PART I APPROACHES AND METHODS	1		
1			
The History and Emergence of Ecotoxicology as a Science	3		
<i>Pamela M. Welbourn and Peter V. Hodson</i>			
Learning Objectives	3		
1.1 The Science of Ecotoxicology	3		
1.2 Historical Landmarks in the Development of Ecotoxicology	7		
1.2.1 <i>Silent Spring</i> and Pesticides	7		
1.2.2 Mercury	10		
1.2.3 Acidification	10		
1.2.4 Industrial Waste Disposal and Brownfields	11		
1.2.5 Oil Spills	12		
1.2.6 <i>Our Stolen Future</i> and Endocrine Disruptors	12		
1.3 The Emergence of the Science of Ecotoxicology	13		
1.4 The Turning Point and Formal Regulation of Toxic Substances	15		
1.5 Solutions That May Lead to New Problems	16		
1.6 Conclusions	17		
Summary	18		
Review Questions and Exercises	18		
Abbreviations	19		
References	19		
2			
Measuring Toxicity	23		
<i>Peter V. Hodson and David A. Wright</i>			
Learning Objectives	23		
2.1 The Basics of Environmental Toxicology	23		
2.1.1 Concepts and Definitions	24		
2.1.1.1 What Is Toxicity?	24		
2.1.1.2 Chemical Structure vs Toxicity	24		
2.1.1.3 Nutrients vs Toxicants	25		
2.1.1.4 Expressions of Toxicity	26		
2.2 Designing a Toxicity Test: What Is the Question?	28		
2.2.1 Test Organisms	29		
2.2.1.1 Laboratory Cultures of Test Organisms	30		
2.2.1.2 Life Stages Tested and Responses Measured	31		
2.2.2 Test Media and Routes of Exposure	32		
2.2.3 Exposure Gradients	33		
2.2.4 Exposure Time	33		
2.2.5 Control Treatments	36		
2.2.6 Other Test Conditions That Affect Measured Toxicity	36		
2.2.7 Characterizing Test Conditions and Chemical Exposures	38		
2.2.8 Complexities in Toxicity Testing	39		
2.2.8.1 Toxicity Tests for Sparingly Soluble Compounds	39		
2.2.8.2 Sediment and Soil Toxicity Tests	39		
2.2.8.3 Standard vs 'Realistic' Toxicity Tests	41		
2.2.8.4 Surrogate Species for Routine Testing	41		
2.3 Statistics for Toxicity Tests	42		
2.3.1 Regression Analyses for Computing Toxicity	42		
2.3.1.1 Data Types and Transformations	43		
2.3.1.2 Control Data	44		
2.3.2 Hypothesis Testing: Multiple Regression Analyses	44		
2.3.3 Predictive Toxicology: Single Compounds	45		
2.3.3.1 Acute to Chronic Ratios (ACRs)	46		
2.3.3.2 Species Sensitivity Distributions (SSDs)	47		
2.3.3.3 Quantitative Structure–Activity Relationships (QSARs)	47		
2.3.4 Predictive Toxicology: Mixtures	48		
2.3.4.1 Toxic Unit (TU) Model	48		
2.3.4.2 Toxic Equivalent Factor (TEF) Model	49		
2.3.4.3 Target Lipid Model	49		
2.3.4.4 Metal Mixtures	50		
2.3.4.5 Dissecting Complex Mixtures	51		
2.3.5 Moving Away from Traditional Toxicity Tests	52		
Summary	54		
Review Questions and Exercises	54		
Abbreviations	55		
References	56		

3		
Contaminant Uptake and Bioaccumulation: Mechanisms, Kinetics and Modelling	61	
<i>Peter G. C. Campbell, Peter V. Hodson, Pamela M. Welbourn and David A. Wright</i>		
Learning Objectives	61	
3.1 General Considerations	61	
3.1.1 Composition and Structure of Biological Membranes	62	
3.1.2 Transport of Solutes Across Cell Membranes	64	
3.1.2.1 Diffusion Through the Lipid Bilayer	65	
3.1.2.2 Diffusion Through Membrane Pores and Channels	65	
3.1.2.3 Carrier-mediated Transport	69	
3.1.3 Endocytosis	71	
3.1.4 Transcellular Transport (e.g., Gill; Intestine; Lung)	71	
3.1.5 Ecotoxicological Perspective on Transmembrane Transport Processes	72	
3.2 Uptake Routes	73	
3.2.1 Skin	73	
3.2.2 Lungs	73	
3.2.3 Gills	74	
3.2.4 Digestive System	75	
3.2.5 Olfactory System	76	
3.2.6 Plant Foliage and Roots	76	
3.2.7 Boundary Layers	78	
3.2.8 Uptake by Endocytosis	78	
3.2.9 How Different Exposure Routes Affect the Rates of Toxicant Uptake	79	
3.3 Elimination Routes	79	
3.4 Bioaccumulation and Uptake–Elimination Kinetics	79	
3.4.1 Toxicant Uptake: Differences Between Lipophilic and Hydrophilic Molecules	81	
3.4.2 Toxicokinetics	83	
3.4.2.1 One-compartment Model	83	
3.4.2.2 Two-compartment Model	84	
3.5 Biotransformations	85	
3.5.1 Metals	85	
3.5.2 Organic Xenobiotics	86	
3.6 Bioaccumulation and Biomagnification	87	
3.6.1 Metals	87	
3.6.2 Bioaccumulation of Persistent Organic Contaminants	88	
3.6.2.1 Lipophilic Contaminants	88	
3.6.2.2 Interplay Between Bioenergetics and Bioaccumulation of Lipophilic Contaminants	90	
3.6.2.3 Proteinophilic Contaminants	91	
Summary	91	
Review Questions and Exercises	92	
Abbreviations	93

Methods in Ecotoxicology		99
<i>Peter V. Hodson and David W. Wright</i>		
Learning Objectives		99
4.1 Moving Beyond Environmental Toxicology		99
4.2 Laboratory Versus Field Studies of Ecotoxicology: Strengths and Weaknesses		100
4.3 Surveys, Monitoring and Assessment		102
4.3.1 Relating Cause and Effect by Surveys and Monitoring		102
Case Study 4.1 Upstream–Downstream Studies to Assess Whether Pulp-mill Effluents Affect the Sexual Maturation of Fish		104
4.3.2 Ecoepidemiology: Assessing the Strength of Proposed Cause–Effect Relationships		105
Case Study 4.2 The Ecoepidemiological Case for Cancer in Fish Caused by Sediment Polycyclic Aromatic Compounds (PACs)		107
4.3.3 Markers and Indicators of Chemical Exposure and Effects		107
4.3.3.1 Chemical Markers		108
4.3.3.2 Biomarkers		108
4.3.3.3 Bioindicators		109
4.3.3.4 The Sediment Quality Triad		111
4.3.3.5 Summary: Markers and Indicators		112
4.3.4 Palaeo-ecotoxicology: Retrospective Assessment of Contamination and Toxicity		112
Case Study 4.3 Evidence from Palaeo-ecotoxicology for a Chemical Cause of Reproductive Failure of Lake Trout (<i>Salvelinus namaycush</i>) in Lake Ontario		114
4.3.5 Monitoring the Human Food Supply		115
4.4 Field Experiments		117
4.4.1 In Situ Toxicity Tests		117
4.4.2 Experimental Plots		118
Case Study 4.4 The Effectiveness of Fertilizers in Promoting Degradation of Crude Oil Spilled on a Vegetated Wetland		118
4.4.3 Experimental Ecosystems		119
Case Study 4.5 Whole-lake Experiment with an Endocrine Disruptor		122
4.5 Modelling Environmental Fate, Behaviour, Distribution and Effects of Chemicals		122
4.5.1 Chemical Fate Modelling		123
4.5.2 Bioaccumulation and Effects Modelling		126
Case Study 4.6 PCB Contamination of the Southern Resident Killer Whale		128
4.5.3 Integrated Effects Modelling		129
Summary		130

Ecotoxicogenomics 139

Valérie S. Langlois and Christopher J. Martyniuk

Learning Objectives	139
---------------------	-----

5.1 Environmental 'Omics': A Role in Ecotoxicology Research	139
5.2 Ecotoxicology and Transcriptomics	141
5.2.1 Application of Ecotoxicogenomics	142
5.3 Ecotoxicology and Proteomics	144
5.4 Ecotoxicology and Metabolomics/Lipidomics	146
5.5 Ecotoxicology and Epigenetics	147
5.6 Environmental DNA (eDNA)	149
5.7 Ecotoxicology and the Microbiome (Metagenomics)	149
5.8 Ecotoxicology and Bioinformatics	150
5.9 Omics and Adverse Outcome Pathways (AOPs)	152
5.10 Omics in Regulatory Toxicology	153
5.10.1 Computational Toxicology in Regulatory Toxicology	154
Case Study 5.1 Omics to Reveal Mechanisms Underlying Glyphosate Toxicity in Invertebrates and Vertebrates	155
5.10.2 Environmental Omics in Regulatory Toxicology	157
5.10.3 Challenges and Considerations	157
5.11 Emerging Applications for Omics in Ecotoxicology	159
5.11.1 Genome-wide CRISPR Screens in Ecotoxicology	160
5.11.2 Multi-omics, Exposome and Exposomics in Ecotoxicology	161
Summary	161
Review Questions and Exercises	162
Abbreviations	162

PART II TOXICOLOGY OF INDIVIDUAL SUBSTANCES 169

6

Metals and Metalloids 171

Peter G. C. Campbell, Pamela M. Welbourn and Christopher D. Metcalfe

Learning Objectives	171
6.1 Introduction	171

6.2 Biogeochemistry of Metals and Metalloids	174
6.2.1 General Properties: Metal Speciation	174
6.2.2 Mobilization, Binding, Transport and Chemical Forms of Metals in the Environment	178
6.3 Biological Availability of Metals in Aquatic and Terrestrial Systems	179
6.3.1 General Considerations	180
6.3.2 Aquatic Environments: Dissolved Metals	180
6.3.3 Aquatic Environments: Particulate Metals	184
6.3.4 Terrestrial Environments	185
6.3.5 Diet-borne Metals	186
6.4 Mechanisms of Metal Toxicity	187
6.4.1 Alteration of Enzyme Conformation	188
6.4.2 Displacement of Essential Cations	188
6.4.3 Oxidative Stress	189
6.4.4 Changes to Cellular Differentiation	190
6.4.5 Behavioural Effects	190
Capsule 6.1 Metal Effects on Fish Olfaction (<i>Gregory G. Pyle</i>)	191
6.5 Metal Detoxification and Tolerance	195
6.5.1 Metal Speciation Within Cells	195
6.5.2 Determination of Subcellular Metal Partitioning	196
6.5.3 Links Among Changes in Metal Exposure, Changes in Metal Subcellular Distribution and the Onset of Deleterious Effects	197
6.5.3.1 Laboratory Observations	198
6.5.3.2 Field Observations	199
Case Study 6.1 Response of Native Freshwater Animals to Metals Derived from Base-metal Smelter Emissions	199
6.5.4 Metal Tolerance	202
6.5.4.1 Occurrence and Origin	202
6.5.4.2 Approaches	202
6.5.4.3 Taxonomic Distribution of Tolerance	203
6.5.4.4 Tolerance Mechanisms	203
6.5.4.5 Ecotoxicological Implications and Practical Applications	205
6.6 Organometals (Hg, Pb, Sn, As, Sb, Se)	206
6.7 Abiotic Factors Affecting Metal Toxicity	206
6.7.1 Temperature	206
6.7.2 pH	207
6.7.3 Hardness	208
6.7.4 Salinity	208
6.7.5 Dissolved Organic Matter	209
6.8 Metal-specific Sections	209
6.8.1 Mercury	210
6.8.1.1 Occurrence, Sources and Uses	210
6.8.1.2 Biogeochemistry	212
6.8.1.3 Mercury Methylation	214
6.8.1.4 Biogeochemical Cycle	215
6.8.1.5 Mercury Biomagnification	217
6.8.1.6 Environmental Factors Affecting Mercury Bioaccumulation	219
6.8.1.7 Mercury Bioaccumulation and Monitoring	221
6.8.1.8 Ecotoxicity	221

6.8.1.9 Detoxification and Tolerance	224	7.3 Uptake into Organisms and Bioaccumulation	280
6.8.1.10 Mercury Highlights	225	7.4 Cellular Receptors	281
6.8.2 Cadmium	225	7.5 Metabolism	282
6.8.2.1 Occurrence, Sources and Uses	226	7.5.1 Phase I Reactions	283
6.8.2.2 Biogeochemistry	226	7.5.2 Phase II Reactions	287
6.8.2.3 Biochemistry	226	7.5.3 Phase III Reactions	288
6.8.2.4 Ecotoxicity	227	7.5.4 Induction of Metabolism	288
6.8.2.5 Cadmium Highlights	228	7.6 Compounds of Particular Concern	289
6.8.3 Lead	228	7.6.1 Hydrocarbons: Sources, Applications and Concerns	290
6.8.3.1 Occurrence, Sources and Uses	228	7.6.1.1 Polycyclic Aromatic Compounds	290
6.8.3.2 Biogeochemistry	230	7.6.1.2 Petroleum Hydrocarbons	292
6.8.3.3 Biochemistry	231	7.7 Legacy Contaminants	294
6.8.3.4 Ecotoxicity	232	7.7.1 Organochlorine Insecticides	294
6.8.3.5 Lead Highlights	234	7.7.2 Polychlorinated Dibenzodioxins and Dibenzofurans	296
6.8.4 Copper	234	7.7.3 Polychlorinated Biphenyls	296
6.8.4.1 Occurrence, Sources and Uses	234	7.8 Current Use Pesticides	297
6.8.4.2 Biogeochemistry	235	7.8.1 Organophosphate Insecticides	298
6.8.4.3 Biochemistry	236	Case Study 7.1 Toxicity of Insecticide, Monocrotophos, to Swainson's Hawks	299
6.8.4.4 Ecotoxicity	237	7.8.2 Carbamate Insecticides	299
6.8.4.5 Copper Highlights	239	7.8.3 Phenylpyrazole Insecticides	301
6.8.5 Nickel	239	7.8.4 Pyrethroid Insecticides	301
6.8.5.1 Occurrence, Sources and Uses	239	7.8.5 Neonicotinoid Insecticides	302
6.8.5.2 Biogeochemistry	240	7.8.6 Chlorophenoxy Herbicides	302
6.8.5.3 Biochemistry	240	7.8.7 Bipyridilium Herbicides	303
6.8.5.4 Ecotoxicity	241	7.8.8 Glyphosate Herbicide	303
6.8.5.5 Nickel Highlights	243	7.8.9 Triazine Herbicides	304
6.8.6 Zinc	243	7.8.10 Fungicides	304
6.8.6.1 Occurrence, Sources and Uses	243	7.9 Flame Retardants	305
6.8.6.2 Biogeochemistry	244	7.10 Perfluoroalkyl Compounds	307
6.8.6.3 Biochemistry	245	Capsule 7.1 Mobility, Bioavailability and Remediation of PFAS Compounds in Soils (Michael J. McLaughlin)	309
6.8.6.4 Ecotoxicity	246	7.11 Plasticizers	313
6.8.6.5 Zinc Highlights	248	7.12 Pharmaceutically Active Compounds	315
6.8.7 Arsenic	248	Case Study 7.2 Decline of Populations of Gyps Vultures in South Asia	317
6.8.7.1 Occurrence, Sources and Uses	248	7.13 Toxicovigilance	318
6.8.7.2 Biogeochemistry	249	Summary	319
6.8.7.3 Biochemistry	251	Review Questions and Exercises	319
6.8.7.4 Ecotoxicity	252	Abbreviations	320
6.8.7.5 Arsenic Highlights	254	References	321
6.8.8 Selenium	255		
6.8.8.1 Occurrence, Sources and Uses	255		
6.8.8.2 Biogeochemistry	255		
6.8.8.3 Biochemistry	256		
6.8.8.4 Ecotoxicity	257		
6.8.8.5 Selenium Highlights	259

Natural Toxins 355

David A. Wright and Pamela M. Welbourn

Learning Objectives	355
9.1 What Is a Toxin?	355
9.2 Evolutionary Perspective and Role of Natural Toxins	356
9.3 Toxins and Their Mode of Action	356
9.3.1 Toxins Produced by Harmful Algal Blooms	357
9.3.1.1 Domoic Acid	357
9.3.1.2 Saxitoxin	358
9.3.1.3 Brevetoxin	359
9.3.1.4 Okadaic Acid	360
9.3.1.5 Karlotoxin	360
9.3.1.6 Tetrodotoxin	361
9.3.1.7 Microcystins	361
9.3.1.8 Anatoxins	361
9.3.2 Toxins Produced by Vascular Plants	361
9.3.2.1 Naphthoquinones	362
9.3.2.2 Lectins	363
9.3.3 Toxins Produced by Microorganisms: Fungi and Bacteria	363
9.3.3.1 Anthrax Toxin	363
9.3.3.2 Microbial Methylation of Mercury	364
9.3.3.3 Fungal Toxins	364
9.3.4 Toxins Produced by Animals	365
9.3.4.1 Venoms	365

9.4 Defining the Ecological Advantage of Toxin Production	366
9.5 Applications of Natural Toxins	368
9.5.1 Pest-control Products	368
9.5.1.1 Bt insecticide	369
9.5.1.2 Quinones	370
9.5.2 Biological Warfare and Bioterrorism	370
9.6 Conclusions	370
Summary	371
Review Questions and Exercises	372

Ionizing Radiation 379

Louise Winn

Learning Objectives	379
10.1 Non-ionizing Versus Ionizing Radiation	379
10.2 Definitions	380
10.2.1 What Is Ionizing Radiation?	380
10.2.2 Units of Measurement	382
10.3 Sources of Ionizing Radiation	383
10.3.1 Background Ionizing Radiation	383
10.3.2 Manufactured Ionizing Radiation for Medical Use	385
10.3.3 Nuclear Weapons	385
10.3.4 Nuclear Power	386
10.3.4.1 Mining and Extraction	386
10.3.4.2 Enrichment, Conversion and Fuel Fabrication	386
10.3.4.3 In-core Fuel Management	386
10.3.4.4 Fuel Reprocessing	387
10.3.5 Nuclear Waste Management	387
10.3.5.1 Short-lived Intermediate and Low-level Waste	388
10.3.5.2 Long-lived Intermediate and High-level Waste	388
10.4 Case Studies	389
Case Study 10.1 The Chernobyl Accident	389
Case Study 10.2 Fukushima Daiichi Nuclear Power Plant	390
10.5 Effects of Ionizing Radiation at the Molecular and Cellular Levels	391
10.5.1 Cell Death	393
10.5.2 DNA Damage	393
10.5.3 Protein Damage	394
10.5.4 Lipid Damage	394
10.5.5 Epigenetic Effects	394
10.5.6 Effects on the Immune System	395
10.6 Risk Assessment of Ionizing Radiation	395
10.7 Ecological Effects of Radiation	398

Capsule 10.1 Radiological Protection of the Environment	399	Case Study 11.1 Whole-lake Addition of Nanosilver	438
(Nicholas A. Beresford and David Copplestone)			
10.8 Conclusions	403	11.4 Pulp and Paper Production	439
Summary	404	11.4.1 Evolution of Pulp and Paper	
Review Questions and Exercises	404	Environmental Issues	440
Abbreviations	404	11.4.1.1 Making Paper from Wood	440
