KATALOG

Contents

1	Structure and Bonding in Organic Molecules	1
1.1	Atomic Orbitals as Building Blocks	1
1.2	Construction of Molecular Orbitals	2
1.3	Orbitals of π -Bonded Organic Molecules	7
1.3.1	π -Systems of Linear Polyenes	7
1.3.2	π -Systems of Cyclic Molecules	14
1.3.3	π -Systems Containing Electronegative Heteroatoms	18
1.3.4	Interaction of π - and σ -Bonded Systems	22
1.4	Hyperconjugation	25
1.4.1	Stabilization of Carbocations and Radicals	26
1.4.2	The Anomeric Effect	29
1.4.3	Bohlmann Bands	34
1.4.4	The <i>Gauche</i> Effect	34
1.4.5	Conformational Barriers in Alkanes	36
1.5	The Stability of Organic Molecules	37
1.6	Strained Molecules	40
1.6.1	Unfavorable 1,4-Interactions	40
1.6.2	Ring Strain	45
1.7	Aromaticity	48
	References	52

2 Reactivity Models in Organic Chemistry 54

2.1 Potential Energy Surfaces and How They Connect to Chemical Reactivity	54
2.2 The Bell–Evans–Polanyi Principle	66
2.3 Marcus Theory	67
2.4 The Theory of HSAB	69
2.5 Hammett Correlations	75
2.6 The Mayr–Patz Equation	79
2.7 The Klopman–Salem Equation and FMO Theory	83
2.8 Solvent Effects	88
2.8.1 Non-covalent Interactions	88
2.8.2 Solvent Polarity Scales Using Molecular Probes	95
References	99

3 Pericyclic Reactions 101

3.1 Electrocyclic Reactions	102
3.1.1 Electrocyclic Reactions in Systems With Four π -Electrons	102
3.1.2 Electrocyclic Reactions in Systems With Six π -Electrons	111
3.1.3 Electrocyclic Reactions in Systems With Two and Eight π -Electrons	115
3.1.4 Electrocyclic Reactions of Radicals	118
3.1.5 Related Cyclization Reactions	120
3.2 Cycloaddition Reactions	125
3.2.1 (2+2) Cycloaddition Reactions	127
3.2.2 (4+2)/[4+2] Cycloaddition Reactions	136
3.2.3 (3+2)/[4+2] Cycloaddition Reactions	147
3.2.4 Chelotropic Reactions	155
3.2.5 A Short Note on Carbene Chemistry Beyond Cycloaddition	159
3.3 Sigmatropic Rearrangements	161
3.3.1 [3,3]-Sigmatropic Rearrangements	164
3.3.2 [1,2]-Rearrangements in Cations and Anions	172
3.3.3 [1,3]-, [1,5]-, and [1,7]-Rearrangements	179
3.3.4 [2,3]-Rearrangements in Anions and Ylides	182
3.4 Ene Reactions	185
References	187
