

# Inhibition of BerB within *B. cenocepacia* H111 Single Cells and its Consequences on the Macrocolony.

Dissertation  
zur  
Erlangung der naturwissenschaftlichen Doktorwürde  
(Dr. sc. nat.)  
vorgelegt der  
Mathematisch-naturwissenschaftlichen Fakultät  
der  
Universität Zürich

von  
Rebecca Elizabeth Shilling  
aus  
Grossbritannien

Promotionskommission  
Prof. Dr. Leo Eberl (Vorsitz)  
Prof. Dr. Jakob Pernthaler  
Prof. Dr. Tim Tolker-Nielsen

Zurich, 2023

# Table of Contents

Acknowledgements .....	iv
Summary.....	vi
Chapter1: Introduction.....	1
1.01 <i>Burkholderia</i> Taxonomy .....	2
1.02 Clinical Importance of <i>Burkholderia</i> .....	5
1.03 Quorum sensing.....	6
1.04 Quorum sensing mechanisms in <i>B. cenocepacia</i> .....	8
1.04.01 AHL .....	8
1.04.02 Valdiazen .....	9
1.04.03 BDSF .....	10
1.05 Cyclic di-GMP .....	15
1.06 Biofilms.....	19
1.06.01 Biofilm development.....	19
1.06.02 Clinical relevance of biofilms .....	21
1.06.03 Heterogeneity within the biofilm .....	22
1.06.04 Components of the biofilm .....	23
1.06.05 Regulation of the <i>bep</i> operon .....	26
1.07 Objective of this study .....	29
Chapter 2: Materials and methods .....	31
2.01 Bacterial strains and growth and storage conditions. ....	32
2.02 Making of competent <i>E. coli</i> cells using Hanahan’s method. ....	34
2.03 Transformation of <i>E. coli</i> by heat shock .....	35
2.04 Preparation of electrocompetent cells and transformation of <i>E. coli</i> by electroporation.....	36
2.05 Transformation of <i>B. cenocepacia</i> by tri-parental mating.....	36
2.06 Techniques for DNA purification and analysis. ....	37
2.06.01 DNA manipulation.....	37
2.06.02 PCR techniques.....	37
2.06.03 Synthesis by Overlap Extension (SOE) PCR:.....	41
2.06.04 DNA sequencing:.....	41
2.06.05 Construction of expression vectors .....	41
2.06.06 Construction of markerless <i>B. cenocepacia</i> H111 deletion mutants, in-frame fusions and single point mutations .....	42
2.06.07 Construction of <i>lacZ</i> reporter for investigation of the <i>berB</i> promoter .....	46
2.07 Bacterial 2-hybrid analysis.....	46
2.08 Determination of $\beta$ -galactosidase activity .....	47
2.09 Colony morphology assay .....	48
2.10 Epifluorescence microscopy.....	49
2.11 Detection of BDSF production by cross streak assay.....	50

2.12 Quantification of BDSF production .....	50
2.13 Binocular microscopy: .....	51
2.14 Bacterial activation of <i>bep</i> operon activity:.....	52
2.15 Fungal activation of <i>bep</i> operon activity.....	52
2.16 Extraction of an insoluble structure from the H111 macrocolony.....	52
Chapter 3: Intracellular regulation of BerB by RpfR.....	55
3.01 Creation of a non-functional RpfF mutant .....	56
3.02 In search of the <i>berB</i> promoter.....	63
3.03 Examination of interactions between RpfR, RpfF and BerB by bacterial 2-hybrid assay.....	64
3.04 BerB-RpfR colocalisation.....	71
Chapter 4: Discussion, Part One.....	79
4.01 RpfF E138Q.....	80
4.02 RpfR-BerB interaction .....	81
Chapter 5: BerB and <i>bep</i> expression within the macrocolony.....	89
5.01 Distribution of BerB.....	90
5.02 BerB distribution over time.....	97
5.02.01 Observations: 0-12 hours.....	98
5.02.02 Observations: 12-24 and 24-36 hours.....	99
5.02.03 Observations: 48-120 hours.....	99
5.02.04 Remodelling of the biofilm.....	102
5.02.05 Day 5 to Day 14.....	103
5.03 Promoter activity reporters within the macrocolony.....	106
5.04 Difference in <i>bepB</i> expression within the wrinkled biofilm.....	113
5.05 <i>berB</i> and <i>bepB</i> expression at the single cell level.....	114
5.06 <i>B. cenocepacia</i> macrocolony response to the presence of a second bacterial strain.....	117
5.07 Bep production in H111 in the presence of <i>Pseudomonas putida</i> KT2442.....	120
5.08 H111 macrocolonies in the presence of a fungus.....	133
5.09 Insoluble structure within the H111 biofilm.....	138
Chapter 6: Discussion, Part Two.....	139
Chapter 7: Conclusions and future perspectives.....	149
Chapter 8. Supplementary information.....	155
Chapter 9. References.....	167
Appendix.....	175
Key Players and Individualists of Cyclic-di-GMP Signaling in <i>Burkholderia cenocepacia</i> .....	175
The BDSF quorum sensing receptor RpfR regulates Bep exopolysaccharide synthesis in <i>Burkholderia cenocepacia</i> via interaction with the transcriptional regulator BerB.....	192
<i>Curriculum vitae</i> .....	206
