

School **NEUROPSYCHOLOGY**

A Practitioner's Handbook

SECOND EDITION

Margaret Semrud-Clikeman
Catherine A. Fiorello
James B. Hale

Foreword by Elaine Fletcher-Janzen

THE GUILFORD PRESS
New York London

Contents

Introduction	1
Recognizing and Applying Neuropsychological Principles	1
The Book's Purpose and Structure	6
 Chapter 1 Assessment and Intervention Practices in Educational Settings	 8
Foundations of Intellectual and Cognitive Assessment	8
Measuring Intellectual and Cognitive Functioning	13
Principles of Effective Assessment in the Schools	19
Critical Issues in Assessment Service Delivery	47
Appendix 1.1. Further Readings in the Intelligence Debate	54
 Chapter 2 A Model of Brain Functioning	 55
A Developmental Perspective	55
A Review of Major Brain Structures	58
The Three-Axis Model of Brain Functioning	62
An Axis Divided: I. Visual Processes and the Occipital Lobe	67
An Axis Divided: II. Auditory Processes and the Temporal Lobe	72
An Axis Divided: III. Somatosensory Processes and the Parietal Lobe	76
An Axis Integrated: Higher-Level Processes and the Frontal Lobe	80
The Left-Right Axis and the Cerebral Hemispheres	86
The Superior-Inferior Axis and Frontal-Subcortical Function	96
The Integrated Brain: The Three Axes Summarized	99
Appendix 2.1. Glossary of Neuropsychological Terms	100
 Chapter 3 Neuropsychological Approaches to Assessment Interpretation	 105
Developmental Neuropsychological Assessment	105
The Scientific Method in Neuropsychological Assessment	112
Interpreting Test Results from a Neuropsychological Perspective	127
The CHT Approach to Report Writing	147
Appendix 3.1. Ecological Validity Examples of Brain Dysfunction	158
Appendix 3.2. Blank Brain: Superior View	160
Appendix 3.3. Blank Brain: Lateral View	161

Chapter 4	Linking Assessment to Intervention	162
	The Evidence-Based Balanced Practice Model	162
	Assessment Tools for CHT	170
	Behavioral Neuropsychology and Problem-Solving Consultation	185
	Linking Assessment to Intervention: A Case Study	200
	Appendix 4.1. Demands Analysis	208
	Appendix 4.2. Brief Demands Analysis	210
	Appendix 4.3. Cognitive Hypothesis-Testing Worksheet	211
	Appendix 4.4. Neuropsychological Assessment Observations Checklist	214
	Appendix 4.5. Psychological Processes Worksheet	216
Chapter 5	The Neuropsychology of Reading and Reading Disorders	219
	Reading and Brain Functioning	219
	Instructional Strategies for Children with RDs	243
	Linking Assessment to Intervention	244
	Appendix 5.1. Word Recognition Interventions	247
Chapter 6	The Neuropsychology of Mathematics Disorders	248
	Characteristics of Children with Mathematics Disorders	248
	Defining and Differentiating MD from Other Math Problems	255
	Instructional Strategies for Children with MDs	264
	Math Case Study: Linking Assessment to Intervention	265
	Appendix 6.1. Mathematics Interventions	270
Chapter 7	The Neuropsychology of Written Language Disorders	271
	The Complexity of Written Language	271
	WLD and Brain Function	273
	Written Language Case Study	289
	Appendix 7.1. Spelling Interventions	292
	Appendix 7.2. Written Language Interventions	293
Chapter 8	The Neuropsychology of Autism Spectrum Disorder, Nonverbal Learning Disorder, and Attention-Deficit/Hyperactivity Disorder	294
	Autism Spectrum Disorder	294
	Nonverbal Learning Disorder	297
	Attention-Deficit/Hyperactivity Disorder	301
	ADHD Case Report	313
Chapter 9	Neuropsychological Principles and Psychopathology	319
	Neurological Underpinnings of Children's Mental Health	320
	A New Way of Looking at Psychopathology	324
	Assessment	326
	Selected Childhood Disorders	330
	Neuropsychopathology	341
	ADHD with Anxiety Case Report	343

Chapter 10 Neuropsychology of Chronic Medical Disorders	346
Is Medicine Relevant for the Practice of School Neuropsychology?	346
Neurodevelopmental Insults Affecting Neuropsychological Functioning	347
Infectious Diseases and Neurotoxins	353
Neuropsychology of Epilepsy	356
Acquired Brain Injuries Affecting Neuropsychological Functioning	359
 Chapter 11 Common Genetic Disorders in Childhood	 364
The Basics of Genetics	364
Autosomal Dominant Disorders	365
Autosomal Recessive Disorders	368
X-Linked Disorders	369
Structural Abnormalities in Genetic Disorders	371
Genetic Disorders Case Report	373
 References	 377
 Index	 437

Purchasers of this book can download and print copies
of Appendices 3.2, 3.3, 4.1, 4.2, 4.3, 4.4, and 4.5 at
for personal use
or use with students (see copyright page for details).
