Introduction: Myths and Darwin KOSTAS KAMPOURAKIS	1
Myth 1 That Myths Are Simple Falsehoods JOHN L. HEILBRON	14
Myth 2 That Most European Naturalists Before Darwin Did Not Think That Species Change Was Possible PIETRO CORSI	24
Myth 3 That Charles Darwin Was Not Directly Influenced by the Evolutionary Views of His Grandfather Erasmus PATRICIA FARA	36
Myth 4 That Darwin Always Rejected the Argument from Design in Nature and Developed His Own Theory to Replace It MICHAEL RUSE	47
Myth 5 That Darwin Converted to Evolutionary Theory During His Historic Galápagos Islands Visit FRANK J. SULLOWAY	56
Myth 6 That Darwin's Galápagos Finches Inspired His Most Important Evolutionary Insights FRANK J. SULLOWAY	68
Myth 7 That Darwin Was a Recluse, and a Theoretician Rather Than a Practical Scientist ALISON M. PEARN	80
	vii

Myth 8	That Darwin Rejected Lamarck's Ideas of Use and Disuse and of the Inheritance of Acquired Traits RICHARD W. BURKHARDT, JR.	91
Myth 9	That Darwin's Theory Was Essentially Complete Once He Came Up with the Idea of Natural Selection ALAN C. LOVE	103
Myth 10	That Darwin Delayed the Publication of His Theory for Twenty Years, Being Afraid of the Reactions It Would Cause JOHN VAN WYHE	115
Myth 11	That Wallace's and Darwin's Theories Were the Same, and That Darwin Did Not Reveal Wallace's 1858 Letter and Theory Until He Ensured His Own Priority MICHAEL RUSE	127
Myth 12	That Huxley Was Darwin's Bulldog and Accepted All Aspects of His Theory PETER J. BOWLER	137
Myth 13	That Huxley Defeated Wilberforce, and Ridiculed His Obscurantism, in the 1860 Oxford Debate JOHN HEDLEY BROOKE	148
Myth 14	That Darwin's Critics Such as Owen Were Prejudiced and Had No Scientific Arguments NICOLAAS RUPKE	159
Myth 15	That Natural Selection Can Also Be Accurately Described As the Survival of the Fittest DAVID DEPEW	171
Myth 16	That Darwin Banished Teleology from Biology JAMES G. LENNOX	181
Myth 17	That Darwin's Success Depended on Undermining "Aristotelian Essentialism" JAMES G. LENNOX	193
Myth 18	That Darwin's Theory Would Have Become More Widely Accepted Immediately Had He Read Mendel's 1866 Paper GREGORY RADICK	204

Myth 19	That Darwin Faced a Conspiracy of Silence in Lamarck's Country LIV GRJEBINE	216
Myth 20	That Hitler Endorsed and Was Influenced by Darwin's Theory ROBERT J. RICHARDS	228
Myth 21	That Sexual Selection Was Darwin's Afterthought to Natural Selection KIMBERLY A. HAMLIN	239
Myth 22	That Darwin's Hatred of Slavery Reflected His Beliefs in Racial Equality ERIK L. PETERSON	250
Myth 23	That the Discovery of <i>Australopithecus</i> in 1925 Belatedly Confirmed Darwin's 1871 Scientific Prediction of African Human Origins EMILY M. KERN	262
Myth 24	That Darwin's Theory Brought an Instant and Immediate Revolution in the Life Sciences SHRUTI SANTOSH AND ANYA PLUTYNSKI	273
	Conclusion: What Inferences About Science Can We Draw from Charles Darwin's Life and Work? KOSTAS KAMPOURAKIS	286

1.1	Charles Darwin in 1857	page 8
1.2	The house of Charles Darwin (Down House) in Kent: Darwin's study (above) and the exterior (next page)	11
1.1	Galileo's demonstration at the Tower of Pisa	21
2.1	Isidore Geoffroy Saint-Hilaire	25
3.1	Erasmus Darwin, Charles' grandfather	37
4.1	William Paley	48
5.1	Map of the Galápagos Islands showing Darwin's route through the archipelago aboard H.M.S <i>Beagle</i>	58
5.2	A page from Darwin's <i>Beagle</i> voyage specimen catalogue showing some of his Galápagos birds	61
5.3	Darwin's four Galápagos mockingbird specimens	63
6.1	Five of the type specimens of Darwin's Galápagos finches	69
6.2	Darwin's request for island locality information for the Galápagos birds included in Captain Robert FitzRoy's collection	70
6.3	Darwin's record of responses to his request for locality information for the Galápagos finches collected by his servant, Syms Covington, whose birds had been acquired by ornithologist Thomas Eyton, as well as localities for the finches collected by Harry Fuller, which were still in the possession of Captain FitzRoy	71
6.4	Four of the Galápagos finch species, depicted in the second edition of Darwin's <i>Journal of Researches</i>	76
7.1	Darwin's experimental specimen of <i>Cassia corymbosa</i> "awake," "shaken" and "asleep"	87
7.2	Compound microscope bought from Smith & Beck in 1847 and used by Darwin for his research on barnacles	88
8.1	Jean Baptiste Pierre Antoine de Monet, chevalier de Lamarck	92
8.2	Francis Galton (left) and August Weismann (right)	99
9.1	Darwin's famous branching diagram from Notebook B in 1837	110
9.2	Darwin's only figure in the <i>Origin of Species</i>	112

10.1	Natural History Museum Darwin Exhibition poster, 2009	117
10.2	Photograph of Joseph Dalton Hooker by Lock & Whitfield 1878	119
11.1	Alfred Russel Wallace	128
12.1	Thomas Henry Huxley in 1877	138
12.2	<i>Punch</i> , May 18, 1861, “Monkeyana”	142
13.1	<i>Vanity Fair</i> caricature of Samuel Wilberforce, Bishop of Oxford (1869, left (a)) and Thomas Henry Huxley (1871, right (b))	149
14.1	Richard Owen	160
14.2	Human fetal skeleton, showing Owen’s version of the vertebral theory of the skull in support of his structuralist approach to morphology	163
15.1	Herbert Spencer	173
16.1	Asa Gray, the Harvard botanist with whom Darwin had the longest running and most significant exchange of correspondence dealing with the subjects of design in nature and religious belief	184
16.2	Batesian Mimicry	191
17.1	Aristotle’s statue, in Aristotle’s park, Stagira, Halkidiki, Greece	194
18.1	Gregor Mendel, 1862	205
18.2	William Bateson (right) with his collaborator Reginald Punnett (left)	206
18.3	Walter Frank Raphael Weldon	209
19.1	(Left) Etienne Geoffroy Saint-Hilaire; (Right) Georges-Léopold-Chrétien-Frédéric-Dagobert, Baron Cuvier	218
19.2	Jean-Louis-Armand de Quatrefages de Bréau	221
20.1	Ernst Haeckel	229
21.1	Highly decorated male hummingbirds provided evidence of sexual selection at work	244
22.1	In the wake of Darwin, old racism received a new scientific justification and lexicon	260
23.1	Raymond Dart with the Taungs skull in 1925	263
24.1	<i>Punch</i> , May 25 1861, p.213, Satirical cartoon “The Lion of the Season”	279
24.2	Fleeming Jenkin	280
C.1	The conceptual foundations of Darwin’s theory, which was based on three analogies, and the arguments in the <i>Origin of Species</i>	288
C.2	Darwin in 1878 photographed by his son Leonard Darwin	293
C.3	Henrietta Emma Darwin	294
C.4	Antoinette Louisa Brown Blackwell	297
C.5	Mary Treat	298
C.6	Lydia Ernestine Becker	299
