Contents

<i>List of figures</i>	<i>viii</i>
<i>List of tables</i>	<i>x</i>
<i>Preface</i>	<i>xi</i>
<i>Acknowledgments</i>	<i>xvi</i>
<i>Note on data and maps</i>	<i>xviii</i>
1 Pasts: toward a critical paleoeconomics	1
2 Cities: archaeology and egalitarian urbanism	34
3 Citadels: the low-growth birth of stratified economies	68
4 Measurement: a deep history of political metrology, money and value	105
5 Merchants: Bronze Age millionaires and the rise of the affluent classes	148
6 Billionaires: the Iron Age origin of oligarchy	182
7 Futures: summarizing critical paleoeconomics	211
<i>Bibliography</i>	<i>221</i>
<i>Index</i>	<i>261</i>

Figures

1.1	Relative global frequency trends of the word ‘entrepreneur’ compared to ‘business’ and ‘businessman’ from Google’s Ngram text database of English literature from 1950	12
1.2	Map of the key regions and sites discussed in the book	18
1.3	Summary table of all chronological periods discussed in the book	31
2.1	Map of global distribution of Neolithic megasites and egalitarian cities	36
2.2	Diagram showing comparative spatial footprints excavated areas or extant mounded areas that are detectable using Google satellite imagery (accessed 2022) of early cities and megasites	39
2.3	Early and late phase city plans in Area DK-G of Mohenjo-daro	47
2.4	Cylinder seal from 3rd millennium Mesopotamia	51
2.5	Clustered mounds of Jenné-jeno and their alluvial context	53
3.1	Map of global citadel distribution during Neolithic and Bronze Age periods	70
3.2	Diagram showing comparative spatial footprints of early citadels	71
3.3	Violin plots showing comparison between estimates of population, settlement size and mean demic density for citadels, citadelized cities and cities	72
3.4	Iberian Chalcolithic Millaran citadel at Los Millares: (a) overhead shot of Los Millares fortifications, esp. Main gate; (b) landscape shot of Los Millares fortifications, esp. Main gate; (c) reconstruction shot of Los Millares fortifications, esp. Main gate	77
3.5	Shimao Enclosure citadel: (a) jade from East Gate; (b) jades embedded in East Gate; (c) Shimao burial, with jade bracelets; skull pit	79
3.6	Late Bronze Age Bactro-Margiana Archaeological Complex (BMAC) citadel at Ulug Depe: (a) alabaster grave goods; (b) alabaster grave goods; (c) gold, lapis, agate and carnelian grave goods	83
3.7	Gold artifacts from the Mapungubwe burials	87

3.8	Iron Age Zimbabwe Enclosure citadel at Great Zimbabwe: (a) the conical tower; (b) closeup of architecture	88
3.9	Southwest United States Ancestral Pueblo Great House citadel at Pueblo Bonito: (a) cacao consumption vessels from Pueblo Bonito; (b) turquoise from Room 33, Pueblo Bonito	91
3.10	Diagram showing comparative spatial footprints of early citadels, cities and later citadelized-cities	94
4.1	Map of showing the distribution of Neolithic (and Chalcolithic?) tokens	117
4.2	Map of the distribution of balance weights during Bronze Age	133
4.3	Chart showing the statistical distribution of mass magnitudes for confirmed weights, Bronze Age unit 'systems' compared	144
5.1	Map showing merchant settlements and trade routes of the Ur III and Old Babylonian periods: Ur, Nippur, Sippar, Mari, etc. Inset shows location of South West Asia on world map	164
5.2	Map showing merchant settlements and trade routes from the Old Assyrian period: Kanesh etc	169
5.3	Schematic drawing of the OA trade system	170
5.4	Map showing merchant settlements and trade routes from the Ugaritic period: Ugarit, Carchemish, Assur, Nineveh, Babylon Hattusha, Ura	177
6.1	Map of Eurasia showing the distribution of coinage-using societies by 100 BC	184
6.2	Chronological representation of changing maximum accumulated private wealth inequality ratios (y-axis on logarithmic scale, ratios also depicted as relative lollipop circle size) from 3000 BC to 2000 AD (top) and zoomed in 3000 BC to 200 BC (bottom). Sources of wealth indicated (agrarian = circles with dashed lines and non-agrarian = diamonds with dashed lines), and example individuals labeled	192
7.1	Schematic grid showing outcome of different rates of growth and configurations of capital	213
7.2	Schematic grid showing typological relationship between cities, citadels and citadelized cities	214

Tables

4.1	Metrology, mensuration and pseudo-metrology: ritual <i>determination of the relationship between things</i>	109
4.2	Political priorities around metrology for different social groups within Bronze Age societies	112
4.3	Modes of metrology, measuring instruments and their product associations of West Asia (and Egypt) during the Bronze Age and Early Iron Age	130
6.1	Maximum accumulations of private agrarian wealth	190
6.2	Maximum accumulations of private non-agrarian wealth	193
