

# Quantification of Sensitivity and Empirical Determinacy in Bayesian Hierarchical Models

---

Dissertation

zur

Erlangung der naturwissenschaftlichen Doktorwürde  
(Dr. sc. nat.)

vorgelegt der

Mathematisch-naturwissenschaftlichen Fakultät  
der  
Universität Zürich

von

Sona Hunanyan

aus

Armenien

## **Promotionskommission**

Prof. Dr. Leonhard Held (Vorsitz)

PD. Dr. Małgorzata Roos

Prof. Dr. Reinhard Furrer

Prof. Dr. Martyn Plummer

Zürich, 2022

# Thesis outline

<b>Preface</b>	<b>vii</b>
<b>Introduction</b>	<b>1</b>
<b>I Paper I</b>	<b>25</b>
<b>Sensitivity and identification quantification by a relative latent model complexity perturbation in Bayesian meta-analysis</b>	
<i>Małgorzata Roos, Sona Hunanyan, Haakon Bakka, and Håvard Rue</i>	
<i>Biometrical Journal</i> , 2021 (accepted)	
<a href="https://doi.org/10.1002/bimj.202000193">https://doi.org/10.1002/bimj.202000193</a> .	
<b>II Paper II</b>	<b>47</b>
<b>Quantification of empirical determinacy: the impact of likelihood weighting on posterior location and spread in Bayesian meta-analysis estimated with JAGS and INLA</b>	
<i>Sona Hunanyan, Håvard Rue, Martyn Plummer, and Małgorzata Roos</i>	
Bayesian Analysis (under review)	
<a href="https://arxiv.org/pdf/2109.11870.pdf">https://arxiv.org/pdf/2109.11870.pdf</a>	
<b>III Paper III</b>	<b>95</b>
<b>Empirical determinacy in the Bayesian logistic regression in the presence of separation in the data</b>	
<i>Sona Hunanyan, Georgios Kazantzidis, Håvard Rue, and Małgorzata Roos</i>	
Manuscript in preparation for Biometrika	
<b>IV Paper IV</b>	<b>115</b>
<b>Sensitivity-based identification of inaccurate heterogeneity priors in Bayesian meta-analysis</b>	
<i>Manuela Ott, Sona Hunanyan, Leonhard Held, and Małgorzata Roos</i>	
Manuscript in preparation for Statistics in Medicine	
<b>A Appendix A</b>	<b>187</b>
<b>Mind-map of the PhD thesis</b>	
<i>Sona Hunanyan</i>
