

# **Enabling the Extreme Ultraviolet Advantages for Chemical Microanalysis**

**Dissertation\***

**zur**

**Erlangung der naturwissenschaftlichen Doktorwürde  
(Dr. sc. nat.)**

**vorgelegt der**

**Mathematisch-naturwissenschaftlichen Fakultät**

**der**

**Universität Zürich**

**von**

**Di Qu**

**aus**

**der V.R. China**

**Promotionskommission**

**PD. Dr. Davide Bleiner (Vorsitz)**

**Prof. Dr. Greta Patzke**

**Prof. Dr. Stefan Seeger**

**Zürich, 2023.**

| <b>Zusammenfassung</b>  | <b>iv</b>  |
| <b>Abstract</b>   | <b>vii</b> |
| <b>1 Introduction</b>   | <b>1</b>   |
| 1.1 New Capability Using XUV . . . . .                                | 1          |
| 1.2 Theory of Extreme Ultraviolet . . . . .                           | 3          |
| 1.2.1 XUV Matter Interaction . . . . .                                | 7          |
| 1.2.2 Single-Photon Ionization . . . . .                              | 9          |
| 1.2.3 Refractive Indices of XUV . . . . .                             | 11         |
| 1.2.4 Total Reflection and Grazing<br>Incidence Diffraction . . . . . | 13         |
| 1.3 Using XUV as Probe for Microanalysis . . . . .                    | 15         |
| 1.3.1 Laser-Material Interaction . . . . .                            | 16         |
| 1.3.2 Laser Ablation Threshold . . . . .                              | 18         |
| 1.3.3 Classes of Chemical Bonds . . . . .                             | 19         |
| 1.3.4 Bond Energies and Melting<br>Temperatures . . . . .             | 21         |

|          |       |   |           |
|----------|-------|---|-----------|
|          | 1.3.5 | State-of-the-Art XUV Irradiation . . . . .                | 24        |
| 1.4      |       | Analyzing XUV from Plasma . . . . .                       | 28        |
|          | 1.4.1 | Laser-Induced Breakdown Spectroscopy . . . . .            | 28        |
|          | 1.4.2 | Using XUV from Laser-Induced Plasma . . . . .             | 30        |
| 1.5      |       | Analytical Resolution . . . . .                           | 32        |
| 1.6      |       | Conclusions . . . . .                                     | 33        |
| <b>2</b> |       | <b>Plasma-Based XUV Sources</b>                           | <b>37</b> |
