

The Importance of Being Educable

A NEW THEORY OF
HUMAN UNIQUENESS

Leslie Valiant

PRINCETON UNIVERSITY PRESS
PRINCETON AND OXFORD

CONTENTS

Preface	xiii
1 The Civilization Enabler	1
<i>Cleverness Is Not Enough</i>	1
<i>The Civilization Enabler</i>	3
<i>Knowledge Accumulation</i>	9
<i>A Computational Approach</i>	11
<i>Why Computation?</i>	13
2 Where We Come From	16
<i>Darwin's Challenge</i>	16
<i>The Brain</i>	18
<i>The Difficulty of Invention</i>	20
<i>Distinguishers, but Not Civilization Enablers</i>	21
3 Where We Have Got To	26
<i>Pervasiveness of Education</i>	26
<i>Education in the Large</i>	30
<i>Educability Is Different from IQ</i>	31

4	Some Foundation Stones	35
	<i>Acquiring and Applying Belief Systems</i>	35
	<i>Learning from Examples</i>	39
	<i>Generalization</i>	44
	<i>Large Memory</i>	47
	<i>Symbolic Names</i>	48
	<i>Teaching</i>	53
	<i>Chaining</i>	58
	<i>A Mind's Eye</i>	59
	<i>The Rest of Cognition</i>	61
5	Computation for Describing Natural Phenomena	66
	<i>Turing Computation</i>	66
	<i>Probably Approximately Correct Learning</i>	68
	<i>Robust Models of Computation</i>	77
6	Integrative Learning	81
	<i>Putting Experiences Together</i>	81
	<i>Augmenting Learning with Reasoning</i>	84
	<i>Robust Logic</i>	87
	<i>Knowledge as Rules</i>	90
	<i>Tolerance of Inconsistency</i>	93
	<i>Rules as Learned Classifiers</i>	95
	<i>The Power of Learning</i>	97
	<i>Chaining with Equivalences</i>	100
	<i>Teaching by Example</i>	101
	<i>Innate and Acquired Attributes</i>	103
	<i>Imagination and Novelty</i>	103

7	What Integrative Learning Does	107
	<i>Compounding Knowledge</i>	107
	<i>Soundness of Chaining</i>	108
	<i>World without Reason?</i>	110
	<i>Modularity and Partial Information</i>	112
	<i>Was Pavlov's Dog Right?</i>	114
	<i>Exploiting Modularity</i>	115
	<i>The Patchwork Tapestry</i>	116
8	The Capability of Being Educable	119
	<i>The Crux</i>	119
	<i>An Educable Learning System</i>	120
	<i>More on Symbolic Names</i>	122
	<i>Rules Acquired by Instruction</i>	127
	<i>Scene Management</i>	129
	<i>Belief Choice</i>	130
9	Educability as a Model of Computation	133
	<i>Evolutionary Plausibility</i>	133
	<i>The Model Is Explanatory</i>	134
	<i>Teaching to Reason</i>	135
	<i>Measures of Cognition</i>	140
	<i>Universality</i>	142
	<i>The Educability Model Has Robustness</i>	144
10	Promoting Educability	147
	<i>Educability as an Individual Capacity</i>	147
	<i>Educability of a Population</i>	149

	<i>Measuring Educability</i>	152
	<i>Long-Term Retention</i>	155
11	Artificial Educability	156
	<i>Fear of Technology</i>	156
	<i>The Imitation Game</i>	157
	<i>Beyond the Imitation Game</i>	159
	<i>AI</i>	161
	<i>Large Language Models</i>	167
	<i>Beyond Efficient Generalization</i>	170
	<i>Integrative Learning Technology</i>	172
	<i>Educable Technology</i>	179
	<i>Natural versus Artificial</i>	181
	<i>The Challenge of Teaching Materials</i>	183
	<i>No Technological Singularity</i>	184
12	Education: Some Questions	190
	<i>Education as a Right</i>	190
	<i>The Study of Education</i>	191
	<i>A Different Vantage Point</i>	193
	<i>In the Classroom</i>	194
	<i>Teaching Materials</i>	198
	<i>Education and Propaganda</i>	199
	<i>Propaganda Safety</i>	203
	<i>Saturation</i>	207

13 A Species Adrift	209
<i>Human Sacrifice</i>	209
<i>At Sea</i>	211
<i>The Case of Isaac Newton</i>	213
<i>Belief Systems: Good and Bad</i>	214
<i>Science as a Belief System</i>	217
<i>The Scientific Revolution</i>	219
<i>Equality</i>	221
<i>Worldviews</i>	224
 Acknowledgments	 227
Summary of Terminology	229
Notes	231
Index	247
