

Impact of Agricultural Intensification on Soil Biogeochemistry and Multifunctionality

Dissertation

zur

Erlangung der naturwissenschaftlichen Doktorwürde
(Dr. sc. nat.)

vorgelegt der

Mathematisch-naturwissenschaftlichen Fakultät

der

Universität Zürich

von

Chantal Herzog

von

Ebikon LU

Promotionskommission

Prof. Dr. Marcel van der Heijden (Vorsitz und Leitung der Dissertation)

Dr. Samiran Banerjee

Prof. Dr. Beat Keller

Prof. Dr. Michael Schloter

Zürich, 2022

TABLE OF CONTENTS

Summary	i
Zusammenfassung	v
Chapter 1: General Introduction	1
1.1 Soil ecosystems under the rising pressure of land use intensification	1
1.2 Effects of intensified agriculture on soil biogeochemistry	2
1.2.1 Inefficient nutrient management	2
1.2.2 Soil organic carbon depletion	3
1.2.3 Loss of the unseen diversity	4
1.3 Assessing the impact of management intensification at different scales	4
1.3.1 Traditional extensive, low-input systems	5
1.3.2 Organic farming as a sustainable alternative	6
1.3.3 Underexplored and intensive vegetable farming	6
1.3.4 Recycling fertilizers as soil amendments	7
1.4 Holistic understanding of the impact of agricultural intensification	8
1.4.1 Soil nitrification and denitrification	8
1.4.2 Beyond productivity – multifunctional agroecosystems	9
1.4.3 Soil quality at the roots for successful long-term agriculture	10
1.5 Thesis Outline	10
1.6 References	13
Chapter 2: Are crop yield and ecosystem multifunctionality affected by the duration of organic management?	21
Abstract	22
2.1 Introduction	23
2.2 Materials and methods	24
2.2.1. Study sites and study design	24
2.2.2. Yield and weed assessment	28
2.2.3. Soil chemical properties	28
2.2.4. Soil biological properties	29
2.2.5. AMF colonization and the overall root associated fungal communities	29
2.2.6. Spiders	30
2.2.7. Multifunctionality assessment	30
2.2.8. Statistical analyses	32
2.3 Results	32
2.3.1. Crop yield and weed cover	32
2.3.2. Effect of organic farming on biodiversity, soil microbial activity and soil fertility	33

Table of contents

2.3.3. Effect of organic farming on ecosystem multifunctionality	34
2.4. Discussion	35
2.4.1. Yield and weed cover are determined by management practice but not -duration	35
2.4.2. Organic farming maintains soil fertility	36
2.4.3. Soil microbiology only differs in AMF root colonization	37
2.4.4. No increase of biodiversity along with management duration.....	37
2.4.5. Agro-ecological functioning and multifunctionality across management groups	38
2.5. Conclusion	40
2.6. References.....	41
Supporting Information	47
Chapter 3: Compost application promotes soil quality: insights from 56 arable fields	57
Abstract	58
3.1 Introduction.....	59
3.2 Materials and methods	61
3.2.1 Field sites and management systems	61
3.2.2 Crop management.....	62
3.2.3 Soil and wheat sampling	63
3.2.4 Soil analyses	64
3.2.5 Soil quality index (SQI) calculation	65
3.2.6 Statistics	66
3.3 Results	67
3.3.1 Soil quality and grain yield in response to fertilizer treatment and management system	67
3.3.2 Other drivers of soil quality.....	71
3.3.3 Direct and indirect effects of site-specific and management factors on SOC, SQI and yield	73
3.4 Discussion	74
3.4.1 Compost application shows potential to maintain SOC and promotes soil quality	74
3.4.2 Soil quality drivers – beyond management systems.....	75
3.4.3 Compost as a tool to alleviate trade-offs between productivity and soil quality	76
3.5 Conclusion	77
3.6 References.....	79
Supporting Information	85
Chapter 4: Effects of N fertilization intensity on crop yield, microbial functional groups and N leaching: observations from Europe’s largest lysimeter facility.....	115
Abstract	116
4.1 Introduction.....	117
4.2 Materials and methods	118

4.2.1	Lysimeter facility and experimental design.....	118
4.2.2	Crop yield data 2009-2017	120
4.2.3	N leaching (2009-2017)	120
4.2.4	Soil sampling	121
4.2.5	Soil analyses	121
4.2.6	DNA extraction and quantitative PCR	122
4.2.7	Bacterial and fungal diversity: Illumina MiSeq Sequencing	123
4.2.8	Statistics	124
4.3	Results	125
4.3.1	Leaching and crop yield responses.....	125
4.3.2	Impact of N inputs on soil bacterial and fungal communities.....	128
4.3.3	Clustering based on soil microbes and edaphic properties	128
4.4	Discussion	130
4.4.1	Nitrate leaching, edaphic properties and crop yield.....	130
4.4.2	Microbial parameters: functional N-cycling genes and diversity of soil bacteria and fungi	131
4.5	Conclusion	135
4.6	References.....	136
	Supporting Information	142
	Chapter 5: N-cycling in agricultural ecosystems: nitrification dominates in vegetable fields, while extensive grasslands are characterized by high denitrification dynamics	163
	Abstract	164
5.1.	Introduction.....	165
5.2.	Materials and methods	167
5.2.1	Study sites and soil sampling.....	167
5.2.2	Soil characterization	169
5.2.3	Potential nitrification, denitrification and N ₂ O fluxes.....	169
5.2.4	Molecular analyses.....	170
5.2.5	Statistical analyses	171
5.3.	Results	172
5.3.1	High nitrification and low denitrification potentials in vegetable fields	172
5.3.2	Abundance of N-cycling genes	175
5.3.3	Best predictors of potential nitrification and denitrification	176
5.4.	Discussion	177
5.4.1	Contrasting nitrification and denitrification potentials and their edaphic drivers	178
5.4.2	Bacterial and not archaeal ammonia oxidizers predict potential nitrification rates.....	180
5.4.3	Denitrifier abundances, primarily nosZII, determine potential N ₂ O formation	180
5.4.4	No clear differences in potential rates between conventional and organic vegetable fields.....	181

Table of contents

5.5. Conclusions.....	183
5.6. References.....	184
Supporting Information	193
Chapter 6: General Discussion	217
6.1. Scientific contribution of this study	217
6.2. Soil microbial biomass – a key indicator of management intensification.....	218
6.3. Thinking beyond the “conventional vs. organic” box.....	221
6.4. Compost promotes soil quality independent of the management system	222
6.5. Shifts in microbial parameters associated with high nitrification rates in intensive vegetable farming	224
6.6. Conclusion	227
6.7. References.....	230
Acknowledgements	235
Curriculum Vitae.....	237
