

**Molecular Ink-based Solution Processing of Copper (I) Sulfide
Thin Films for Solar Hydrogen Production**

Dissertation*

zur

**Erlangung der naturwissenschaftlichen Doktorwürde
(Dr. sc. nat.)**

vorgelegt der

Mathematisch-naturwissenschaftlichen Fakultät

der

Universität Zürich

von

Xi Zhang

aus der V. R. China

Promotionskommission

Prof. Dr. David Tilley (Vorsitz)

Prof. Dr. Roger Alberto

Prof. Dr. Greta R. Patzke

Zürich, 2022

Table of Contents

Acknowledgements.....	5
Abstract.....	7
Chapter 1 Introduction	9
1.1 Solar energy utilization.....	9
1.2 Semiconductor basics.....	11
1.2.1 Band structure	11
1.2.2 Optical properties of semiconductors	12
1.2.2 P- and n-type semiconductors.....	13
1.2.3 P-n junctions	14
1.2.4 Homojunctions and heterojunctions	15
1.2.5 Ohmic and Schottky contacts.....	16
1.3 PEC water splitting	18
1.3.1 The principle of PEC water splitting	18
1.3.2 Schottky junction and buried junction	21
1.3.3 Elemental earth abundance and toxicity of commonly used semiconductors	22
Chapter 2 Cu ₂ S-based Photoabsorbers.....	25
2.1 The promise of Cu ₂ S.....	25
2.2 The challenges of Cu ₂ S being used for solar energy conversion.....	26
2.3 Strategies to overcome the challenges	28
2.4 Objectives of this dissertation.....	30
Chapter 3 Techniques used in this thesis	31
3.1 Spin coating	31
3.1.1 Spin coating process	31
3.1.2 Spin coating methods.....	32
3.1.3 Thickness determination	32
3.2 Thermal analysis techniques.....	33
3.2.1 Thermogravimetric analysis.....	33
3.2.2 Differential thermal analysis.....	33
3.3 X-ray diffraction technique.....	35
3.3.1 Generation of X-rays.....	35
3.3.2 Bragg's law	37

3.4 Microscopy techniques	38
3.4.1 Scanning electron microscope	38
3.4.2 Transmission electron microscopy	41
3.5 Spectroscopy techniques	43
3.5.1 X-ray absorption spectroscopy	43
3.5.2 X-ray photon spectroscopy	45
3.5.3 Raman spectroscopy	46
3.6 Electrochemical measurements.....	48
3.6.1 Linear sweep voltammetry.....	49
3.6.2 Cyclic voltammetry.....	50
3.6.3 Incident photon to current efficiency measurement.....	50
Chapter 4 Synthesis of Phase Pure Cu ₂ S Thin Films for PEC Water Splitting.....	53
4.1 Introduction.....	53
4.2 Synthesis and characterization of the Cu-S molecular ink	54
4.3 Synthesis and characterization of Cu ₂ S thin films.....	56
4.4 Cu ₂ S thin film-based photocathodes for PEC water splitting.....	60
4.5 Experimental details.....	65
4.6 Conclusion	67
Chapter 5 Nanostructuring of Cu ₂ S thin films for enhanced light harvest and charge separation	69
5.1 Introduction.....	69
5.2 Synthesis and characterization of nanostructured Cu ₂ S thin films	70
5.3 Ink analysis and nanostructured thin film formation mechanisms	74
5.4 PEC water splitting performance of nanostructured Cu ₂ S thin films	78
5.5 Experimental details.....	81
5.6 Conclusion	84
Chapter 6 Conclusions and Outlook	87
6.1 Conclusions.....	87
6.2 Outlook	88
Bibliography	89
Resume.....	97
