

**Global Population Analyses of Wheat Powdery Mildew Using Whole  
Genome Sequencing Data**

**Dissertation**

**zur**

**Erlangung der naturwissenschaftlichen Doktorwürde  
(Dr. sc. nat.)**

**vorgelegt der**

**Mathematisch-naturwissenschaftlichen Fakultät**

**der**

**Universität Zürich**

**von**

Alexandros Georgios Sotiropoulos

**aus**

Griechenland

**Promotionskommission**

Prof. Dr. Thomas Wicker (Vorsitz und Leitung der Dissertation)

Prof. Dr. Beat Keller

Prof. Dr. Kentaro Shimizu

Prof. Dr. Bruce McDonald

**Zürich, 2022**

# Table of Contents

<b>Summary</b> .....	6
<b>Zusammenfassung</b> .....	7
<b>General Introduction</b> .....	9
A brief story of an important cereal .....	9
Fungal plant pathogens .....	10
Powdery mildew, an obligate biotroph .....	10
Wheat powdery mildew <i>Blumeria graminis forma specialis tritici</i> .....	11
Life, sex, and survival.....	12
Hybridization of different mildew strains .....	12
Effectors and Resistance Evolution.....	14
Management of the pathogen.....	14
Transposable Elements in the powdery mildew genome .....	15
Pangenomic analyses .....	17
Population genetics on fungal pathogens .....	17
On teaching about plant/pathogen interactions .....	19
Aims of the thesis .....	20
References.....	21
<b>Chapter 1.</b> Global genomic analyses of wheat powdery mildew reveal historical co-migration with humans .....	25
Abstract .....	27
Introduction.....	28
Results & Discussion .....	29
Conclusions.....	37
Methods .....	38
References.....	49
Main Figures .....	59
Supplementary Material.....	64
<b>Chapter 2.</b> A pangenome study of grass powdery mildews: Moving transposable elements, structural re-arrangements and copy number variations.....	111
Abstract .....	111
Introduction.....	112
Results & Discussion .....	113
Conclusion .....	118
Materials & Methods.....	119
References.....	123

Main Figures .....	129
Supplementary Material .....	135
<b>Chapter 3.</b> A fictional field case study to understand the genetic basis of host-fungal pathogen interactions using the wheat powdery mildew-wheat pathosystem .....	142
1. Introduction .....	143
2. Methods .....	145
3. Exercise design - Participants .....	147
4. Implementation .....	147
5. Precautions and safety .....	149
6. Discussion .....	150
7. Conclusion .....	150
References .....	153
Tables .....	154
Figures .....	157
<b>Conclusions and Outlook</b> .....	159
<b>Acknowledgements</b> .....	163
<b>Curriculum Vitae</b> .....	165
