

ATLAS OF THE HILLFORTS OF BRITAIN AND IRELAND

GARY LOCK and IAN RALSTON

with contributions by W. Derek Hamilton, Jonathan A. Horn, Sophia Adams,
Kathleen McCaskill, Sophie McDonald and Simon Maddison

Cartography by Paula Levick

Based on data assembled by Ian Brown, Paula Levick and Stratford Halliday and
information on Ireland provided by William O'Brien, James O'Driscoll and Alan Hawkes

EDINBURGH

<i>List of figures</i>	vi
<i>List of tables</i>	xiii
<i>Acknowledgements and a note on supporting online resources</i>	xvi
An introduction to the <i>Atlas</i>	1
1 Finding, cataloguing and mapping hillforts: a brief history	6
2 Methodology and some headline counts	29
3 Hillforts in their landscapes	55
4 Size and vallation	101
5 The architecture of enclosing works	160
6 Hillfort interiors	245
7 Dating hillforts: two approaches	312
8 Using <i>Atlas</i> data: the significance of selected clusters of hillforts in Britain	369
9 Some aspects of British and Irish hillforts in the light of the <i>Atlas</i> : retrospect and prospect	394
Appendix 1 Publications directly related to the project	427
Appendix 2 Scottish vitrified forts: a detailed case study	429
Appendix 3 Hillfort numbers by historic counties ranked across Britain and Ireland	439
<i>Notes</i>	448
<i>Bibliography</i>	451
<i>General index</i>	471
<i>Index of places, people and organisations</i>	475

Figures

1.1	An extract from David Christison's 1898 map	9
1.2	An extract from the <i>Ordnance Survey Map of Southern Britain in the Iron Age</i> , published in 1962	13
1.3	James Forde-Johnston	17
1.4	Distribution by James Forde-Johnston of hillforts of his Types VIII–XI	19
1.5	Distribution by James Forde-Johnston of Wessex hillforts by size and vallation	20
1.6	A. H. A. Hogg during a visit to Y Breiddin in 1977	21
1.7	A. H. A. Hogg's maps of hillforts in Britain based on size and – to a limited degree – vallation	23
1.8	Dennis Harding's maps of hillforts in Britain using the OS 1962 size categories	25
1.9	Barry Raftery's preliminary distribution map of Irish hillforts, completed in 1969	27
2.1	Hillforts in England, Scotland and Wales recognised as cropmarks that were non-scheduled as of 2016	35
2.2	Hillforts contained within the <i>Atlas</i> . (A) Confirmed. (B) Not confirmed (including sites with irreconciled issues)	41
2.3	<i>Atlas</i> confirmed forts with evidence of excavations in their interiors	44
2.4	Hillforts with excavations in their interiors as a percentage of confirmed forts in that country	45
2.5	<i>Atlas</i> confirmed forts with evidence of excavations of their enclosures	46
2.6	Hillforts with excavations on their enclosures as a percentage of confirmed forts in that country	47
2.7	<i>Atlas</i> confirmed forts with evidence of excavations of their enclosures and their interiors	48
2.8	The proportions of confirmed hillforts by country with evidence for excavations on both their enclosures and their interiors	49
2.9	Numbers of instances of excavation, regardless of location or scale, by decade at hillforts in England and the Isle of Man	50
2.10	Numbers of instances of excavation, regardless of location or scale, by decade at hillforts in Ireland (both the Republic and the North)	51
2.11	Numbers of instances of excavation, regardless of location or scale, by decade at hillforts in Scotland	51

2.12	Numbers of instances of excavation, regardless of location or scale, by decade at hillforts in Wales	52
2.13	Cumulative totals for the numbers of instances of excavation, regardless of location or scale, by decade at hillforts across Britain and Ireland	53
3.1	Hillforts wholly or partially on arable land	57
3.2	Hillforts which are 'likely destroyed' in their entirety	59
3.3	Hillforts located at less than 50 m, not including coastal promontory forts	66
3.4	The highest 100 hillforts	67
3.5	The idealised principal types of hillforts identified within the <i>Atlas</i>	79
3.6	Contour forts with an enclosed area of 1.21 ha or less	81
3.7	Partial contour forts	82
3.8	Coastal promontory forts	85
3.9	Inland promontory forts	88
3.10	Hillslope forts	93
3.11	Multiple-enclosure forts	95
3.12	Level-terrain forts	97
3.13	Marsh forts	98
4.1	<i>Atlas</i> population of small forts (< 1.22 ha) as defined by the Ordnance Survey	106
4.2	<i>Atlas</i> population of medium-size forts (1.22–6.07 ha) as defined by the Ordnance Survey	107
4.3	<i>Atlas</i> population of large forts (> 6.07 ha) as defined by the Ordnance Survey	108
4.4	<i>Atlas</i> data deployed to map Forde-Johnston's 'standard size' hillforts	111
4.5	Rank-size diagram of the 3,266 confirmed hillforts with area data	113
4.6	Hillfort numbers up to 5 ha in size across Britain and Ireland by 0.2 ha steps	115
4.7	Hillforts in Britain and Ireland from 1 ha to 5 ha by 0.2 ha steps	115
4.8	The internal areas of the hillforts of Britain and Ireland above 1 ha to 20 ha in extent by hectare steps	117
4.9	The internal areas of the hillforts of Britain and Ireland above 5 ha to 85 ha in extent by 5 ha steps	117
4.10	Hillforts with an internal area smaller than 0.2 ha	119
4.11	Sites of less than 0.2 ha in Britain and Ireland described as occupying coastal promontories	121
4.12	Hillforts between 0.2 ha and 0.49 ha in extent	122
4.13	Partial or complete bi- or multivallation in small hillforts of between 0.2 ha and 0.49 ha in internal area	123
4.14	Hillforts between 0.5 and 0.99 ha in extent	125
4.15	Small hillforts in the 0.5–0.99 ha size category with complex vallation (ranging from partial bivallation to complete multivallation)	126
4.16	Hillforts between 1 and 4.99 ha in extent	128

4.17	Hillforts between 1 ha and 4.99 ha in extent which are classed as contour forts	129
4.18	Hillforts between 1 and 4.99 ha in extent which are classed as contour forts and have partly or wholly multivallate enclosing works	130
4.19	Hillforts of at least 5 ha in extent	131
4.20	Hillforts of 10 ha or over in extent	133
4.21	Hillforts of 20 ha and over in extent	134
4.22	Hillforts of 30 ha or over in extent	136
4.23	Hillforts (both reliability of interpretation confirmed and unconfirmed) of 30 ha and over in extent	137
4.24	(A) Univallate and (B) partially univallate forts, across Britain and Ireland, on their current morphology	145
4.25	Forts which have previously been (A) univallate or (B) partially univallate but are not so according to their current morphology	147
4.26	Sites of confirmed hillforts in Britain and Ireland which are wholly or partially univallate	148
4.27	(A) Bivallate and (B) partially bivallate forts, across Britain and Ireland, on current morphology	150
4.28	Forts which have previously been (A) bivallate and (B) partially bivallate but are not so according to their current morphology	151
4.29	Hillforts with all their known configurations wholly or partially bivallate, or where the most elaborate part of their circuit is bivallate	152
4.30	(A) Multivallate and (B) part-multivallate forts, across Britain and Ireland, on their current morphology	154
4.31	Forts which have previously been (A) multivallate or (B) part-multivallate but are not so according to their current morphology	155
4.32	Forts with annexes in Britain and Ireland	158
5.1	Hillforts with timber-laced walls in Britain	165
5.2	Hillforts with timber-framed walls (including 'box ramparts') in Britain	168
5.3	(A) Palisades recognised from surface inspection. (B) Palisades recognised from excavated evidence. (C) Palisades recognised from both surface inspection and excavation	172
5.4	Vitrified mass, inner enclosure, Carradale Point, Argyll [2452]	176
5.5	Hillforts in Britain with evidence for vitrification included in the <i>Atlas</i> . (A) Surface evidence only for vitrification. (B) Excavation evidence only for vitrification. (C) Both types of evidence	178
5.6	Hillforts with surface evidence of at least one enclosure with a dry-stone wall	183
5.7	Hillforts with excavation evidence of at least one enclosure that is a dry-stone wall	184
5.8	Hillforts with excavation evidence for the presence of one or more unretained earthen banks	191
5.9	The upright stones of the <i>chevaux de frise</i> outside the tumbled stone walls of Cademuir Hill 2, Peeblesshire [3653]	193

5.10	Hillforts with <i>chevaux de frise</i>	195
5.11	Simplified plans of entrance types as used in data collection for the <i>Atlas</i>	208
5.12	Hillforts with one or more simple gap entrances	210
5.13	Hillforts with one or more oblique entranceways	213
5.14	Hillforts with one or more inturned entrances	216
5.15	Hillforts with one or more out-turned entrances	217
5.16	Hillforts with an entrance that has one side inturned and the other out-turned	219
5.17	Hillforts with one or more passageway/corridor entrances	221
5.18	Hillforts with one or more hornwork entrances	224
5.19	Hillforts with one or more overlapping entrances	225
5.20	(A) Hillforts with entrance outworks. (B) Hillforts with barbicans. (C) Hillforts with both	228
5.21	Reconstruction of the barbican entrance at Crickley Hill, Gloucestershire [0748]	229
5.22	Hillforts with at least one blocked entrance	231
5.23	Examples of guard chambers: (A) Titterstone Clee, Shropshire [0091]; (B) The Wrekin, Shropshire [0090]; (C) Moel Hiraddug, Flintshire [1154]; (D) Rainsborough Camp, Northamptonshire [0778]	235
5.24	Hillforts with at least one guard chamber	237
5.25	Hillforts with evidence for gang-working	241
5.26	Hillforts where the enclosing works have been interpreted as unfinished from (A) surface inspection. (B) Interpreted as unfinished from excavated evidence. (C) Interpreted as unfinished from both types of evidence	242
5.27	The rampart at Fin Cop, Derbyshire [2969], showing where two adjoining wall segments display the use of stones derived from different geologies, suggesting gang-working	243
6.1	Hillforts with (A) evidence for roundhouses from geophysical survey. (B) With evidence from excavation. (C) With evidence from both	248
6.2	Cropmarked hillforts with internal aerial photographic evidence for roundhouses	255
6.3	Reconstructed roundhouses at Castell Henllys, Pembrokeshire [1888]	257
6.4	Simplified diagram of different forms of penannular negative components of roundhouses	258
6.5	Hillforts with any internal evidence for roundhouses	264
6.6	Hillforts with other forms of surface evidence for roundhouses	265
6.7	Hillforts with surface evidence for curvilinear platforms	268
6.8	Hillforts with surface evidence for circular stone structures	272
6.9	Hillforts with evidence for rectangular structures from (A) surface evidence. (B) With evidence from oblique aerial photography. (C) With evidence from both.	275

6.10	Hillforts with evidence for rectangular structures from excavated evidence	276
6.11	(A) Hillforts with internal evidence for Iron Age four-post structures. (B) With internal evidence for 'possible' four-post structures	279
6.12	Hillforts with internal evidence for Iron Age rectangular buildings (excluding four-posters). (A) Probable evidence. (B) Possible evidence	281
6.13	Hillforts with internal evidence for Roman and/or Romano-British rectangular buildings	283
6.14	Plan of a Pictish rectangular building within Barflat hillfort, Aberdeenshire [2941]	285
6.15	(A) Hillforts with internal evidence for Early Medieval rectangular buildings. (B) Hillforts that are 'possible sites' of rectangular buildings	286
6.16	Hillforts with internal evidence for pits from (A) excavated evidence. (B) With geophysical survey evidence. (C) With evidence from both	289
6.17	Hillforts with evidence for quarry hollows from surface evidence	292
6.18	Hillforts with evidence for quarry hollows. (A) Excavated evidence. (B) Geophysical survey. (C) With evidence from both	293
6.19	Hillforts with evidence for an internal water source. (A) Wells/cisterns. (B) Springs.	297
6.20	Hillforts with evidence for (A) trackways. (B) With evidence for hollow ways. (C) With evidence for both	300
6.21	Hillforts with evidence for pottery	306
6.22	Hillforts with evidence for metal-working	307
6.23	Hillforts with evidence for metal artefacts	308
6.24	Hillforts with evidence for (A) animal bones. (B) Human bones. (C) Both	309
7.1	The reliability of dating. (A) High. (B) Medium. (C) Low	316
7.2	Hillforts in Britain and Ireland dated by four-century blocks	317
7.3	Hillforts (A) with any pre-1200 BC dating evidence. (B) With evidence of high reliability	320
7.4	Hillforts (A) with any dating evidence for the period 1200 BC to 800 BC. (B) With evidence of high reliability	322
7.5	Hillforts (A) with any dating evidence for the period 1200 BC to 800 BC for <i>de novo</i> construction. (B) With evidence of high reliability	323
7.6	Hillforts (A) with any dating evidence for the period 800 BC to 400 BC. (B) With evidence of high reliability	326
7.7	Hillforts (A) with any dating evidence for the period 800 BC to 400 BC of <i>de novo</i> construction. (B) With evidence of high reliability	327
7.8	Hillforts (A) with any dating evidence for the period 400 BC to AD 50. (B) With evidence of high reliability	328
7.9	Hillforts (A) with any dating evidence for the period 400 BC to AD 50 of <i>de novo</i> construction. (B) With evidence of high reliability	329
7.10	Hillforts (A) with any dating evidence for the period AD 50 to AD 400. (B) With evidence of high reliability	332

7.11	Hillforts with dating evidence for the period AD 50 to AD 400 of <i>de novo</i> construction	333
7.12	Hillforts (A) with any dating evidence for the period AD 400 to AD 800. (B) With evidence of high reliability	335
7.13	Hillforts (A) with any dating evidence for the period AD 400 to AD 800 of <i>de novo</i> construction. (B) With evidence of high reliability	336
7.14	Hillforts (A) with any dating evidence for the period post AD 800. (B) With evidence of high reliability	339
7.15	Hillforts with dating evidence for the period post AD 800 of <i>de novo</i> construction	340
7.16	Relative chronology of types of brooches found at hillforts in Britain	346
7.17	Comparison of the calibrated radiocarbon dates on bulk charcoal samples submitted to Harwell in the 1980s (HAR) and the more recent single-entity samples taken from the returned Harwell excess material in the Danebury archive (SUERC)	354
7.18	Chronological model for Hascombe Camp	357
7.19	The span of dated Iron Age activity at the hillfort of Hascombe Camp	358
7.20	Chronological model for Y Breiddin	361
7.21	The span of dated Iron Age activity at Y Breiddin hillfort	366
8.1	The 15 largest hillfort clusters in Britain at percolation radius values of 6 km and 12 km	370
8.2	East-central Scotland, the main hillfort clusters at 5 km percolation radius, hillforts in proportion to enclosed area	375
8.3	Hillforts in east-central Scotland, showing morphology, with sites sized in proportion to enclosed area	376
8.4	The main hillfort clusters in central Wales and the Marches at 6 km, hillforts plotted in proportion to enclosed area	378
8.5	The main hillfort clusters in central Wales and the Marches at 6 km, with other Iron Age settlement sites	379
8.6	Hillfort cluster in the Chilterns at 13 km radius, hillforts scaled by enclosed area and showing dating evidence	381
8.7	Hillfort cluster in Cornwall at 13 km percolation radius, plotted in proportion to enclosed area, also showing known Roman forts	384
8.8	Hillfort clusters in Cornwall at 9 km percolation radius, with other Iron Age settlements, overlaid on topography and the Medieval Cornish hundreds	385
8.9	Hillfort clusters in south-west Wales, at 5 km percolation radius, plotted with Iron Age settlements	387
8.10	Hillfort clusters in South West Wales at 9 km percolation radius, plotted with Iron Age settlements, and overlaid on land classification and geological coalfields	389
9.1	The density of confirmed hillforts in Britain and Ireland per 100 km ² within historic counties	400

9.2	The density of hillforts of 1 ha or over in extent per 100 km ² within historic counties	403
9.3	The density of hillforts of 5 ha or over in extent per 100 km ² within historic counties	405
9.4	The total enclosed areas in all confirmed hillforts per 100 km ² within each historic county, ranked in quartiles	407
9.5	Percentages of historic counties with 1 ha or over of enclosed space within hillforts per 100 km ²	409
A2.1	The 77 hillforts in Scotland with secure evidence for vitrification, ranked by internal area	433
A3.1	Numbers of confirmed hillforts by historic counties ranked by quartiles	440
A3.2	Numbers of confirmed hillforts of 1 ha or over by historic counties ranked by quartiles	442
A3.3	Numbers of confirmed hillforts of 5 ha or over by historic counties ranked by quartiles	444
A3.4	Total enclosed areas within confirmed hillforts by historic counties ranked by quartiles	446

Tables

I.1	Country codes employed in the <i>Atlas</i> for constituent parts of Britain and Ireland	3
I.2	The format for the information on individual sites included in distribution maps made available on the Edinburgh University Press website	3
1.1	Hillforts by historic county included in the OS 1962 map of southern Britain, with an analysis of the proportions of multivallate (M) and univallate (U) forts present by size category	14
1.2	Barry Raftery's 1972 classification of Irish hillforts	26
2.1	The reliability of interpretation and of data within the <i>Atlas</i>	32
2.2	A breakdown of scheduled and non-scheduled hillforts	34
2.3	Citizen science returns by country	38
2.4	Citizen science returns by groups	38
2.5	Counts of hillforts in the <i>Atlas</i> compared with counts in previous major hillfort publications (not including the island of Ireland)	42
2.6	Counts of hillforts in Ireland	42
3.1	Counts of hillforts according to current land use	55
3.2	The condition of hillforts	56
3.3	Hillforts in varying conditions of survival	58
3.4	Hillforts displaying a single condition state across their whole footprint	58
3.5	The altitude of hillforts	65
3.6	The prevailing aspect of hillforts	69
3.7	Amalgamated counts for aspect to produce views	70
3.8	Types of hillforts	77
3.9	The topographic positions of hillforts	78
3.10	The cross-tabulation of hillfort type by topographic position	80
4.1	Sizes of enclosed areas for small, medium and large hillforts as deployed by the Ordnance Survey	102
4.2	Counts of hillforts by OS size categories	103
4.3	The numbers of hillforts up to 5 ha by 0.2 ha steps	114
4.4	The internal areas of hillforts up to 20 ha in internal area by hectare steps	116
4.5	The internal areas of hillforts by 5 ha bands up to 130 ha	116

4.6	Maximum internal areas of hillforts ranked by size into octiles	116
4.7	The internal areas of hillforts in ascending quintiles	118
4.8	A. H. A. Hogg's views on examples of hillforts of 30 ha in size or greater compared with results in the <i>Atlas</i> database	138
4.9	Current vallation of hillforts by <i>Atlas</i> size categories distinguishing univallate, bivallate and multivallate forts	140
4.10	The number of ditches per hillfort	142
4.11	The current morphology of hillfort enclosures in terms of vallation regardless of size	144
4.12	Hillforts with enclosing works that do not form a complete circuit	144
4.13	Percentages of univallate and partially univallate forts by country	146
4.14	The proportions of hillforts which are partially or wholly bivallate	149
4.15	Hillforts ranked by whether the most complex earthworks on any part of their circuit are uni-, bi- or multivallate	153
4.16	The altitudes of hillforts with annexes compared with that of the general population of hillforts by octiles	157
5.1	Numbers of vitrified forts and duns in Scotland presenting acceptable evidence for the phenomenon	177
5.2	Vitrification discovered on the surface or through excavation: <i>Atlas</i> data	177
5.3	Vitrified forts recognised in England, Isle of Man and Wales	179
5.4	Hillforts including at least one dry-stone faced wall known either from surface inspection or excavation	182
5.5	Hillforts with evidence for dry-stone walling and rubble banks	185
5.6	Hillforts with at least partial excavation of their enclosures which show evidence for one or more dump ramparts	190
5.7	Total numbers of entrances by country, with mean number of entrances per site	202
5.8	Entrance statistics for hillforts: (A) sites with recorded entrances, (B) sites with no recorded evidence for an entrance	203
5.9	Entrance orientations as recorded by direction: numbers of recorded entrance positions	205
5.10	A comparison of hillfort entrance orientations	206
5.11	Hillforts with complete circuits of the vallation type indicated against numbers with at least one simple gap entrance	212
5.12	Numbers of hillforts with at least one postern gate	233
5.13	Numbers of hillforts with at least one entrance of 'another form', that is, a form which could not readily be fitted into the <i>Atlas</i> classification	238
6.1	The number of sites showing evidence for internal features from excavation, geophysics and aerial photographs	246
6.2	Hillforts with aerial photographic evidence for roundhouses	254
6.3	Different forms of surface evidence for roundhouses	257
6.4	Numbers of hillforts with house platforms, by altitude and size	269
6.5	Hillforts with evidence for internal water sources	296

6.6	Hillforts with evidence for trackways	299
6.7	Evidence for finds within hillforts	304
7.1	Hillforts with dating evidence of any quality	314
7.2	Dated hillforts in each of the three reliability categories	315
7.3	Dated hillforts	318
7.4	Hillforts that continue between periods and <i>de novo</i> sites	319
7.5	Hillforts with evidence for pre- and post-hillfort activity	341
7.6	Iron Age brooches found at hillforts	348
7.7	Radiocarbon dates from Hascombe Camp, Surrey	356
7.8	Radiocarbon dates from Y Breiddin, Montgomeryshire	362
8.1	<i>Atlas</i> summary classification of land use	374
8.2	The settlement zones of south-west Wales	388
9.1	The historic counties with the highest number of confirmed hillfort sites, regardless of size, per 100 km ²	401
9.2	The historic counties with the highest number of confirmed hillfort sites over 1 ha in area per 100 km ²	402
9.3	The historic counties with the highest number of confirmed hillfort sites over 5 ha in area per 100 km ²	406
9.4	The historic counties with the largest enclosed areas within confirmed hillfort sites per 100 km ²	408
A2.1	The 80 confirmed forts where vitrification has been reasonably reliably observed	430
A2.2	Sites with evidence of vitrification which do not meet the <i>Atlas</i> criteria for confirmed hillforts and are usually classed as duns	433
A3.1	The top 10 historic counties ranked by numbers of confirmed hillforts regardless of size	439
A3.2	The top 10 historic counties ranked by numbers of confirmed hillforts of 1 ha or over	441
A3.3	The top 10 historic counties ranked by numbers of confirmed hillforts of 5 ha or over	443
A3.4	The 16 historic counties ranked by total areas enclosed within confirmed hillforts with areas in excess of 100 ha	447
