

TWO ASPECTS OF MONODROMY
IN THE THEORY OF MOTIVES

Dissertation

zur

Erlangung der naturwissenschaftlichen Doktorwürde
(Dr. sc. nat.)

vorgelegt der

Mathematisch-naturwissenschaftlichen Fakultät

der

Universität Zürich

von

Emil Odd Olof Jacobsen

aus

Schweden

Promotionskommission

Prof. Dr. Joseph Ayoub (Vorsitz und Leitung der Dissertation)

Dr. Marco D'Addezio

Prof. Dr. Javier Fresán

Prof. Dr. Andrew Kresch

Zürich, 2023

Contents

Abstract	i
Contents	v
Acknowledgements	ix
General introduction	xi
I Malcev Completions and Fundamental Groups	1
1 Introduction	2
Affine group schemes over a field of characteristic zero	9
2 Preliminaries	9
3 Theorem U	17
4 Malcev completions	25
5 Theorem M	29
Fundamental groups	36
6 Enriched local systems and Hodge theory	36
7 De Rham fundamental groups	44
8 Motivic local systems	46
Appendix: colimits of Nori categories	48
II Towards the Motivic Picard–Lefschetz Formula	51
1 Introduction	52
2 Preliminaries	53
3 The case of special semi-stable morphisms	55
4 A sufficiently universal example	58
5 Proof of the main theorem	68
6 Towards the full formula	68
Bibliography	72
