Two Contributions on Branching Stable Processes

Dissertation

zur

Erlangung der naturwissenschaftlichen Doktorwürde

(Dr. sc. nat.)

vorgelegt der

Mathematisch-naturwissenschaftlichen Fakultät

der

Universität Zürich

von

Hairuo Yang

aus der

V. R. China

Promotionskommission

Prof. Dr. Jean Bertoin (Vorsitz)
Dr. Bastien Mallein (Gutachter)
Prof. Dr. Parthanil Roy (Gutachter)
Prof. Dr. Rémi Abgrall
Prof. Dr. Ashkan Nikeghbali

Zürich, 2023

Contents

1 Introduction **1**

1 Branching random walks 1

1.1 Branching random walks 2

1.2 Additive martingales 5

1.3 Smoothing transforms 10

2 Stable distributions and domains of attraction 14

2.1 Stable distributions on the real line 14

2.2 Branching stable processes 20

3 Domains of attraction of branching stable processes 28

3.1 Scaling limits of branching random walks 31

3.2 A branching stable limit theorem 33

4 Additive martingales in branching stable processes 38

2 Scaling limits towards branching stable processes **45**

1 Introduction 45

2 Preliminaries 51

2.1 Weak convergence to Uchiyama's branching process 51

2.2 Branching-stable processes and their trimmed versions . . . 58

3 A branching-stable limit theorem 62

3 Additive martingales in branching stable processes **69**

1 Introduction 69

2 Explicit description of the terminal value 76

3 Further properties 84

3.1 Construction of branching stable processes 84

3.2 Terminal values of additive martingales coincide 85

3.3 Self-decomposability 88
