## **1 Introduction 1**

Simondon and the Specification 5

Building Materials: An ontogenetic approach 12

'Veritable Relations': Building materials as systems 15

On the Transductive Method 20

## **2 Specifying Building Materials 27**

From Object to Process: 18th and 19th century specifications and the shift to division by trade 32

From 'Means' to 'Ends': 20th and 21st century specifications and the variety of forms of clause 44

## **3 Naming Materials 51**

From Species to Brand Names: Changing practices of naming timber 53

Effects of Changes in Naming: The emergence of proprietary specification 59

Naming and Table 2/3: Materials as varieties of matter 66

## **4 Process 71**

The Process-based Clause 75

'Nothing but a Transit': Hylomorphism and the forgetting of process 78

Dynamic Operations in Process-based Description 86

'Rendered Plastic by Preparation': Preliminary operations 103

## **5 Performance 113**

Performance Specification 120

'Grounded in Such Usefulness': Material as equipment 125

'For a Given Service': 'New glass performances' 134

**6 Systems of Material** 153

Informed Materials 156

Simondon's 'Complete System' 160

'That Constitutive Seam' 166

**7 Going into the Mould** 183

Preliminary Operations 184

The Technical Object 189

Inventive Relations 197
