Contents

Preface.....xv

Authorxix

Chapter 1 Introduction to Soil Physics..... 1

1.1 Importance of Soil Physics2

1.2 Interactions of Soil Physics with Other Disciplines4

1.3 Soil Physics, Soil and Environmental Quality, and
Quality of Life5

1.4 Soil Physics and Climate Change.....9

1.5 Soil Physics Curriculum 11

Problems..... 11

References 12

Chapter 2 Units and Dimensions 15

2.1 Introduction 15

2.2 Definitions of Unit and Dimension..... 15

2.3 Systems of Units 16

2.4 Nondimensional Quantities 18

2.5 Deriving Units of Physical Quantities 18

2.6 Use of Units and Dimensions 19

2.7 Unit Conversions 20

Problems..... 21

References 21

Chapter 3 Characteristics of Soils of the Vadose Zone 23

3.1 Introduction 23

3.2 Soil Formation..... 23

3.3 Soil Profile 25

3.4 Soil Texture..... 27

3.5 Soil Separates 28

3.6 Methods for Particle Size Measurement..... 30

3.7 Particle Shapes..... 32

3.8 Properties of Clay Particles 34

3.9 Physical Properties of Soil..... 36

3.9.1 Soil Color..... 36

3.9.2 Soil Particle Density 38

3.9.3 Soil Bulk Density 39

3.9.4 Soil Porosity 41

3.9.5	Soil Water Content	42
3.10	Soil Structure	44
3.10.1	Types of Soil Structure	45
3.10.2	Properties of Soil Aggregates	46
	Problems	52
	References	52
Chapter 4	Sampling Concepts and Designs	55
4.1	Introduction	55
4.2	Representative Elementary Volume	55
4.3	Sample Size	58
4.4	Sampling Designs	60
4.4.1	Simple Random Sampling	61
4.4.2	Systematic Sampling	63
4.4.3	Stratified Sampling	63
4.4.4	Cluster Sampling	64
4.4.5	Composite Sampling	64
4.5	Practical Aspects of Soil Sampling	64
	Problems	66
	References	67
Chapter 5	Spatial Variability of Vadose Zone Properties	69
5.1	Introduction	69
5.2	Sources of Variability	69
5.3	Scale of Variability	70
5.4	Statistical Evaluations	71
5.5	Influence of Sample Support	76
5.6	Influence of Measurement Device	77
5.7	Influence of Land Use	78
5.8	Statistical Analysis	79
5.9	Geostatistical Analysis	80
5.10	Semivariogram Functions	83
	Problems	85
	References	86
Chapter 6	Fundamentals of Hydrology	89
6.1	Introduction	89
6.2	Hydrologic Cycle	89
6.3	Components of the Hydrologic Cycle	91
6.3.1	Evaporation and Transpiration	91
6.3.2	Advection	91
6.3.3	Condensation	91
6.3.4	Precipitation	91

6.3.5	Canopy Interception	92
6.3.6	Infiltration.....	92
6.3.7	Percolation.....	92
6.3.8	Surface Runoff	92
6.3.9	Soil Water.....	92
6.4	Water Balance.....	93
6.4.1	Surface Water Balance	94
6.4.2	Root Zone Water Balance	94
6.4.3	Transition Water Balance	94
6.4.4	Aquifer Water Balance	95
6.5	Rainfall-Runoff Relationships.....	96
	Problems.....	97
	References	97
Chapter 7	Properties of Water.....	99
7.1	Introduction	99
7.2	Properties of Water.....	99
7.2.1	Polarity	100
7.2.2	Freezing Point and Boiling Point	101
7.2.3	Density of Water.....	102
7.2.4	Viscosity	103
7.2.5	Specific Heat Capacity	103
7.2.6	Bulk Modulus	104
7.2.7	Electrical Conductivity.....	105
7.2.8	Wetting and Nonwetting.....	105
7.3	Forces on Water Molecules	105
7.4	Contact Angle.....	107
7.5	Capillarity.....	109
7.6	Empirical Approach	112
7.7	Importance of Capillarity.....	113
	Problems.....	114
	References	115
Chapter 8	Water in the Vadose Zone	117
8.1	Introduction	117
8.2	Soil Water Content.....	117
8.3	Soil Water Content Measurement Methods.....	118
8.4	Direct Methods.....	120
8.4.1	Gravimetric Method Using Oven-Drying	120
8.4.2	Gravimetric Method Using Microwave Oven	121
8.4.3	Thermogravimetric Method	121
8.5	Indirect Methods	121
8.5.1	Radiation Techniques	121
8.5.1.1	Neutron Probe.....	121

8.5.1.2	Gamma Ray Attenuation	123
8.5.1.3	Nuclear Magnetic Resonance	124
8.5.2	Dielectric Properties.....	124
8.5.2.1	Time Domain Reflectometry	125
8.5.2.2	Frequency Domain Reflectometry	125
8.5.2.3	Amplitude Domain Reflectometry	126
8.5.2.4	Time Domain Transmission	126
8.5.3	Remote Sensing Technique	126
8.5.3.1	Microwave Remote Sensing	126
8.5.3.2	Ground-Penetrating Radar.....	127
8.5.3.3	GPS Technique	127
8.5.4	Heat Dissipation Method.....	128
8.5.5	Machine Learning Approaches.....	129
8.6	Energy State of Soil Water	130
8.7	Definitions and Components of Soil Water Potential.....	131
8.7.1	Total Soil Water Potential	131
8.7.2	Pressure Potential.....	133
8.7.3	Matric Potential.....	133
8.7.4	Gravitational Potential.....	134
8.7.5	Osmotic Potential.....	134
8.7.6	Overburden Potential.....	135
8.8	Soil Water Potential Measurement Devices	136
8.8.1	Piezometer.....	136
8.8.2	Tensiometer	136
8.8.3	Dewpoint Potentiameter.....	140
8.8.4	Resistance Blocks.....	140
8.8.5	Heat Dissipation Sensors.....	141
8.8.6	Filter-Paper Technique	141
8.9	Total Soil Water Potential under Different Conditions	142
8.10	Soil Water Retention Curve.....	144
8.11	Soil Water Retention Models.....	148
8.12	Hysteresis Phenomenon.....	149
	Problems.....	153
	References	154
Chapter 9	Flow through the Vadose Zone	157
9.1	Introduction	157
9.2	Laws Governing Flow through Saturated Porous Media	157
9.2.1	Darcy's Law.....	157
9.2.2	Continuity Equation	161
9.2.3	Laplace Equation.....	161
9.2.4	Hagen–Poiseuille Equation	162
9.3	Saturated Hydraulic Conductivity	162
9.3.1	Laboratory Methods.....	162
9.3.1.1	Constant Head Method	164

9.3.1.2	Falling Head Method	165
9.3.2	Field Methods	166
9.3.2.1	Auger Hole Method	167
9.3.2.2	Ring Infiltrometer Method.....	168
9.3.2.3	Guelph Permeameter	168
9.3.3	Empirical Methods	169
9.4	Permeability.....	170
9.5	Laws Governing Flow through Unsaturated Porous Media..	171
9.5.1	Darcy–Buckingham Equation	171
9.5.2	Continuity Equation	173
9.5.3	Richards Equation for Transient Flow	174
9.6	Unsaturated Hydraulic Conductivity Measurement	176
9.6.1	Laboratory Technique	177
9.6.2	Field Method	177
9.6.3	Empirical Approach	178
9.7	Soil Water Diffusivity Measurement.....	181
9.8	Flow through Layered System.....	181
9.9	Models for Simulating Flow through Soil System	182
	Problems.....	183
	References	183
Chapter 10	Water Infiltration into the Vadose Zone	187
10.1	Introduction	187
10.2	Process of Infiltration	187
10.3	Measurement of Infiltration.....	189
10.4	Factors Affecting Infiltration Rate	192
10.5	Infiltration Models.....	194
10.5.1	Green and Ampt Equation.....	195
10.5.2	Philip Equation.....	197
10.5.3	Kutilek and Krejca Equation.....	199
10.5.4	Swartzendruber Equation.....	199
10.5.5	Kostiakov Equation	200
10.5.6	Horton Equation	202
10.5.7	Holtan Equation.....	203
10.5.8	Smith–Parlange Equation.....	205
10.6	Water Redistribution.....	206
	Problems.....	207
	References	208
Chapter 11	Energy Flow through the Vadose Zone.....	211
11.1	Introduction	211
11.2	Energy Balance of Soil	211
11.3	Factors Affecting Energy Balance	213
11.4	Heat Flow Processes.....	215

11.4.1	Radiation	216
11.4.2	Conduction	217
11.4.3	Convection.....	219
11.5	Heat Flux through Soil	221
11.6	Heat Conservation Equation.....	221
11.7	Measurement of Thermal Properties.....	222
11.8	Soil Temperature	226
11.9	Effects of Soil Temperature.....	227
11.10	Soil Temperature Variations.....	227
11.11	Mathematical Representation	229
11.12	Management of Soil Temperature	232
	Problems.....	232
	References	233
Chapter 12	Evaporation from Soil	235
12.1	Introduction	235
12.2	Evaporation from Different Waterbodies	235
12.3	Evaporation Processes	236
12.4	Stages of Evaporation	237
12.5	Steady-State Evaporation.....	238
12.6	Transient-State Evaporation.....	239
12.7	Soil Water Redistribution during Evaporation	242
12.8	Vapor Flow through Soil	243
12.9	Control of Evaporation	245
12.10	Transpiration.....	245
12.11	Measurement of Evapotranspiration.....	246
12.11.1	Soil Water Depletion.....	246
12.11.2	Lysimeters.....	247
12.11.3	Evaporimeters	248
12.11.4	Micrometeorology and Climatology Data.....	249
	Problems.....	251
	References	251
Chapter 13	Root Water Uptake	253
13.1	Introduction	253
13.2	Root Water Uptake Models	253
13.2.1	Plant Root Structure	254
13.3	Microscopic Root Water Uptake Models	257
13.3.1	Gardner Model	257
13.3.2	Taylor and Klepper Model.....	259
13.4	Macroscopic Type I Root Water Uptake Models	260
13.4.1	Gardner Model	260
13.4.2	Nimah and Hanks Model	262
13.4.3	Hillel Model	264

13.5	Macroscopic Type II Root Water Uptake Models	266
13.5.1	Molz and Remson Model	266
13.5.2	Feddes Model	268
13.5.3	van Genuchten Model.....	271
13.5.4	Prasad Model.....	273
13.5.5	Ojha and Rai Model	274
13.5.6	Li et al. Model	276
13.5.7	Kang et al. Model	278
13.5.8	Vrugt et al. Model	280
13.5.9	Models Incorporating Soil Salinity	281
	Problems.....	283
	References	283
Chapter 14	Airflow through the Vadose Zone	287
14.1	Introduction	287
14.2	Soil Gas Content.....	287
14.3	Factors Affecting Soil Air Composition	288
14.4	Airflow through Soil.....	289
14.5	Airflow Mechanisms through Soil	289
14.6	Air-Filled Porosity Measurement through Soil	292
14.7	Air Permeability	293
	Problems.....	295
	References	295
Chapter 15	Chemical Transport through the Vadose Zone	297
15.1	Introduction	297
15.2	Types of Solutes.....	298
15.3	Related Terminology	298
15.4	Pore Water Velocity	299
15.5	Solute Conservation Equation	299
15.6	Solute Transport Processes.....	300
15.7	Fick's Law.....	302
15.8	Solute Movement	303
15.9	Solute Breakthrough Curve	303
15.10	Interpretations from Breakthrough Curves	307
15.11	Equilibrium Convective Dispersion Equation.....	311
15.12	Solute Transport Equation under Physical Nonequilibrium.....	315
15.13	Solute Transport Equation under Chemical Nonequilibrium	318
15.14	Effect of Pore Water Velocity on Solute Transport Parameters	319
15.15	Parameter Estimation	320
15.15.1	From Batch Experiment.....	320
15.15.2	From Breakthrough Curves	322
15.15.3	From Fitting Solute Transport Equations	324

15.15.4	Nonequilibrium Parameters.....	325
15.15.5	Other Methods	326
15.16	Transport of Reactive Solutes.....	327
	Problems.....	328
	References	328
Chapter 16	Modeling Flow through the Vadose Zone Using the HYDRUS-1D Model	333
16.1	Introduction	333
16.2	Installation of HYDRUS-1D	334
16.3	HYDRUS-1D Tutorial	334
16.3.1	HYDRUS-1D Interface	335
16.3.2	Create a New HYDRUS-1D Project.....	337
16.3.3	Working with the HYDRUS-1D Pre-Processing Unit.....	338
16.3.3.1	Main Processes (Pre-Processing Main Processes).....	338
16.3.3.2	Geometry Information (Pre- Processing Geometry Information).....	339
16.3.3.3	Time Information (Pre-Processing Time Information).....	341
16.3.3.4	Print Information (Pre-Processing Print Information).....	342
16.3.3.5	Iteration Criteria (Pre-Processing Water Flow Iteration Criteria)	344
16.3.3.6	Soil Hydraulic Model (Pre- Processing Water Flow Hydraulic Properties Model).....	344
16.3.3.7	Water Flow Parameters (Pre- Processing Water Flow Water Flow Parameters).....	346
16.3.3.8	Water Flow Boundary Conditions (Pre-Processing Water Flow Boundary Conditions)	347
16.3.3.9	Heat Transport Parameters (Pre- Processing Heat Transport Heat Transport Parameters)	348
16.3.3.10	Heat Transport Boundary (Pre- Processing Heat Transport Heat Transport Boundary Conditions).....	349
16.3.3.11	Time Variable Boundary Conditions (Pre-Processing Variable Boundary Conditions)	350
16.3.3.12	Meteorological Parameters (Pre- Processing Meteorological Parameters) ...	352

16.3.3.13	Meteorological Conditions (Pre-Processing Meteorological Boundary Conditions)	354
16.3.3.14	Soil Profile: Graphical Editor (Pre-Processing Profile Information).....	355
16.3.3.15	Soil Profile Summary (Preprocessing Profile Summary)	365
16.3.4	Working with the HYDRUS-1D Post-Processing Unit.....	366
16.3.4.1	Output Files	366
16.3.4.2	Results Menu and On-Screen Graphics.....	369
Problems		383
References		383

Chapter 17 Flow through the Vadose Zone Using RZWQM 385

17.1	Introduction	385
17.2	Installation of the RZWQM2 Model.....	386
17.3	RZWQM2 Tutorial	386
17.3.1	Description of the RZWQM2 Workspace.....	387
17.3.1.1	Project Menu.....	388
17.3.1.2	Scenario Menu.....	388
17.4	Working with the RZWQM2 Project	390
17.4.1	Create a New Project and Scenario for the Tutorial Project.....	390
17.4.2	Create/Edit Daily Meteorology File for the Tutorial Project.....	391
17.4.3	Create/Edit Breakpoint Rainfall File for the Tutorial Project.....	394
17.5	Working with the RZWQM2 Scenario	400
17.5.1	Define the System/Input Menu.....	400
17.5.1.1	Site Description	404
17.5.1.2	Initialize State/Initial Conditions of the Soil Profile	413
17.5.1.3	Initialize the State of the Soil Residue	415
17.5.1.4	Define Agricultural Management Practices.....	416
17.5.1.5	Define PRMS Snow Parameters.....	424
17.5.1.6	Define Experimental Data Observations ..	426
17.5.2	Simulation Controls.....	426
17.5.2.1	Output Variable Selection.....	426
17.5.2.2	Debugging Flags.....	426
17.5.2.3	Simulation Iteration Control	427
17.5.2.4	Misc. Output Items	427
17.5.3	Modifiers	428
17.5.4	Run the Scenario	429

17.5.5 Scenario Output.....	431
17.5.5.1 View Scenario Output Files.....	431
17.5.5.2 Plot Model Outputs.....	432
17.6 Scenario Comparisons.....	432
Problems.....	437
References.....	437
 Chapter 18 Special Topics: Soil Erosion, Contaminant Remediation, and Salt Removal	439
18.1 Introduction	439
18.2 Soil Erosion	439
18.3 Cost to Society.....	440
18.4 Physical and Chemical Processes of Erosion	441
18.5 Coastal Erosion.....	441
18.6 Types of Erosion	442
18.6.1 Water Erosion	442
18.6.2 Wind Erosion.....	442
18.7 Effects of Vegetation on Wind Erosion	443
18.8 Erosion Control.....	443
18.9 Major Factors Affecting Erosion	443
18.10 Erosion Modeling	444
18.10.1 Universal Soil Loss Equation (USLE)	444
18.10.2 Revised Soil Loss Equation, Version 2 (RUSLE2)....	445
18.10.3 Watershed Erosion Prediction Project (WEPP).....	446
18.10.4 Soil and Water Assessment Tool (SWAT)	446
18.10.5 Wind Erosion Model.....	446
18.11 Erosion and Contamination.....	446
18.12 Contaminants and Remediation	447
18.13 Soilborne Contaminants.....	447
18.14 Contaminant Remediation.....	448
18.14.1 Physical and Chemical Remediation	448
18.14.2 Bioremediation.....	451
18.15 Inorganic Waste Disposal.....	453
18.16 Land Farming	453
18.17 Planning a Disposal Site.....	453
18.18 Soil Salinity and Sodicity	454
18.19 Environmental Consequences and Causes	455
18.20 Salt Effects on Plants.....	456
18.21 Remediation and Reclamation of Saline Soils	457
18.22 Leaching Requirement	457
Problems.....	459
References	460
 Index.....	461
