## PART I

### *What Was the Black Death?*

1 The Black Death	3
2 The Black Death: The Epidemic Disaster that Made History	11
3 The Return of the Black Death and the Response	16
4 Transmission of Lethal Doses of Bacteria in Bubonic Plague	24
5 Medical and Clinical Features of Bubonic Plague	38
6 Basic Aspects of the Epidemiology of Bubonic Plague	46
7 Historical Presence and Role of Black Rats in the Black Death (and Later Plague Epidemics)	58
8 Seasonality of Bubonic Plague	87

## PART II

### *The Origin of Bubonic Plague and the History of Plague before the Black Death*

9 A Short History of Plague before the Black Death	97
--	----

TABLES

12	Donations to religious institutions by (extant) wills or deeds or gift in Norway, 1339–51	409
13	Donations to religious institutions issued in Norway in 1349	411
14	Deaths of donors of chantries in Ribe Cathedral in 1350, by month	463
15	Donations to Danish religious institutions, 1341–50	467
16	Donations to Danish religious institutions, 1349–50, according to time, number in consecutive order, locality and region	468
17	Donations to Swedish religious institutions, 1341–50	482
18	Donations to Swedish religious institutions, December 1349–50, according to date, number in consecutive order, locality and region	483
19	Wills made in Lübeck in 1349–50 distributed according to months	553
20	Spread of the Black Death in north-western Germany according to chroniclers	564
21	Life expectancy and mortality at various ages in a population of males with life expectancy at birth ( $e_0$ ) of 25 years	651
22	Mortality in taxpaying households of Grenis in the Black Death	677
23	Mortality among householders holding tenancies of the royal estates in areas of northern Navarre in the year of crisis 1347 and in the Black Death, 1347–9	691
24	Mortality in the Black Death in Spain	696
25	Average household size in some Italian localities, mainly Tuscan	703
26	Estimates of population fall, San Gimignano, 1332 and 1349	713
27	Mortality in two wards in the city of Prato, 1339 in the Black Death	715
28	Estimates of mortality due to the Black Death in Prato contado's 59 villages	716–17
29	Estimates of mortality in the Black Death in Tuscany	723
30	Mortality rates in villages near Susa, Piedmont, 1335/48–9 (and 1367)	729
31	Registrations of households according to hearths <i>d'albergue</i> in towns and villages of Provence, 1340–56	734
32	Mortality in the Black Death among subsidy-paying households (hearths) and population in five parishes in the castellany of Ugine	741
33	Increase in number of households (hearths) in the castellany of Ugine, 1353–6	741
34	Mortality in the Black Death in three parishes near Chambéry	744
35	Mortality in the Black Death among peasant households and population in eight parishes near Montmélian	745
36	Population and mortality in the Black Death in four parishes in the castellany of Entremont	752

TABLES

37	Mortality in the Black Death in three parishes in the castellany of Monthey	754
38	Mortality rates for householders and population in the Black Death in 32 localities in the County of Savoy	754
39	Mortality rates in the Black Death in 21 (28) localities in the Savoy with range-specific prevalence, specific population mortality rates, and correlation with mean population size of localities	755
40	Mortality rates in the Black Death in 30 rural localities in the County of Savoy organized according to level of mortality (cf. Table 62)	756
41	Mortality in the Black Death in two cities in south-central France, Millau and Albi	760
42	Mortality in the Black Death in Saint-Flour in Auvergne	761
43	Mortality in the Black Death in France	767
44	Decline in number of households in two hamlets in Artois, 1347–86	770
45	Institutions to parish benefices in Cornwall, April 1348–July 1350	810
46	Mortality rates among the beneficed parish clergy in English dioceses	818
47	Urban mortality rates among English beneficed parish priests	822
48	2004 edition: distribution of mortality rates in the Black Death among customary tenantry on 81 English manors	827
49	Death rates among the customary tenantry on 20 Hampshire manors in the Black Death, 1348–9	832
50	Death rates in the Black Death on 15 manors of the diocese of Worcester showing inverse correlation according to size of villages	835
51	Mortality rates in 28 townships of the priory of Durham	838
52	Manorial death rates among tenants on 123 English manors	840–1
53	Distribution of mortality rates in the Black Death among the tenants on 101 and 123 manors of Glastonbury Abbey	844
54	Mortality in the Black Death among customary tenants on all small manors with 10–25 tenants	845
55	Levels of mortality in the Black Death among tenants according to the size of manors showing the inverse correlation	848
56	Mortality in the Black Death among landless householders on 17 manors of Glastonbury Abbey	850
57	Mortality rates in the Black Death among landless householders at six Polden Hill manors of Glastonbury Abbey	851
58	Summary of urban and rural mortality rates in the Black Death in Tuscany	872
59	Mortality in the Black Death in France	873

TABLES

60	Population density and plague mortality per 1,000 inhabitants in 'Bombay Presidency', 1897-8	878
61	Mortality rates in 30 rural localities in the Black Death in the Savoy, 1347-9, organized in 5% ranges to show the inverse correlation between population density and mortality level	882
62	Mortality rates in the Black Death in 21 (28) localities in the Savoy according to levels of mortality rates divided into quinquennials and correlated with mean population size to show inverse correlation	883
63	Level of mortality in the Black Death according to the size/density of the pre-plague tenantry of manors and showing the inverse correlation	883
64	Death rates in the Black Death on 15 manors of the diocese of Worcester organized according to numbers of tenants and showing inverse correlation	884
