston Center	
	Bedford Tower	
	6 The Terminal: Boston TRACON and Boston Tower	<i>250</i>
	The TRACON: Boston Terminal Radar Approach Control	
	Boston Tower	
	The Terminal: Boston TRACON and Tower	
PART IV	Emotional Labor, Emotion Work	<i>307</i>
	7 Mistake and Error: Emotional Labor	<i>319</i>
	Close Calls	
	Having a Deal	
	Space, Place, and Boundaries: When Is a Deal Not a Deal?	
	Mistake and Error as System Effects: Crossing Boundaries of Time and Social Space	

8	Risk and Stress: Emotion Work	356
	Losing Control: Stress-Producing Conditions	
	The Social and Cultural Transformation of Risky Work	
	Culture, Cognition, and the Normalization of Risk and Stress	
	The Individual, the Group, and Cultural Devices	
PART V	“That Little Frisson of Terror”	395
9	September 11	401
	Boston Center	
	The Command Center	
	Boston Center	
	The TRACON	
	Boston Tower	
	Bedford Tower	
	The Attacks: System Response and System Effects	
10	The War on Terror: Policing the Sky	444
	Changing Boundaries: Restrictions, Translation, and Local Coordination	
	Police Work, Emotion Work	
	A Fragile Stability: 2002	
	The War on Terror: System Response and System Effects	
11	Symbolic Boundaries: Distinction, Occupational Community, and Moral Work	473
	Formal Structure and Occupational Community	
	Status and Moral Work	
	Maintaining Moral Boundaries	
PART VI	System Effects, Boundary Work, and Risk	493
	Boundary Work as Power Work	
	The Intersection of Two Trajectories: Implementation, Budget Battles, Shutdowns, and Failures	
	The Liabilities of Technological and Organizational Innovation	

12	The Age of Automation: 2002-Present	509
	Boston Tower and Boston TRACON	
	Boston Tower	
	Boston TRACON	
13	Continuities, Change, and Persistence	552
	System Effects, Resilience, and Agency	
	Dead Reckoning: Coordinating Action and Anticipating Futures in Complex Organizational Systems	
	<i>Acknowledgments</i>	575
	<i>Notes</i>	579
	<i>Bibliography</i>	617
	<i>Index</i>	635

Figures and Tables

Figures

- Figure 1. The Wright brothers' first flight on December 17, 1903, at Kitty Hawk, North Carolina 1
- Figure 2. Archie League, first air traffic controller, with signal flags and wheelbarrow, Lambert Municipal Field, St. Louis, Missouri, 1929 1

Early Devices for Dead Reckoning (Figures 3-10)

- Figure 3. Beacon, steel tower, shed, and concrete directional arrow, beginning Transcontinental Air Mail Route, 1925 74
- Figure 4. Archie League with signaling light, Lambert Municipal Field, St. Louis, Missouri, 1933 74
- Figure 5. Air traffic controller in radio-equipped tower connecting to airline dispatchers, Newark, New Jersey, 1936 75
- Figure 6. Controllers using blackboards, maps, and phones to airline dispatchers to sequence en route traffic between airports, Newark Airway Traffic Control Station, 1936 75
- Figure 7. Sequencing en route traffic with compasses and moving "shrimp boats" on table maps, Newark Airway Traffic Control Station, 1936 74
- Figure 8. Women controllers, who replaced men during the war, sequencing en route traffic with flight progress strips, replacing blackboards, early 1940s 74
- Figure 9. Radar arriving and controller following blips on upright screen, Washington Air Route Traffic Control Center, 1948 75
- Figure 10. Controllers using flight progress strips to sequence en route traffic and move shrimp boats on flat radar, Washington Air Route Traffic Control Center, 1955 75

- Figure 11. Flight progress strip 134
- Figure 12. Facility architectural layouts, 2000 185
- Figure 13. Boston Center architectural layout, control room, 1990 201
- Figure 14. Boston Center architectural layout, control room, 2000 203
- Figure 15. Flight progress strip with controller markings 211
- Figure 16. Bedford Tower architectural layout with positions, 2000 227
- Figure 17. Bedford Tower pad management system 230
- Figure 18. Bedford Tower airport diagram 234
- Figure 19. Boston Tower airport diagram 252
- Figure 20. Dallas–Fort Worth airport diagram 253
- Figure 21. Boston TRACON architectural layout with positions, 2000 259
- Figure 22. Boston Tower architectural layout with positions, 2000 281
- Figure 23. Arrival-departure window/Converging Runway
Display Aid 513
- Figure 24. Boston TRACON control room, Merrimack, New Hampshire,
2004 537
- Figure 25. Boston TRACON control room architectural layout, Merrimack,
New Hampshire, 2004 539
- Figure 26. Boston TRACON control room inner circle redesign, Merrimack,
New Hampshire, 2017 540

Tables

- Table 1. Responses of air traffic controllers to whether the job has funda-
mentally changed them “as a person” 171
- Table 2. Extent of the fundamental change experienced by air traffic
controllers 171
