

A Social Ecology of Capital

Éric Pineault

PLUTO  PRESS

Contents

<i>List of Figures</i>	vi
<i>List of Tables</i>	vii
<i>Acknowledgments</i>	viii
 Introduction	 1
1. The Material Flow	31
2. Nature's Work: The Ecology of the Material Flow	56
3. Metabolic Regimes in a Historical Perspective	73
4. Fossil-Based Industrial Metabolism	90
5. On Capitalist Metabolism	119
6. Accumulation and Social Metabolism in the Great Capitalist Acceleration	133
Conclusion: Emancipation Amid the Ruins of Fossil Metabolism	155
 <i>Index</i>	 163

List of Figures

1.1	Basic throughput structure	34
1.2	Throughput according to material flow accounting	35
1.3	Global material flows, 1970–2017	37
1.4	Material consumption by world region, Gt per capita, 1970–2015	38
1.5	Material footprint per capita, 1990–2015	40
1.6	Domestic extraction of world by material group, 1970–2017	42
1.7	Global material flows, 2017	43
1.8	Metabolic model of the economic process as throughput	46
1.9	The four points of the economic process as throughput	47
1.10	Metabolism as a stock flow practice nexus	52
2.1	Throughput as biophysical work	68
2.2	Mass throughput flow as entropy	69
3.1	Agrarian metabolic cycle	84
4.1	Global primary energy consumption by source, 1800–2019	98
4.2	Global material extraction, 1900–2015	99
4.3	Global material extraction by use type, 1900–2015	100
4.4	Domestic Processed Output (DPO), 1900–2015	101
4.5	Net additions to stock, 1900–2015	102
4.6	In-use stocks of materials, 1900–2015	103
4.7	Material intensity of global economy, 1900–2015	105
4.8	The labor process as metabolism	108
4.9	Structure of fossil industrial metabolism	111
5.1	Energizing the labor hour: US experience, 1900–2000	126
5.2	Useful work per labor hour, 1900–1999	126
5.3	Capital and Entropy	128
5.4	The metabolic structure of capitalist accumulation	130
6.1	Capitalist determination of the throughput	146

List of Tables

1.1	Metamorphosis of the throughput	45
3.1	Socio-metabolic regimes and energy	77
4.1	Salient features of agrarian and fossil-industrial metabolism	96
4.2	Power and the socio-metabolic transition	109
