Preface to the English Edition	<i>xvii</i>
Preface to the First German Edition	<i>xix</i>
List of Abbreviations	<i>xxi</i>
Glossary	<i>xxvii</i>

1	Introduction to Microbiology	1
1.1	Historical	1
1.2	Importance	2
1.3	World of Microorganisms	3
1.3.1	Prions	4
1.3.2	Viroid	5
1.3.3	Viruses	5
1.3.4	Archaea	5
1.3.5	Bacteria	6
1.3.6	Chlamydia	6
1.3.7	Rickettsia	7
1.3.8	Mycoplasma	7
1.3.9	Fungi	7
1.3.10	Protozoa	9
1.4	The Bacterial Cell	9
1.4.1	Capsule	11
1.4.2	Flagella	11
1.4.3	Fimbriae and Pili	11
1.4.4	Endotoxins	11
1.4.5	Exotoxins	12
1.4.6	Bacterial Morphology	13
1.4.7	Bacteria Forms	13
1.4.8	Endospores	13
1.4.9	Bacterial Physiology	13
1.4.9.1	Nutrition and Metabolism	14
1.4.9.2	Ambient Condition	15
1.5	Taxonomy of Microorganisms	18
1.5.1	Classification	18

1.5.2	Nomenclature	22
1.6	Medical Microbiology	22
1.6.1	Infection Routes	22
1.6.1.1	Direct Routes	22
1.6.1.2	Indirect Route	24
1.6.1.3	Nosocomial Diseases	24
1.6.1.4	Zoonoses	24
	References	26
	Further Reading	27
2	General Conditions for the Operation of Microbiological Laboratories	29
2.1	Laws and Technical Regulations	29
2.2	Medical Care for Employees	33
2.3	Operating Description for Microbiological Laboratories	36
2.4	Establishment of Microbiological Laboratories	37
2.4.1	Required Devices/Equipment	37
2.5	Nutrient Media	39
2.5.1	Liquid Nutrient Media (Bouillons)	40
2.5.2	Solid Nutrient Media	40
2.5.3	Selective Nutrient Media	43
2.5.4	Nutrient Media with Chromogenic Substrates	43
2.5.4.1	Failure modes in the Preparation of Solid Culture Media	43
2.6	Media Preparation	47
2.6.1	Required Devices	48
2.6.2	Acetobacter Preservation Agar DSM	48
2.6.3	Bacto <i>Neurospora crassa</i> Agar	48
2.6.4	Baird-Parker Agar	49
2.6.5	BPLS Agar	49
2.6.6	CSA (4.0%)	50
2.6.7	CSA (0.7%)	50
2.6.8	CSB	50
2.6.9	CSB, Double Buffered	51
2.6.10	Cetrimide Agar	51
2.6.11	ChromoCult® Coliform Agar	52
2.6.12	CLP Agar	52
2.6.13	DEV Endo Agar	52
2.6.14	DEV Nutrient Agar	53
2.6.15	DEV Lactose Peptone Broth, Double Concentrated	53
2.6.16	Lactose TTC Agar with Tergitol 7	54
2.6.17	Lethen Agar	54
2.6.18	MacConkey Agar	55
2.6.19	R2A Agar	55
2.6.20	Sabouraud Agar	55
2.6.21	Standard I Agar	56

2.6.22	Standard I Slant Agar	56
2.6.23	VRBD Agar	57
2.6.24	XLD Agar	57
2.6.25	Biotin Maintenance Nutrient Medium	57
2.6.26	Biotin Inoculum	58
2.6.27	Ca-Bio-Nik-Agar	58
2.6.28	Production of the Stock Solutions	59
2.6.29	Calcium Pantothenate Maintenance Nutrient Medium	59
2.6.30	RCM Agar (for Clostridia)	60
2.6.31	Clostridia Culture Medium	60
2.6.32	Meat Extract Agar	61
2.6.33	Fluorocult LMX Broth	61
2.6.34	Folic Acid Cultivation Agar According to Freed	61
2.6.35	Glucose Broth	62
2.6.36	Urea Slant Agar	62
2.6.37	Yeast Extract Agar According to ISO 6222	63
2.6.38	Lactose Broth	63
2.6.39	Lysine Decarboxylase Culture Medium	64
2.6.40	MacConkey Broth	64
2.6.41	Sodium Chloride Peptone Buffer	64
2.6.42	Peptone water	65
2.6.43	OF Test Nutrient Medium	65
2.6.44	ODC Broth	66
2.6.45	Nitrate Broth	66
2.6.46	Nutrient Gelatin	66
2.6.47	Selenite Cystine Enrichment Broth	67
2.6.48	Protective Medium for Lyophilization	67
2.6.49	SIM Culture Medium	67
2.6.50	Simmons Citrate Agar	68
2.6.51	SLP Agar	68
2.6.52	TBG Broth	69
2.6.53	Thioglycolate Broth	69
2.6.54	Vitamin B ₁₂ -Test Broth	69
2.6.55	Vitamin Folic Acid Test Broth	70
2.6.56	Vitamin Nicotinic Acid Test Broth	70
2.6.57	Vitamin Pantothenic Acid Test Broth	71
2.6.58	Vitamin Biotin Test Broth	71
2.6.59	Wort Agar	71
2.6.60	Yeast Agar	72
2.6.61	Bismuth Sulfite Agar	72
2.6.62	Brolacin Agar	73
2.6.63	Malonate Broth	73
2.6.64	Mannitol Saline Phenol Red Agar	73
2.6.65	Mossel Broth	74
2.6.66	MRS Broth	74

2.6.67	MRS Agar with Cysteine	74
2.6.68	Rappaport-Vassiliadis Salmonella Broth	75
2.6.69	RCM Agar Plus Lithium Chloride	75
2.6.70	OM 211 for <i>Staphylococcus aureus</i>	76
2.6.71	<i>Klebsiella</i> maintenance medium	76
2.6.72	Inoculation Medium for <i>Klebsiella pneumoniae</i> According to Seiffert	77
2.6.73	Own Production	77
2.6.74	Purchasing	77
	References	78

3 Calibration and Qualification of the Devices 81

3.1	Calibration Error	83
3.2	Calibration	83
3.3	Balance	84
3.4	pH Meter	85
3.5	Piston Pipettes	85
3.6	Stopwatch	86
3.7	Devices for Achieving Specific Temperatures	87
3.7.1	Thermometer	87
3.7.2	Incubator	88
3.7.3	Refrigerator/Freezer	89
3.7.4	Hot Air Sterilizer	89
3.7.5	Autoclave	90
3.8	Clean Bench	90
3.8.1	Principle	91
3.9	Air Sampler	93
3.10	Particle Counter	95
3.11	Measuring Device for Determining the Water Activity	96
3.12	Photometer/Reader	96
3.13	Tube Reader for Endotoxin Determinations	98
3.14	Fluorescence Reader for Endotoxin Determinations	98
	References	98

4 Stock Collection 101

4.1	Reference	101
4.2	Shipping	105
4.3	Storage	105
4.4	Cultivation	106
	References	107

5 Industrial Hygiene 109

5.1	Hygiene	109
5.1.1	Pharmaceuticals and Active Substances Manufacturing Ordinance	111
5.1.2	What is the Goal of Industrial Hygiene?	111
5.1.3	Personal Hygiene	111

5.1.4	Inclusion of a Hygiene Register	111
5.2	Microbiological Basics for Hygiene	112
5.2.1	Sources of Contamination During Production	113
5.2.2	Factors Influencing Microbial Purity	115
5.2.2.1	Production	115
5.2.2.2	Consequences	115
5.3	Hygiene Measures	115
5.3.1	To 1: Personal Hygiene	115
5.3.1.1	Wash and Disinfect Hands	116
5.3.1.2	How to Perform a Proper Hand Disinfection?	116
5.3.1.3	Clothing	117
5.3.1.4	Medical Monitoring	118
5.3.1.5	General Behavior	120
5.4	Sterilization, Disinfection, and Aseptic Production	127
5.4.1	Sterilization	127
5.4.2	Sterilization process	128
5.4.3	Disinfection	128
5.4.4	Asepsis	135
5.4.5	Disinfestation	135
5.4.6	Pasteurization	135
5.4.7	Preservation	136
5.5	Hygiene Protocol for Microbiological Laboratories	136
5.6	Pest Control	137
5.6.1	Precautionary Measures	138
5.6.2	Infestation Control	139
5.6.3	Chemical Methods	139
5.6.4	Physical Methods	139
5.6.5	Biological Methods	139
5.6.6	Aftercare	139
5.7	Hygiene Officer	140
5.8	Implementation of Hygiene Training Courses	140
	References	143
6	Environmental Monitoring	145
6.1	Methods	145
6.1.1	Testing the Room Air	145
6.1.2	Testing Surfaces	147
6.1.3	Testing of Employees	148
6.2	Microbiological Monitoring in the Sterility Test Isolator	150
6.2.1	Example of an Isolator	151
6.2.1.1	Monitoring in the Isolator	153
6.2.1.2	Documentation	154
6.3	Physical Monitoring in Sterile Production	154
6.4	Physical Operation	155
6.5	Evaluation of the Microorganisms	158

6.6	Register of Microorganisms	159
6.6.1	Gram-Positive Bacteria	160
6.6.1.1	Staphylococci	160
6.6.1.2	Streptococci	160
6.6.1.3	Enterococci	160
6.6.1.4	Micrococci	161
6.6.1.5	Corynebacteria	162
6.6.1.6	Propionibacteriaceae	162
6.6.1.7	Bacillus	163
6.6.1.8	Paenibacillus	163
6.6.2	Gram-Negative Bacteria	163
6.6.2.1	Enterobacteriaceae	163
6.6.2.2	Pseudomonads	166
6.6.3	Partially Acid-Resistant Rods	169
6.6.4	Yeasts	169
6.6.4.1	<i>Candida albicans</i>	169
6.6.4.2	<i>Cryptococcus neoformans</i>	169
6.6.4.3	<i>Rhodotorula</i>	170
6.6.4.4	<i>Mucor</i>	170
6.6.5	Fungi	170
	References	170
	Further Reading	172
7	Quality Control	173
7.1	Pharmacopeial Methods (Compendial Methods)	173
7.1.1	Determination of TAMC/TYMC and Specified Microorganisms	174
7.1.1.1	Acceptance Criteria for the Microbiological Quality of Non-sterile Substances for Pharmaceutical Use	175
7.1.2	Testing for Sterility	177
7.1.2.1	Example of Membrane Filtration	178
7.1.2.2	Example of Direct Inoculation	178
7.1.3	Detection of Fever-Inducing Substances	179
7.1.3.1	Historical	185
7.1.3.2	Determination Methods	186
7.1.3.3	Endotoxin Standard Series	186
7.1.3.4	Reference Standards BRP-4.x and EC-6	186
7.1.3.5	Control Standard NP-4 and <i>Escherichia coli</i> Standards	187
7.1.3.6	Controls During the Test	188
7.1.3.7	Laboratory Confirmation of Lysate Sensitivity	189
7.1.3.8	Testing a Product	189
7.1.3.9	Alternative Procedure	197
7.1.3.10	In Vitro Pyrogen Test (IPT or Monocyte Activation Test, MAT)	197
7.1.3.11	Masking/Demasking	200
7.1.4	Checking for Sufficient Preservation	202
7.1.4.1	Test Organisms	204

7.1.4.2	Performance of the Preservative Load Test	205
7.1.5	Determination of Antibiotic Activities	205
7.1.5.1	Example: Determination of the Content of the Active Substance Gentamycin Sulfate	205
7.1.5.2	Specification	205
7.1.5.3	Sample Preparation	205
7.1.6	Determination of Mycoplasmas	208
7.1.7	Testing for Mycobacteria	210
7.1.8	Evaluation of Bioindicators	211
7.1.8.1	Determination of the Number of Spores on Spore Strips	211
7.1.8.2	Determination of the Spore Count in Ready-to-Use Ampoules Such as Sterikon® Plus (Figure 7.6)	213
7.1.8.3	Evaluation of Bioindicators After an Autoclave Run	213
7.2	Non-Compendial Methods	214
7.2.1	Determination of Vitamin Concentrations	214
7.2.1.1	Operating the Vibrating Mill	216
7.2.1.2	Example for the Determination of Cyanocobalamin in Vitaminized Gummy Sweets	216
7.2.1.3	Determination of Cyanocobalamin	217
7.2.2	Determination of β -1,3-D-Glucans	220
7.2.3	Testing of Packaging Materials	221
7.2.3.1	Testing Bottles, Vials, and Ampoules	222
7.2.3.2	Testing Pipettors	222
7.2.3.3	Testing Stoppers, Droppers, and Small Lids	222
7.2.3.4	Large Lids	223
7.2.3.5	Blister Packs	223
7.2.3.6	Large Containers	223
7.2.4	Detection of Probiotic Bacteria	224
7.2.4.1	Determination of the Total Aerobic Microbial Count (TAMC) Using the Plate Castin Method	225
7.2.5	Microscopic Cell Size Measurement	226
7.2.6	Bioburden Determination of Detergents and Disinfectants	227
7.2.6.1	Microbiological Examination of Cleaning Agents and Disinfectants for Total Bacterial Count and Bacterial Species	227
7.2.7	Inoculation Tests	228
7.2.7.1	Implementation	228
7.2.7.2	Materials Needed	228
7.3	Tests Using Animal Models	228
7.3.1	Rabbit: Testing for Pyrogens – Ph. Eur. 2.6.8	231
7.4	Cell Culture Methods	231
7.4.1	Historical	232
7.4.2	Operational Description of a Cell Culture Laboratory	233
7.4.3	Safety Instructions	233
7.4.4	Waste	233
7.4.5	Passaging Cells	234

7.4.6	Determination of Total Cell Count and Live Cell Count in the Counting Chamber	234
7.5	Validation of Pharmacopeial Methods	235
7.5.1	Testing for Sterility	236
7.5.1.1	Description of the Implementation Using the Example of Membrane Filtration	236
7.5.2	Testing for TAMC/TYMC and Specified Microorganisms	238
7.5.2.1	TSB Nutrient Medium	239
7.5.2.2	Sabouraud Glucose Nutrient Medium (Without Antibiotics Such as Chloramphenicol)	239
7.5.2.3	Procedure	240
7.5.2.4	Audit Scope	241
7.5.2.5	Bracketing Concept	241
7.5.2.6	Plate Casting Process	241
7.5.2.7	Membrane Filtration	242
7.5.3	Testing for Endotoxins	246
7.5.3.1	Test for Inhibition and Amplification	246
7.5.3.2	Determination of the Endotoxin Limit Value	247
7.5.3.3	Summary and Evaluation	256
7.5.3.4	Nomenclature for Validation Parameters for the LAL Test	257
7.5.4	Determination of Antibiotic Concentrations	257
7.5.4.1	Determination of Gentamycin Activity by the Turbidimetric Method	258
7.5.4.2	Summary	262
	References	263
	Further Reading	266
8	Process Validations	267
8.1	Media Fill	267
8.1.1	Targets	267
8.1.2	Bracketing Concept	268
8.1.3	Examples	268
8.1.4	Training of the Employees Who Evaluate the Media Fill	269
8.1.5	Implementation of the Media-Fill Run	269
8.1.6	Acceptance Criteria	270
8.1.7	Media Fill Fail	272
8.1.8	New Developments in Media-Fill Bouillons	273
8.2	Depyrogenation	274
8.2.1	Result	275
8.2.2	Depyrogenation Tunnel	276
8.2.3	Result	276
8.3	Validation of Sterilization with Dry Heat	276
8.4	Validation of Sterilization Using Moist Heat (Autoclave)	278
8.5	Validation of Sterile Filtration	279
8.5.1	Validation of the Filter Type	280

8.5.2	Validation of the Filtration System	280
8.5.2.1	Product-Related Validation	280
8.5.2.2	Process-Related Validation	280
8.5.3	Integrity Testing of Membrane Filters	281
8.5.3.1	Bubble Point Test	281
8.6	Container Closure Integrity Test	282
8.6.1	Aim of the Validation	283
8.6.2	Description of the Materials Used and the Method	283
8.6.3	Description of the Vials and the Stoppers	283
8.6.4	Preparation of the Immersion Suspension and Determination of the Bacterial Count	283
8.6.5	Pretreatment of Vials and Stoppers	284
8.6.6	Filling of the Culture Medium, Sealing, and Crimping	284
8.6.7	Leak Test	284
8.6.8	Growth Test After the Leak Test	284
8.6.9	Results	285
8.7	Cleaning Validation	286
8.7.1	Aim of the Cleaning Validation	287
8.7.2	Acceptance Limits	287
8.7.3	Microbiological Methods in Cleaning Validation	287
8.7.3.1	Detection of Endotoxins on Surfaces in Contact with the Product	288
