# Deep Learning and Physics

 Springer

# Contents

<b>1</b>	<b>Forewords: Machine Learning and Physics</b> .....	<b>1</b>
1.1	Introduction to Information Theory .....	2
1.2	Physics and Information Theory .....	4
1.3	Machine Learning and Information Theory .....	5
1.4	Machine Learning and Physics .....	8
 <b>Part I Physical View of Deep Learning</b>		
<b>2</b>	<b>Introduction to Machine Learning</b> .....	<b>17</b>
2.1	The Purpose of Machine Learning .....	17
2.1.1	Mathematical Formulation of Data .....	19
2.2	Machine Learning and Occam's Razor .....	21
2.2.1	Generalization .....	23
2.3	Stochastic Gradient Descent Method .....	25
	Column: Probability Theory and Information Theory .....	27
<b>3</b>	<b>Basics of Neural Networks</b> .....	<b>35</b>
3.1	Error Function from Statistical Mechanics .....	35
3.1.1	From Hamiltonian to Neural Network .....	36
3.1.2	Deep Neural Network .....	45
3.2	Derivation of Backpropagation Method Using Bracket Notation .....	47
3.3	Universal Approximation Theorem of Neural Network .....	50
	Column: Statistical Mechanics and Quantum Mechanics .....	53
<b>4</b>	<b>Advanced Neural Networks</b> .....	<b>57</b>
4.1	Convolutional Neural Network .....	57
4.1.1	Convolution .....	57
4.1.2	Transposed Convolution .....	60
4.2	Recurrent Neural Network and Backpropagation .....	62
4.3	LSTM .....	66
	Column: Edge of Chaos and Emergence of Computability .....	70

<b>5</b>	<b>Sampling</b> .....	77
5.1	Central Limit Theorem and Its Role in Machine Learning .....	78
5.2	Various Sampling Methods .....	84
5.2.1	Inverse Transform Sampling .....	85
5.2.2	Rejection Sampling .....	87
5.2.3	Markov Chain .....	88
5.2.4	Master Equation and the Principle of Detailed Balance .....	92
5.2.5	Expectation Value Calculation Using Markov chains, and Importance Sampling .....	94
5.3	Sampling Method with the Detailed Balance .....	96
5.3.1	Metropolis Method .....	96
5.3.2	Heatbath Method .....	97
	Column: From Ising Model to Hopfield Model .....	99
<b>6</b>	<b>Unsupervised Deep Learning</b> .....	103
6.1	Unsupervised Learning .....	103
6.2	Boltzmann Machine .....	104
6.2.1	Restricted Boltzmann Machine .....	105
6.3	Generative Adversarial Network .....	109
6.3.1	Energy-Based GAN .....	112
6.3.2	Wasserstein GAN .....	116
6.4	Generalization in Generative Models .....	119
	Column: Self-learning Monte Carlo method .....	125
 <b>Part II Applications to Physics</b>		
<b>7</b>	<b>Inverse Problems in Physics</b> .....	129
7.1	Inverse Problems and Learning .....	129
7.2	Regularization in Inverse Problems .....	132
7.3	Inverse Problems and Physical Machine Learning .....	134
	Column: Sparse Modeling .....	136
<b>8</b>	<b>Detection of Phase Transition by Machines</b> .....	139
8.1	What is Phase Transition? .....	139
8.2	Detecting Phase Transition by a Neural Network .....	141
8.3	What the Neural Network Sees .....	143
<b>9</b>	<b>Dynamical Systems and Neural Networks</b> .....	147
9.1	Differential Equations and Neural Networks .....	147
9.2	Representation of Hamiltonian Dynamical System .....	151
<b>10</b>	<b>Spinglass and Neural Networks</b> .....	157
10.1	Hopfield Model and Spinglass .....	158
10.2	Memory and Attractor .....	161
10.3	Synchronization and Layering .....	163

<b>11 Quantum Manybody Systems, Tensor Networks and Neural Networks</b> .....	165
11.1 Neural Network Wave Function .....	166
11.2 Tensor Networks and Neural Networks .....	168
11.2.1 Tensor Network .....	168
11.2.2 Tensor Network Representation of Restricted Boltzmann Machines .....	169
<b>12 Application to Superstring Theory</b> .....	173
12.1 Inverse Problems in String Theory .....	173
12.1.1 Compactification as an Inverse Problem.....	174
12.1.2 The Holographic Principle as an Inverse Problem .....	175
12.2 Curved Spacetime Is a Neural Network .....	177
12.2.1 Neural Network Representation of Field Theory in Curved Spacetime .....	178
12.2.2 How to Choose Input/Output Data.....	180
12.3 Emergent Spacetime on Neural Networks .....	182
12.3.1 Is AdS Black Hole Spacetime Learned?.....	183
12.3.2 Emergent Spacetime from Material Data.....	185
12.4 Spacetime Emerging from QCD.....	187
Column: Black Holes and Information .....	192
<b>13 Epilogue</b> .....	195
13.1 Neural Network, Physics and Technological Innovation (Akio Tomiya) .....	195
13.2 Why Does Intelligence Exist? (Akinori Tanaka) .....	197
13.3 Why do Physical Laws Exist? (Koji Hashimoto) .....	197
<b>Bibliography</b> .....	199
<b>Index</b> .....	205
