Statistics for Clinicians

Contents

1	Introduction	1
1.1	The Phases of Clinical Trials	1
1.2	Randomised Controlled Trials	2
1.2.1	Randomisation	3
1.2.2	Minimisation	3
1.2.3	Blinding	4
1.2.4	Randomised Controlled Trial Designs	4
1.2.5	Example 1.1	5
1.3	Observational Studies	5
1.3.1	The Case Control Study	5
1.3.2	The Cohort Study	6
1.3.3	Example 1.2	6
1.4	Types of Data	6
1.5	Mean, Median and Variance	7
1.5.1	Numerical Data	7
1.5.2	Ordinal Data	8
1.6	Probability	8
1.7	The Normal Distribution	9
1.8	The Standard Error of the Mean	12
1.9	The t-Distribution	13
1.10	The Binomial Distribution	13
1.11	The Poisson Distribution	15
	References	17
2	Hypothesis Testing and p-Values	19
2.1	The t-Test	19
2.2	The Difference in Two Proportions	21
2.2.1	The Number Needed to Treat	21
2.3	The Chi Square Test	21
2.4	Paired Proportions, McNemar's Test	23
2.5	Ratio Statistics	24

2.6	Understanding p -Values	24
2.7	Sample Size Determination	25
2.8	Two Sided or One Sided Tests	26
2.8.1	Example 1.1 (Continued)	27
2.9	Non Inferiority Trials	27
2.9.1	The Choice of the Non Inferiority Margin	29
2.9.2	Example 2.1	30
2.9.3	Example 2.2	31
2.10	Non Parametric Tests	32
2.11	Analysing Questionnaire Data	32
	References	33
3	Regression	35
3.1	Univariate Regression	36
3.2	Multivariate Regression	37
3.3	Logistic Regression	39
3.3.1	Example 1.2 (Continued)	40
3.4	Multinomial Regression	41
3.5	Ordinal Regression	41
3.5.1	Example 3.1	42
3.6	Poisson Regression	44
3.6.1	Example 3.2	44
3.6.2	Example 1.1 (Continued)	45
3.7	Correlation	45
3.8	Analysis of Variance (ANOVA)	47
3.8.1	Repeated Measures ANOVA	49
3.8.2	Example 3.1 (Continued)	50
	References	50
4	Survival Analysis	53
4.1	Overview of Survival Trials	53
4.1.1	Patient Inclusion and Exclusion Criteria	54
4.1.2	Trial Outcomes	54
4.1.3	Sample Size Determination	55
4.1.4	Stopping Rules for Survival Trials	56
4.1.5	Intention to Treat and as Treated Analyses	57
4.2	The Kaplan-Meier Survival Curve	57
4.3	Cox Regression	61
4.3.1	Example 4.1	62
4.3.2	Example 4.2	65
4.3.3	Example 4.3	65
4.4	The Logrank Test	66
4.5	Composite Outcomes	66
4.5.1	Example 4.4	67
4.5.2	The Win Ratio	68
4.5.3	Example 4.5	69

4.6	Competing Events	70
4.6.1	Example 4.6	71
4.7	The Cumulative Incidence Function (CIF)	71
4.8	Hazard Functions with Competing Events	73
4.8.1	The Cause Specific Hazard	73
4.8.2	The Subdistributional Hazard	74
4.8.3	Relationship Between Hazard Ratios	74
4.8.4	Example 4.6 (Continued)	75
4.9	Composite Endpoints and Competing Events	76
4.9.1	Example 4.7	76
4.9.2	Example 4.8	78
4.9.3	Example 4.9	78
4.9.4	Example 4.10	79
4.9.5	Commentary on Examples 4.8–4.10	79
4.9.6	Example 4.11	81
4.10	Summary of Competing Events	81
4.11	The Proportional Hazards Assumption	82
4.11.1	Example 4.12	83
4.12	Mean Survival Time	85
4.12.1	Example 4.1 (Continued)	86
4.12.2	Example 4.11 (Continued)	86
4.12.3	Example 4.13	86
4.12.4	Example 4.14	87
4.13	Survival Analysis and Observational Data	88
4.14	Clinical Prediction Models	88
4.14.1	Basic Principles of Clinical Prediction Models	89
4.14.2	Example 4.15	91
4.14.3	Example 4.16	93
4.14.4	Summary of Clinical Prediction Models	94
	References	94
5	Bayesian Statistics	97
5.1	Bayes Theorem	98
5.2	Credible and Confidence Intervals	99
5.3	Bayesian Analysis of Clinical Trials	100
5.3.1	Example 5.1	100
5.3.2	Example 5.2	101
5.3.3	Example 5.3	102
5.3.4	Example 5.4	102
5.4	Choice of Prior	103
5.5	Bayesian Analysis of Non Inferiority Trials	103
5.5.1	Example 2.1 (Continued)	103
5.6	Summary of the Bayesian Approach	104
	References	105

6	Diagnostic Tests	107
6.1	The Accuracy of Diagnostic Tests	107
6.1.1	Comparison of Diagnostic Tests	108
6.2	Use of Diagnostic Tests for Patient Care	109
6.2.1	Bayes Theorem Applied to Diagnostic Tests	109
6.3	Clinical Application of Bayes Theorem	110
6.4	Examples of Selecting a Diagnostic Test	112
6.4.1	Acute Pulmonary Embolism	112
6.4.2	Suspected Coronary Artery Disease	114
6.5	Summary of Diagnostic Testing in Clinical Practice	118
6.6	The ROC Curve	118
6.7	The C-Statistic for Diagnostic Tests	119
	References	119
7	Meta Analysis	121
7.1	Systemic Review of Trial Evidence	121
7.2	Fixed and Random Effects Meta Analyses	122
7.3	Heterogeneity	122
7.4	The Forest Plot	123
7.5	Publication Bias	124
7.6	The Funnel Plot	125
7.7	Reliability of Meta Analyses	126
7.7.1	Sensitivity Analysis	127
7.8	Interpretation of Meta Analyses	127
7.8.1	Example 7.1	128
7.8.2	Summary	132
7.9	Meta Regression	133
7.9.1	Example 7.2	133
7.10	Bayesian Meta Analysis	135
7.10.1	Bayesian Fixed and Random Effects Analyses	135
7.10.2	Example 7.3	135
7.10.3	Example 7.1 (Continued)	137
7.10.4	Example 7.4	138
7.10.5	Summary	138
7.10.6	Bayesian Meta Regression	138
7.11	Network Meta Analysis	139
7.11.1	Example 7.5	140
7.11.2	Example 7.6	141
7.12	Meta Analyses Using Patient Level Data	143
	References	143
	Appendix	145
	Index	151
