

# Introduction to Cancer Biology

*SECOND EDITION*

**Robin Hesketh**

University of Cambridge

**CAMBRIDGE**  
UNIVERSITY PRESS

# Contents

Preface	<i>page ix</i>
<b>1. Lessons from Epidemiology</b>	<b>1</b>
1.1 Incidence of Cancer	2
1.2 Mortality from Cancer	3
1.3 Global Patterns of Cancer Incidence and Mortality	5
1.4 Global Trends	24
Conclusions	28
Key Points	29
Further Reading	29
Review Questions	30
<b>2. Causes of Cancer</b>	<b>31</b>
2.1 Accumulating Mutations	32
2.2 Food and Drink	35
2.3 Obesity	44
2.4 Infection	49
2.5 Radiation	50
2.6 Stress	63
2.7 Tobacco	63
Conclusions	68
Key Points	69
Further Reading	70
Review Questions	70
<b>3. Genetic Analysis of Cancer</b>	<b>72</b>
3.1 Human Genome Sequencing	73
3.2 The Pan-Cancer Project	84
3.3 Bioinformatics	85
3.4 Exome Sequencing	86
3.5 The Genome Aggregation Database (gnomAD)	87
3.6 The Genomic Cancer Message	90
3.7 The Grand Vista	91

Conclusions	92
Key Points	92
Further Reading	93
Review Questions	93
<b>4. Signalling in Normal Cells</b>	<b>94</b>
4.1 Talking to Cells	95
4.2 Mitogenic Activation of Cell-Cycle Progression	107
4.3 Cytokine Receptors	111
4.4 G-Protein-Coupled Receptors	112
4.5 Ligand-Gated Ion Channels	113
4.6 Steroid Hormones	114
4.7 Positive and Negative Signals Controlling Cell Growth	117
4.8 Flower Proteins	118
Conclusions	119
Key Points	120
Further Reading	120
Review Questions	120
<b>5. 'Cancer Genes': Mutations and Cancer Development</b>	<b>121</b>
5.1 Collecting Mutations	122
5.2 Mutations in 'Cancer Genes': Oncogenes and Tumour Suppressor Genes	124
5.3 DNA Repair	158
5.4 Hereditary Cancers	159
5.5 DNA Repeats Itself	161
5.6 Polymorphisms and Cancer	162
5.7 MicroRNAs	163
5.8 The Cancer Genomic Landscape	166
Conclusions	167
Key Points	168
Further Reading	168
Review Questions	169
<b>6. What Is a Tumour?</b>	<b>170</b>
6.1 Benign and Malignant Cancers	171
6.2 Types of Malignant (Non-Benign) Cancer	174
6.3 What Makes a Cancer Cell a Cancer Cell?	175
6.4 Stem Cells	212
6.5 How Do Metastatic Tumour Cells Know Where To Go?	213
6.6 How Does Cancer Kill You?	220
Conclusions	221
Key Points	221

Further Reading	222
Review Questions	222
<b>7. Cancer Signalling Networks</b>	<b>223</b>
7.1 Controlling Cell Division	224
7.2 Cancer and Cell Senescence	227
7.3 Tumourigenic DNA Viruses	229
7.4 Signalling Pathways that Impact on the Central Axis	230
7.5 Cellular Responses during Tumour Development	246
7.6 Signalling and Systems Biology	246
Conclusions	249
Key Points	249
Further Reading	249
Review Questions	250
<b>8. Cancer Detection, Diagnosis and Radiotherapy</b>	<b>251</b>
8.1 Imaging Tumours	252
8.2 Staging, Diagnosis, Grading and Monitoring Cancers	254
8.3 Radiation Therapy (Radiotherapy)	255
8.4 Tumour Biomarkers	257
8.5 Tumour Imaging and Molecular Imaging	259
8.6 Proteomics	269
8.7 Metabolomics	271
8.8 Gene Expression Profiling	271
8.9 Protein Imaging	273
Conclusions	274
Key Points	274
Further Reading	275
Review Questions	275
<b>9. Cancer Chemotherapy</b>	<b>276</b>
9.1 Magic Bullets and Chemotherapy	276
9.2 The Development of Anti-Cancer Drugs	277
9.3 Classes of Targets for Anti-Cancer Drugs	280
9.4 Drug Resistance	299
9.5 Drug Development	303
9.6 The Expanding Field of Cancer Treatment	304
9.7 The Efficacy of Chemotherapy	306
Conclusions	307
Key Points	307
Further Reading	308
Review Questions	308

<b>10. The Future of Cancer Detection and Treatment</b>	<b>309</b>
10.1 The Breadth of Approaches to Cancer Therapy	310
10.2 Epigenetics	326
10.3 Nano-Oncology	330
10.4 DNA Nanorobots	333
10.5 Liposome Therapy	334
10.6 Drug Delivery from Inert Capsules	335
10.7 Three-Dimensional Tumour Printing	335
10.8 Targeted $\alpha$ -Particle Therapy	337
10.9 Personal Versus Impersonal Medicine	337
10.10 Breast Cancer Mutational Signatures	341
10.11 The Breast Tumour Microenvironment	342
10.12 The Way Forward	343
Conclusions	346
Key Points	347
Further Reading	347
Review Questions	348
 Appendix A: Tumour Grading and Staging	 349
Appendix B: Classes of Major Oncoproteins	352
Appendix C: Major Tumour Suppressor Genes	353
Appendix D: Ten Major Cancers at a Glance	354
Glossary and Abbreviations	375
References	398
Index	439
