List of Figures *xvii*

List of Tables *xxi*

Section I Overview of First Principles Industrial Problem Solving *1*

1 Introduction *3*

1.1 A Familiar Story from Real Life, Or Why Do We Need FPS? *3*

1.2 When Does FPS Usually Get Involved? *4*

Reference *10*

2 First Principles Problem-Solving – Why First Principles? *11*

2.1 What Is a Zone 4 Problem? *17*

2.2 How Does First Principle Focus Help with Zone 4 Characteristic Problems? *19*

2.2.1 Multifactor Problems Are Helped by First Principle Focus *19*

2.2.2 Nonlinear Helped by First Principle Focus *23*

2.2.3 Managerial Interference Problems Are Helped by First Principle Focus *25*

2.2.4 Multifunctional Team Problems Are Helped by First Principle Focus *26*

2.2.5 Costly Symptoms Problems Are Helped by First Principle Focus *26*

2.2.6 Life-of-the-Plant Problems Are Helped by First Principle Focus *27*

2.2.7 Counterintuitive in Nature Problems Are Helped by First Principle Focus *28*

2.2.8 New Science Problems Are Helped by First Principle Focus *29*

2.2.9 Perceived Personal Loss Problems Are Helped by First Principle Focus *29*

2.3 Final Thoughts on First Principles Problem-Solving – Why First Principles? *30*

3	Opportunity Identification/Definition – Initial Team Formation	31
3.1	Chronic Issue or Crisis?	31
3.1.1	Crisis	31
3.1.2	Chronic Issue	32
3.2	History	32
3.3	Charter/DQO Writing	33
3.3.1	Problem-Solving Aspect of the DQO	33
3.3.2	Team Dynamics Aspect of the DQO	34
3.4	Team Structure	35
3.5	Examples	35
	Reference	40
4	Hypothesis Testing	41
4.1	Application of Hypothesis Testing in Problem-Solving	41
4.1.1	A Good Hypothesis	42
4.1.2	Qualified Hypotheses	44
4.1.3	Facts vs. Hypotheses	46
4.1.4	Hypothesis Tracking: The Onion	47
4.1.5	M.E.L.D. Hypothesis Ranking	49
4.1.6	Bringing Tools and Methodology Together	49
	Reference	50
5	Scenario Development	51
	Reference	52

Section II Project Management 53

6	Value of Project	55
6.1	Crisis Control	57
6.2	Time Control	57
6.3	Money Control	57
7	Team Management and Roles	59
7.1	Crisis Project Team Building	61
7.1.1	Team Building in a Crisis Project	61
7.1.2	Build Understanding of the Consequences of the Crisis	64
	Go to the Source	65
	Make Sure It Is a Real Crisis	65
	Summarize the Crisis into Just a Sentence or Two	67

7.1.3	Using the Three Best Questions (The Three Main Pillars of the Charter/DQO Process)	67
	Key Points from the Example on Technique of Using the Three Best Questions	67
7.1.4	Using the WIIFM Question (What's in It for Me)	68
	Key Points from the Example on Technique of Using the WIIFM Question	68
7.1.5	Leverage Situational Interaction Opportunities to Build Connections	69
	Key Points from the Example on Technique of Leveraging Situational Interaction Opportunities to Build Connections	70
7.1.6	Utilize Low Tolerance of Second Guessing	70
	Key Points from the Example on Using a Low Tolerance of Second Guessing	71
7.1.7	Take Action at Every Opportunity and Engage the Team	72
	Key Points from the Example on Taking Action at Every Opportunity and Engage the Team	73
7.1.8	Practice Regular Progress Reminders	73
	Key Points from the Example on Practicing Regular Progress Reminders	74
7.1.9	Build Respect for Team Members and Lead by Example	75
	Key Points from the Example on Building Respect for Team Members and Leading by Example	76
	Crisis Project Team Building: Summary	76
7.2	Life of the Plant Project Type Team Building	76
7.2.1	Crisis Project Techniques Also Work for Life of the Plant Project Work	77
7.2.2	Critical Nature of a Face-to-Face Kickoff Meeting	77
7.2.3	Generalized/Typical Team Building Approach	78
7.2.4	Asymmetric Workload Balance for Outsiders Versus Insiders	79
7.2.5	Opportunity Pairing of Outsiders with Insiders	80
7.2.6	Carefully Revisit Past	80
7.2.7	Something New	81
	Life of the Plant Project Type Team Building: Summary	81
7.3	Roles and Responsibilities for an FPS Project	82
	What Kind of Work do we Expect to be doing on this Project?	84
7.3.1	Roles and Responsibilities for an FPS Project: Summary	86
7.4	The Challenge in Maintaining Parallel Processing Within the Team	86
7.4.1	The Challenge in Maintaining Parallel Processing Within the Team: Summary	88
7.5	Strategies in Team Management for Very Large Projects	88

7.5.1	When to Form a Steering Team	88
7.5.2	Strategies in Team Management for Very Large Projects: Summary	90
7.5.3	Team Management and Roles: Summary	90
8	Stakeholder Identification, Analysis, and Communication Plan	91
8.1	Stakeholder Identification	93
8.1.1	The First Step, Stakeholder Identification-make a List	93
8.1.2	Typical Stakeholder List Information	94
8.1.3	Technique for Generating a Stakeholder List Within a Project Meeting	94
8.1.4	Where to Store Stakeholder Lists	94
8.1.5	Tips on Making Stakeholder Lists Effective	95
	Using Route Lists	95
	Shared Systems Approach	95
8.1.6	Typical Stakeholders in an FPS Project	96
8.1.7	Special Case of Key Stakeholders-Steering Team	98
8.1.8	Changing Nature of Stakeholders	99
8.1.9	Main Root Causes of Having an Incomplete List of Stakeholders	99
	Initial Stakeholder Analysis Incomplete	99
	Scope Change Due to Problem Location Understanding	101
	Phase Changes on Project such as Moving to Solution Implementation	102
	Company Churn as People Change Jobs	102
	Problem Severity Shifts Due to Outside Forces	103
8.1.10	Last Thoughts on Stakeholder Identification	104
8.2	Stakeholder Analysis – Deepen Your Understanding of the Stakeholder List	104
8.2.1	Initial (Current) Bias Toward Project	104
8.2.2	Needs vs. Initial Bias	106
8.2.3	Needs	107
8.2.4	Typical Stakeholder's Needs	107
	Rate-determining Step – What Is Slowing Down Progress?	108
	Timeline – When Is This Going to Be Done?	108
	Problem \$ Cost \$ Benefit Analysis – What Is This Problem Costing and What Is It Worth to Us?	111
	Impact to Employees – Will Our Employees Be Affected by the Problem?	115
8.2.5	Last Thoughts on Needs and Bias Gathering	116
8.3	Acting on Your Stakeholder Analysis – The Communication Plan	117
8.3.1	5Ws and an H. Who, What, Why, Where, When, and How?	118
8.3.2	WHY – Purpose and Desired Result	118

8.3.3	WHAT	121
8.3.4	WHAT 1: In Progress Project Work	122
8.3.5	WHAT 2: Team Working Meetings	123
8.3.6	WHAT 3: Team Working Meeting Minutes	123
8.3.7	WHAT 4: Standardized Stakeholder Project Updates	126
8.3.8	WHAT 5: Formal Stakeholder Project Milestone Review	127
8.3.9	Communication Tools to Use	129
8.3.10	FPS Storyboard	129
8.3.11	Final Thoughts on Storyboards	133
8.3.12	Standardized E-mail Project Updates	133
8.3.13	Elevator Speech	134
8.3.14	WHERE	135
8.3.15	Face to Face	135
8.3.16	Mixed	135
8.3.17	Remote Web or Telecom-based Systems	136
8.3.18	Other WHERE Decisions	137
8.3.19	WHEN	137
8.3.20	HOW	138
8.3.21	Pulling It All Together in a Communication Plan	139
8.3.22	Final Thoughts on Communication Planning	140
8.4	Managing Difficult Stakeholders	140
8.4.1	Final Thoughts on Managing Difficult Stakeholders	145
9	Generating, Selecting, and Implementing Solutions to the Problem	147
9.1	Introduction	147
9.2	The Joy of a Solution that Just Works	148
9.3	What Happens During the Solution Phase?	150
9.4	How Do We Generate Solutions?	150
9.4.1	Bridging Solution	151
9.4.2	Dead Easy/Obvious Solutions	153
9.4.3	Standardized Solutions	154
9.4.4	Benchmarking Solutions	155
9.4.5	Innovative Solutions	156
	Channeled Brainstorming	157
	Functional Analysis	158
	How Do You Mitigate the Risks Created During Solution Generation?	159
9.4.6	When Do We Select Solutions?	161
9.5	How Do We Select Solutions?	164
9.5.1	Solution Selection: What Is Success?	165

9.5.2	How Do You Determine a Solution's Quality?	165
	Theoretical-Paper Exercises (Computer Modeling)	165
	Empirical-Piloting	167
9.5.3	How Do You Determine a Solution's Cost and Timing?	170
9.5.4	How Do You Do Final Solution Selection?	171
	Decision Timing	171
	Keeping Options Open and Closing Them	172
9.6	Solution Implementation	173
9.6.1	Solution Implementation in Crisis Project Type: What Is Success?	
	What Is Necessary for Success?	174
	Cost Strategy Is Chosen. Now What?	177
9.6.2	Solution Implementation in Chronic Problem Project Type: What Is Success? What Is Necessary for Success?	178
9.6.3	Solution Implementation Planning	179
	Success Criteria Definition (What Is Success?)	180
	Overall Plan Generation, Monitoring, and Adjustment	180
	Two Errors of Planning	180
	Natural Planning	181
	Lean/Just in Time Planning	181
	Theory of Constraints Planning	181
	Stress Testing Planning	182
	Change Management Plan	182
	Solution-phase Stakeholder Communication Plan	183
	Control Plan Generation and Validation	183
9.6.4	Solution Validation	184
	Solution Adjustment vs. Going Back to Your List of Solutions	184
9.6.5	Solution Phase Summary	184
10	Sustaining the Gains and Control Plans	185
10.1	Why We Fail to Sustain the Gains	185
10.1.1	The Perception Problem	186
10.1.2	The Reality Problem	190
	High-risk Problem Types	191
	Low Frequency	191
	Counter Intuitive	193
	Reward Conflicting	196
	High-risk Solutions	197
	High-energy Solutions	197
	Soft Changes	198
	Lone Wolves	199
	Poor Solution Implementation	200

	Poor Change Management and Buy-in	201
	Roles and Responsibility Breakdown	202
	High-Skill Training Breakdown	203
	Outside Forces Conspiring Against Sustainability	204
	Rotten Apples	205
	Business Cycle Failures	206
	Reorganization Disease	206
	Summary of the <i>Reality</i> Problem Components of a Control Plan	207
10.2	Building Robust Control Plans for Solutions to Fundamental Problems	208
	Typical Control Plans	209
	FPS Control Plan Emphasis	211
10.3	Document, Document, Document	211
	How to Motivate Teams to Document	211
	5Ws and an H	213
	Summary	215
11	Project Wrap-up	217

Section III Examples 221

12	The Big World of Problems	223
12.1	Existing Products and Processes	223
12.1.1	Common Problems	223
	Plant Product Is Out of Specification	223
	Color	224
	Odor	224
	Trace Components – Evils of Recycles, Accumulation, and Trace Reactions	225
12.2	New Products and Processes	226
12.2.1	Products Are Often Developed Over Time Without Fundamental Understanding	226
12.2.2	Product Doesn't React Properly	227
12.2.3	Shelf Life	227
12.2.4	Polymers	228
12.2.5	Process and Plant Capacity	229
12.2.6	Catalyst	229
12.2.7	Reactive Chemicals	230
12.2.8	Materials Failure	231
12.2.9	Waste Water Treatment	231

- 12.3 Analytical Challenges to Problem Solving 233
- 12.3.1 Key Measurements Are Missing 233
- 12.4 Rare Problems 234
- 12.5 Improving the State of Existing Processes That Are Running as Expected 235
- 12.5.1 The Reference “Good State” 235
- 12.5.2 New Product/Process Development (All Plant Modifications Are a Subset of This Class) Where the Fundamentals Not Well Understood 235

13 Corrosion Problems 237

- 13.1 The Case of the Corroded Drum 237
- 13.2 The Case of the Corroded Reactor Tubes 238
- 13.3 The Case of the Corroded Rotating Equipment Seals 239
- 13.4 The Case of the Corrosion Catalyzed Fouling 239
- 13.5 Summary 240

14 Mechanical Issues 241

- 14.1 Rotating Equipment Examples 242
- 14.2 Materials of Construction 246
- 14.3 Heat Exchangers 247
- 14.4 Summary 248

15 Color 249

Section IV Problem-Solving Tools 259

16 Emphasis Is on Speed, Low Cost, Productivity, and Right Answer 261

17 Literature 265

- 17.1 Why Literature Search 265
- 17.1.1 Problem Understanding 265
- 17.1.2 Literature Search Is Economical 265
- 17.1.3 Lost Knowledge 266
- 17.2 How to Do Literature Search Properly 266
- 17.2.1 Sources 266
 - Peer-reviewed Internal Sources 266
 - Peer-reviewed External Sources 267
 - Internal Never Published/Paper-only Sources 267
 - Plant Libraries 267

	Patents	267
	The Unpublished Works	268
17.2.2	The Search Process	268
17.2.3	Pitfalls	269
	Massive Errors Propagated Throughout Literature	269
	Source Age	270
18	Scientific Method	271
19	Process Data Analysis	275
19.1	Preprocessing	275
19.1.1	Sampling	275
	Process Dynamics Considerations	276
	Historian Compression Considerations	276
	Transitions, Shutdowns, Missing Data	277
	Data with Large Differences in Sampling Frequency	278
	Linearization and Other Transforms	278
	Lags and Boxing/Grouping	278
	Bad Sensors	279
19.2	Univariate Methods for Data Analysis and Exploration	279
19.2.1	Trending	279
19.2.2	Univariate (Shewhart) Control Charts	280
19.2.3	Statistical Distribution Analysis	280
19.2.4	Some Advanced Statistics Aspects	281
19.3	Multivariate Methods for Data Analysis and Exploration	281
19.3.1	Principal Component Analysis	281
19.3.2	Partial Least Squares	284
19.3.3	Some Batch Process Considerations	285
	Lack of Steady State	285
	Batch Data Is 3D	285
	The Batch Durations Are Usually Not the Same Among the Different Batches	285
19.4	Example of Plant Data Analysis	286
19.4.1	Multivariate Analysis of the Plant Data	286
19.4.2	Summary of Data Analysis Results	289
	References	290
20	First Principles Modeling	291
20.1	Selecting the Right Theoretical Modeling Approach	292
20.2	Fundamental Models	294

20.3	Examples of Theoretical Modeling Application	297
	References	302
21	Analytical	303
21.1	Definition of Analytical Chemistry and Data	303
21.2	The Relationship Between Hypotheses, DQOs, and Analytical Data	305
21.3	Preparing an Analytical or Experimentation DQO	308
21.3.1	What Are the Best Means of Collecting the Sample?	311
21.3.2	What Are the Best Ways to Prepare the Samples?	312
21.3.3	What Are the Key Considerations for the Analysis?	312
21.4	How Analytical Data Are Used to Solve Problems	313
21.5	Conclusion	315
22	Engineering Disciplines Examples	317
22.1	Typical Engineering Disciplines in FPS	317
22.1.1	Reaction Engineering	317
22.1.2	Separations	317
22.1.3	Fluid Mechanics and Mixing (FM&M)	318
22.1.4	Solids Processing	318
22.1.5	Reactive Chemicals	318
22.1.6	Heat Transfer	319
22.1.7	Process Control	319
22.1.8	Process Analytical	319
22.2	Examples	319
22.2.1	Unwanted Material Messes Up a Separation Train	319
22.2.2	Isomer Tower Suffers from Poor Performance	320
22.2.3	Continuous Crystallizer Is Having a Hard Time	321
22.2.4	Plant Makes Smelly Solvent	322
22.2.5	Batch Solvent Stripper Optimization	322
22.3	Summary	323
23	Six Sigma, LEAN, and Continuous Improvement	325
23.1	LSS Comparison with FPS	325
23.2	Criticisms of LSS in Industry at Large, Beyond FPS	330
23.3	Recommendations for the Problem-Solving Community in a Company	332
24	Theory of Constraints	335
24.1	TOC – Recommended Reading List	345

25	Visual Presentation	347
25.1	The Napoleon Chart	348
25.2	The Hypothesis Matrix	349
25.3	The Issue Map	350
25.4	Photos and Videos	351
	References	353
	Appendix: Scientific Method Practice Levels	355
