

# **The Pharos Lighthouse in Alexandria**

Second Sun and Seventh  
Wonder of Antiquity

**Andrew Michael Chugg**

# Contents

<i>Preface</i>	<i>vii</i>
<i>List of Figures</i>	<i>viii</i>

1 The Genesis of the Pharos	1
2 The Fame of the Pharos	24
3 The Fate of the Pharos	42
4 Fantasies of the Pharos	56
5 The Form of the Pharos	70
6 The Technical Task of Contriving Tall Towers	95
7 The Pharos' Height From the Range of Its Light	103
8 The Crowning Statue and Other Adornments	115
9 The Light of the Pharos	137
10 A Framework for Reconstruction	163
11 Towards a Virtual Pharos	177
12 The Modern Legacy of an Antique Wonder	179

Appendix A: Evidence and Antique Testimony	181
Appendix B: Alfred Butler on the Pharos	199
<i>Bibliography</i>	205
<i>Index</i>	210

# Figures

1.1	Summary chart from a more detailed map of the seas around Alexandria published by the Ministère des Travaux Publics in France in 1882 (author's collection).	2
1.2	Mahmoud Bey's 1866 Plan of Ancient Alexandria on the basis of excavations with enlarged view of the Pharos (Phare) – map from author's collection.	15
1.3	The unique Posidippus papyrus for the two epigrams mentioning Pharos (photo published by Henri Weil in 1879).	17
1.4	Cornelius de Bruyn: detail of his engraved view of the Great Harbour of Alexandria in about 1681 showing the site of the Pharos (Qait Bey fortress marked A) and the nearby rock called Le Diamant behind the sloop with a triangular sail (author's collection).	19
2.1	The Ptolemaic tower at Taposiris Magna imitating the form of the upper reaches of the Pharos from Planche 43 of <i>Antiquités Vol V</i> in the <i>Description de l'Égypte</i> (author's collection).	31
2.2	TOP: Bronze hemidrachm of Hadrian from the eleventh year (ΛΕΝΑΕΚΑΤΟΥ) of his reign depicting the Pharos with a long approach ramp supported on arches, Tritons at the upper corners of the square first stage, a somewhat octagonal second stage and the crowning statue on a third stage podium; the obverse is a laureate cloaked profile bust of the emperor with the legend ΑΥΤΚΑΙ ΤΡΑΙΑΔΡΙΑΚΕΒ (author's collection). CENTRE: Bronze (hemi)drachm of Antoninus Pius from the fifth year (ΛΕ) of his reign depicting the Pharos with approach ramp, windows, phallic Tritons blowing conch trumpets, a statue at the summit bearing a sphere and holding a spear; the obverse is a laureate profile bust of the emperor with the rare legend ΑΥΤΚΡΑ ΚΑΙC ΑΔΡ ΑΝΤΩΝΙΝΟC (author's collection). BOTTOM: Bronze Hemidrachm of Alexandria depicting the Pharos Lighthouse and struck under Domitian in 93–94CE with obverse legend ΑΥΤΚΑΙC ΘΕΟYΙΟC ΔΟΜΙΤCΕΒ ΓΕΡΜ (author's collection).	32

2.3	Drachm minted in Alexandria in the eighteenth year (LIH) of the reign of Hadrian depicting the goddess Isis holding a billowing sail and a sistrum with the Pharos Lighthouse to the right and obverse legend ΑΥΤΚΑΙCΤΡΑΙΑΝ ΑΔΡΙΑΝΟCCEB (author's collection).	33
2.4	Billon tetradrachm minted in Alexandria in the twenty-ninth (LKΘ) year (187–188CE) of the reigns of Commodus and his father Marcus Aurelius depicting a galley sailing past the Pharos Lighthouse on the left and bearing the obverse legend ΜΑΚΟΜΑΝΤΩ CΕΒΕΥCΕΒ (author's collection).	33
2.5	Engraved gem seal depicting the Pharos and the Goddess Isis Pharia (Vienna Kunsthistorisches Museum, No XI, 991, drawing by the author).	36
2.6	Blue glass intaglio ancient scene of the Pharos on a seal reproduced in Empereur, <i>Le Phare d'Alexandrie</i> , p. 32 – Poseidon with his trident should be holding a dolphin by analogy with coins portraying the same statue (foot resting on rock or prow or dolphin) – sketch by the author.	37
2.7	A Roman mosaic depicting the Pharos and a ship now in the Palazzo dei Conservatori, Rome – photo courtesy of Stephen Chappell.	38
2.8	The Pharos depicted on a glass bottle from a Roman tomb in Slovenia – sketch by the author.	39
3.1	Ugo Comminelli – detail of his plan of Alexandria from 1472 showing the ruins of the Pharos – from the author's copy of Gaston Jondet, <i>Atlas historique de la ville et des ports d'Alexandrie</i> , Mémoires de la Société Sultanieh de Géographie 2, Cairo, 1921.	44
3.2	A surviving tower in the modern Shallalat Gardens from the Ptolemaic walls of ancient Alexandria comprising limestone blocks with drafted margins of the order of a metre wide – photo by the author.	46
3.3	Montage of photos by the author of the display at the Kom el-Dikka Archaeological Park in central Alexandria of items salvaged during the submarine archaeology campaigns off Fort Qait Bey: Ptolemaic statue fragments (centre right); granodiorite Corinthian capital (above) from the time of Constantine; pink granite papyriform columns; granodiorite sphinx of the New Kingdom (centre left).	49
3.4	Mosaic view of the Pharos from the Basilica di San Marco in Venice – drawing by the author.	50
3.5	Drawing of the Pharos by the Andalusian traveller, Abu Hamid Al-Gharnati, who visited in 1110CE and 1117CE – redrawn by the author from a sixteenth-century manuscript.	51

3.6	The submarine scatter of debris blocks northwest of Fort Qait Bey associated with the Pharos collapse as plotted by the IFAO-CEA divers in a placard displayed at the Kom el-Dikka Archaeological Park – photo by the author.	52
3.7	Predicted horizontal spread of Pharos collapse debris by analogy with a landslide caused by the failure of a retaining wall for maximal and minimal estimates of the Pharos volume – graph by the author.	53
4.1	Pirro Ligorio’s sixteenth-century evocation of the Pharos which was influenced by the Roman coinage of Alexandria and politely proposed Ichthyocentaurs in order to explain away the phalluses of the Tritons as forelegs and hooves (drawing by the author).	57
4.2	The Pharos of Alexandria, illustrated in 1572 by Philip Galle after Maerten van Heemskerck (one of his Eight Wonders series – author’s collection).	59
4.3	The sixteenth-century Latin poems <i>Concerning the Eight Wonders of the World</i> by Hadrianus Junius on which the Heemskerck-Galle set of Wonders was based.	60
4.4	German late seventeenth or early eighteenth century imaginative recreation of the Great Harbour of Alexandria and the Pharos (author’s collection).	61
4.5	A series of reconstructions from the eighteenth century adopted this imaginative form for the Pharos and the harbour of Alexandria (based on J.B. Fischer von Erlach’s Pharos, among the recreations of the Seven Wonders in his history of architecture published in 1721) – this early Italian version is from the author’s collection.	62
4.6	The Pharos in Seven Wonders of the World, Routledge 1867 by Dalziel (author’s collection).	63
4.7	“Lighthouse on the Pharos” from Bloss’ <i>Ancient History</i> (author’s collection) – still hinting at the influence of Heemskerck’s version but crossed anachronistically with the Tower of Babel.	64
4.8	Imaginative reconstruction of the Pharos from George Ebers, <i>L’Égypte: Alexandrie et le Caire</i> (author’s collection).	66
4.9	Reconstruction by Johann Heinrich Friedrich Adler from his book <i>Der Pharos von Alexandria</i> published in 1901 with inset detail of his statue of Isis Pharia (author’s collection).	67
4.10	An anonymous gouache painting from the early-twentieth century in the author’s collection based on the reconstruction by Thiersch, 1909 (treatment of the harbour breakwaters approximately follows Neroutsos Bey).	67

5.1	Bronze drachm of Antoninus Pius depicting Poseidon holding a trident and a dolphin on its reverse from the Alexandrian mint in Year 21 (LKA) of Antoninus Pius (Obverse legend: AYTKTAIAAΔP ANTΩNINOC CCEBEYC and from the author's collection).	72
5.2	Alexandria and its Pharos in a Jerash Mosaic: part of a 540CE mosaic paving in the Church of St John (drawing by the author).	74
5.3	The old Attarine Mosque in Alexandria originally built on the site of the Church of St Athanasius in the seventh century CE but reconstructed in 1084CE with a minaret that echoed the architecture of the nearby still-standing Pharos (author's collection).	75
5.4	Woodcut of Alexandria published in 1513 by Foresti di Bergamo with an intact three-stage tower in the location of the Pharos at the western side of the mouth of the Great Harbour (author's collection).	76
5.5	Walsh 1803 Qait Bey Fort still sporting its minaret, which was destroyed by British naval gunnery during an episode of "gunboat diplomacy" in 1882 (author's collection).	77
5.6	The Ugo Comminelli map of 1472 explicitly marks the ruins of the Pharos on the site of Qait Bey fortress on the spur of land at the eastern end of the Pharos peninsula – from the author's copy of Gaston Jondet, <i>Atlas historique de la ville et des ports d'Alexandrie</i> , Mémoires de la Société Sultanich de Géographie 2, Cairo, 1921.	78
5.7	<i>Description de l'Égypte</i> plan of the Qait Bey fortress – the central keep (here: "Fort du Phare") is believed to have been built on the foundations of the Pharos (author's collection).	79
5.8	De Bruyn view from the 1670s of the typical vaulting supported on columns in the ancient towers of the walls of Alexandria (author's collection).	80
5.9	Norden 1737 – section and plan through a subterranean cistern in Alexandria (author's collection).	81
5.10	Main entrance to the keep of the Qait Bey fortress taken during a visit by the author on 29 March 2019.	82
5.11	Side view of the keep of the Qait Bey fortress taken during a visit by the author on 29 March 2019.	82
5.12	The reconstruction of the Pharos published by Thiersch in 1909.	86
5.13	A proposed cross-section through the base stage of the Pharos showing how the octagonal section can be supported on rings of eight 2.4m diameter pink granite columns (diagram by the author).	88
5.14	Sketch of the core of helical arches concept by the author.	89

5.15	Reconstruction of the pink granite door jambs and lintel of the great portal of the Pharos from the fragments discovered in the offshore debris field (diagram by the author).	91
5.16	The Tower of the Romans (above on an antique postcard from the author's collection) and the ancient tower in the Shallalat Gardens (below in a photo by the author): examples of monumental early Ptolemaic masonry in Alexandria.	93
6.1	Cross-sections through round towers of cylindrical form (left) and conical form (right), the latter with uniformly tapering walls (diagrams by the author).	96
6.2	An optimally tapered tower could potentially reach up to infinite altitude (diagram by the author).	100
6.3	Hypothetical vertical cross-section through the tapering walls of the square base stage of the Pharos (diagram by the author – not to scale).	101
7.1	Eratosthenes' measurement of the circumference of the Earth (diagram by the author).	105
7.2	How Eratosthenes could have measured the distance to the Moon using a parallax method (diagram by the author).	106
7.3	Using the geolunar parallax of the Sun to measure the distance to the Sun (diagram by the author).	108
7.4	The geometry of the horizon of a tall tower (diagram by the author).	111
7.5	The distance to a sailor's horizon versus eye-height above sea-level (graph by the author).	112
7.6	The dependence of the distance to the sea-horizon at the peak of a tower upon the tower's height (graph by the author).	113
8.1	Qasr El-Libya East Church mosaic (540CE) (public domain photo, see <a href="https://commons.wikimedia.org/wiki/File:Mosaic_Ancient_Lighthouse_of_Alexandria.jpg">https://commons.wikimedia.org/wiki/File:Mosaic_Ancient_Lighthouse_of_Alexandria.jpg</a> ).	116
8.2	The glass beaker from Begram in Afghanistan supposed to bear an image of the Pharos possibly from the first century BCE (antique photo prior to a modern reconstruction of the beaker and showing a more complete righthand Triton).	118
8.3	Reverse of a Byzantine carved gem from the British Museum (No. 1886,0616.1) with a harbour scene including a lighthouse surmounted by a statue of Helios (sketch by the author).	121
8.4	Helios in a Roman mural from Pompeii (drawing by the author).	123
8.5	Alexander-Helios from the temple of Athena at Troy (drawing by the author).	124
8.6	Alexander-Helios in an ancient cameo of the third century CE that used to be kept in Cammin Cathedral but is now lost (drawing by the author).	125
8.7	Alexander-Helios Roman Ring (drawing by the author).	126

8.8	Capitoline Alexander-Helios – based on the Colossus of Rhodes, completed just around the same time as the Pharos when Rhodes was allied with the Ptolemaic Empire – an inspiration for the Alexander-Helios at the summit of the Pharos (1907 postcard in the author’s collection).	127
8.9	Reconstruction of the crowning statue of the Pharos by the author.	131
8.10	Helios wearing his radiate crown, probably modelled on the statue that stood at the summit of the Pharos, depicted on the reverse of a billon tetradrachm minted in Alexandria in 154–155CE (author’s collection).	132
8.11	Helios on a Drachm of Year 5 of Antoninus Pius 142CE (author’s collection).	132
8.12	Images of the Pharos on ancient coins and a gem suggesting the Tritons each blew a shell-trumpet, had a sinuous fish-tail and a prominent phallus (the latter being common on the Pharos hemidrachms of Hadrian and the tetradrachms of Commodus).	133
8.13	Reconstruction by the author of a Triton blowing a trumpet formed from conch shells; four of these decorated the upper corners of the first stage of the Pharos.	134
8.14	Alternative reconstruction by the author of a Triton holding a trident in his right hand.	135
9.1	Section through the upper stages of the Pharos according to Thiersch (1909).	140
9.2	View towards the southern horizon from a ship approaching Alexandria (diagram by the author).	143
9.3	The sensitivity of the human eye as a function of light wavelength (approximated with a Gaussian curve in a graph by the author).	151
9.4	The sensitivity of the human eye as a function of light frequency (graph by the author).	151
9.5	The emissive power of blackbody electromagnetic radiation from a body as a function of its temperature and the visible light portion of such radiation (graph by the author).	152
9.6	Framework for the analysis of the emissive power per solid angle of a spherical mirror illuminated by the Sun (diagram by the author).	157
9.7	Reflectance of a glass or polished crystal globe as a function of the angle between the light source and the viewer as seen from the centre of the globe (graph by the author).	159
10.1	Vertical section through the 120m tall likely form of the Pharos by the author.	166
10.2	Alternative horizontal sectional views or ground plans differing in the form of the internal ramp: a helical form (above) and a succession of linear flights hugging the interior walls (below) – diagrams by the author.	169

10.3	Detail of the 1866 Mahmoud Bey Plan of Ancient Alexandria showing the Pharos location and the “masonry at the water surface” running about 100m sou’-sou’-east into the waters of the Great Harbour (author’s collection).	172
11.1	Basis for the 3D recreation of the Pharos and of the statue of Alexander-Helios on its summit by the author.	178
